UPDATES IN YELLOW

CORE GAME

FREQUENTLY ASKED QUESTIONS

Q: Questions — A: Answers

AVATAR DEFEATED AND ADDITIONAL CARD

Q.

- What happens if the Avatar is defeated, for example due to a Trap, while they are resolving the top Effect of a Command Card?
- If the second Effect of the Command Card is a Spell, is it ignored because the Avatar is in their Cell?
- If an Avatar is defeated while resolving an Effect and that Effect shows the Additional Card symbol, does the Avatar have to reveal the additional card?
- If the top Effect of the additional card (in case it must be revealed) shows a Spell must it be resolved even

if the Avatar is in their own Cell? Is this Spell Effect considered an integral part of the previous Effect that contained the additional card symbol or is it considered a new "Cast a Spell" Action?

A.

- The Avatar continues to resolve the Effect up to the period (.), then the Avatar's defeat is resolved. Finally, the Avatar continues to resolve the Effect they were resolving at the time they were defeated. Then they attempt to perform the lower Effect of the same Command Card, but this effect is ignored because the Avatar is located in their own Cell. The Avatar never performs Momentum or Explore Actions. Note that any Trap/Protect Effects of the Avatar resolve even if they are placed in the Cell, as with any other Mage.
- Yes, like any other Mage, if the Avatar is in their Cell, they cannot Cast a Spell. For the Avatar, the Spell Effect of a Command Card is equivalent to a Spell Casting Action for a player-controlled Mage.
- Yes, the additional card must be revealed. (No rule prohibits resolving the Additional Card symbol, even if no Avatar can perform Momentum or Explore).
- The answer in step 2 applies. The Avatar reveals the Additional Card, but Spell Effects cannot be performed as long as the Avatar is in the Cell. It is not considered part of the previous Effect.

AVATAR DEFEAT, DOMINION

Q. Does the Possessed Avatar's Domination skill only apply if they are in their Cell at the start of their activation, or does it apply anytime they must resolve an Effect outside of their activation?

A. The Dominion skill applies only at the beginning of their activation.

HEAL

Q. If a Heal effect targets a Room, are all models in the Room healed, both my Mage and other players' Mages and Evocations?

A. Yes.

EMPTY DECK, LIBRARY, EVENT, QUESTS

(page 14)

Q. What happens if in the Study Phase I want to draw a Spell Card from a school but that school's deck is empty?

A. As a general rule, when the player is to draw/reveal/add/search a card from an empty deck, all the discards from that deck must be shuffled. Then the player can resume the Effect using the new deck. This applies to school decks in the Library, a Mage's Grimoire, the Event deck, and the Quest deck.

TASK, QUEST OR JINX (page 12)

Q. It is mandatory to place the Cube on a Quest or Jinx Card when my Mage fulfills the condition of a Task?

A. Yes, it is mandatory.

EVOCATIONS, VALUES WITH ASTERISK (*)

Q. What happens if an Effect targets an Evocation with a Health value of 3 or less, but that Evocation has only an Asterisk (*) printed on its Health value, without any other number?

A. In BRW there are Evocation Cards with Health values indicated only by an Asterisk (*). Those values are neither greater nor less than any number, so they are never taken into account by Effects that target a Model based on that value. These Effects therefore cannot be applied to Models in the game that show only an Asterisk (*) value with no other values.

However, if a value shows a number together with an Asterisk (*), only the numerical value printed on the card must be taken into consideration and the Asterisk (*) must be ignored.

REVEALED TRAP/PROTECTION CARD (page 17)

Q. When is a Trap Spell considered cast and when is it considered revealed?

A. If a Trigger Condition requires a Spell to be Cast, it must be read as if the Spell were Revealed. In fact, when a Mage performs the Cast a Spell Action on a Trap/Protection Spell, it is not revealed, but a Trap/Protection Token must be placed on it. From this moment it is no longer considered a Ready Spell, but is considered an Active Spell. A Trap/Protection Spell is Revealed when the card is flipped face up.

ELEMENT, SPELL (page 15)

Q. Does the All Elements (⊕) symbol on the Spell Card have to be decided when the Spell is revealed? 2) Does the choice made last until the end of the current Turn?

A. Whenever a Mage must count the number of their Elements to resolve an Effect, they consider the All

Elements symbol (⊕) as 1 symbol of any element of their choice. This choice lasts until the Effect is completely resolved. Subsequently, when the Mage resolves a different Effect in which they must count the number of their elements again, they can treat the All Elements symbol (⊕) as 1 element identical or different from the previously chosen one."

AVATAR, EVOCATIONS (page 40)

Q. When an Avatar determines a target Room according to the "most Models" criteria, do they also have to consider their own Evocations?

A. No, Avatar Evocations must not be considered in this case. Even the Avatar model itself does not have to be considered when counting the models in the Room where the Avatar is located.

FORGOTTEN SPELL OPERA, "IGNORE" EFFECT

Q. What Effects are ignored by a Mage who has played the Opera Forgotten Spell on themselves?

Can that Mage's Evocations be targeted?

Can that Mage's Instability Cubes be converted?

A. This Spell allows the Mage to ignore the Effects of other Mage's Spells. The Spells cast are resolved in their entirety, but the Mage targeted by Opera ignores the Effects on their Model. Traps and Protections can trigger if Opera's target meets the Trigger Condition, but they ignore the Effect.

The Opera Effect does not extend to components owned by the Mage such as Evocations or Damage/Instability Cubes, however if an Effect requires targeting (or affecting) the Mage to affect these components, they ignore it.

TARGET OF A SPELL

Q. If the text of a Protection Spell says: "You are the Target of an ⚡ Spell" can I use this protection if the Spell Card shows a Room Symbol as the Target and the Effect of that Spell applies to my Mage?

A. No, if the Trigger Condition specifies that your Mage is the target of a Spell you can resolve the Effect of that Protection if the other Mage's Spell targets have one of the symbols ♀0, ♀1, ♀*... or ♂0, ♂1, ♂*... and if your Mage is targeted.

NIGHTMARE SCHOOL, AVATAR

Q. Can I assign an Umbra to the Avatar?

A. Yes, it is possible to assign an Umbra to an Avatar. During the Evocation Phase that Umbra does not inflict Damage neither to the Avatar nor to the Evocation on the same slot as the Umbra.

NIGHTMARE ACTIVATION

- Q. When the Umbra performs a Physical Attack, does it target both the Mage and the Evocation that occupies the same slot as the Umbra?
Or does it target just one between the Mage and the Evocation?
- A. When an Umbra performs a Physical Attack the target is always the Mage to whom it is assigned. Additionally, because of the Effect of the Umbra Evocation Card, its controller deals 1 Damage to the Evocation that is in the same Slot as the Umbra.

DISCARD SPELL CARDS

- Q. When an Effect says to discard a Spell Card, do I always have to choose one of the cards from my hand?
- A. Yes, in the absence of any other specification the target must discard one of the cards from their hand.

CONVERT DAMAGE, SELF

- Q. Can I convert other Mage's Damage on my Mage Sheet?
- A. No, when a Mage resolves an Effect that allows to convert Damage this does not apply to themselves or their Evocations.

EFFECTS ON MY MAGE

- Q. An Effect inflicts 1 Damage in the target Room and moves all models in that Room to an adjacent Room. What happens to my Mage if they are in the target Room? What happens to one of my Evocation if it is in a target Room?
- A. According to the Immunity rule, a Mage cannot inflict or convert Damage on themselves or their Evocations. Any other Effects apply normally.

SOLVE A MISSION

- Q. If an Effect allows me to solve a Quest, can I solve the Quest's Effect at that time?
- A. No. According to the rules, I can resolve the Effect of a Completed Quest on my Turn, then that Quest becomes Solved and I gain the Power Points. When an Effect allows me to Solve a Quest, it means that I immediately gain the Power Points indicated by the card, furthermore at the end of the game, that Quest counts towards the number of Solved Quests. In this case the Quest Effect is not resolved.

SPELL CASTING

- Q. At what point in the spell casting process (see FAQ 1.1, page 3, "Casting a Spell") is the Mage considered to have cast a spell? This is important for certain Traps that trigger when a Mage has cast a spell.
- A. The process of "Casting a Spell" begins with the action of revealing a Spell Card and ends with the complete resolution of that Spell's Effect.

"WHEN," "AFTER," AND "EACH TIME"

- Q. What are the differences between the terms "When," "After," and "Each time"?
- A. The phrases "When," "After," and "Each time" can be considered synonyms in this game.

ALCHEMY SPELL - FOUNTAIN OF THE THREE

- Q. Is Enhancement part of the "OR" Effect, or is it actually always applied even if I choose to resolve the phrase under "OR"?
- A. The Enhancement segment is always performed.

DISCARD SPELL CARDS

- Q. According to the rulebook, I can discard a Spell Card from my hand during the Study Phase. Where is a Personal Spell Card discarded during this phase placed?
- A. When a Mage discards a Spell, they place it in their Memories. If an Effect indicates that a Spell Card must be discarded into the discard pile of its School of Magic (Library discard pile), a Mage may discard a Personal Spell, but it is removed from the game.

LARGE EVOCATION (page 20)

- Q. Can I summon an Evocation with a large base (such as the Colossus) and a Forgotten Evocation larger than the large Evocation Base?
- A. No, an Evocation that is larger than the large Evocation Base must be considered as a large Evocation, the same as a Colossus.

TRIGGER CONDITION, RESOLVE (page 18)

- Q. If multiple Mages have Traps/Protections triggered at the same time, in what order should they declare whether to resolve the Effects? In what order are they resolved?
- A. When a Trigger Condition occurs, each Mage, in Order of Play, has a chance to resolve one or more Effects that require that Trigger Condition. If a Mage must resolve more than one Effect they choose the order in which those Effects are resolved. If there are Effects that must be resolved by the Black Rose these take precedence over any Mage, that is, they must be resolved before the Effects of the First Mage. If a Mage must resolve one Effect involving multiple targets that Effect is considered resolved simultaneously on all targets.
So if a Mage does not resolve any Effect when a Trigger Condition has occurred, they cannot choose to do so after another Mage has resolved an Effect with the same Trigger Condition. After each Mage, in Play Order, has resolved their Effects or declared that they will not resolve any Effect, the game continues.

JINX AND EVENTS, TRAP/PROTECTIONS, RESOLVE (page 18)

- Q. In what order are the Events, the Jinxes, and the Traps/Protections that would be resolved if the same condition were to occur?
- A. Some game components such as Events, Jinxes, Traps/Protections or other game components have an Effect that must be resolved when a specific condition occurs. For what concerns Trap/Protection Spells, the resolution of these Effects is explained in detail, and Effects generated by other components follow the same rule.
- When a condition occurs, the game continues until the period (.) of the current Effect; then, in Play Order, each Mage has the opportunity to resolve one or more Effects triggered by that condition and generated by any game component.
- If a Mage needs to resolve more than one Effect they choose the order in which they are resolved. If an Effect must be resolved by the Black Rose, this takes precedence over any Mage, it must be resolved before the Effects of the First Mage.
- If a mage must resolve an Effect involving multiple targets that Effect is considered resolved on all targets at the same time.

AVATAR, TRAP/PROTECTION (page 38)

- Q. Can an Avatar resolve a Command Card with Trap/Protection symbol if they have already reached the card limit for the current Action Phase?
- A. No, if the card limit has already been reached the Avatar cannot resolve other Trap/Protection Effects.

PLACE / MOVE (page 38)

- Q. Is an effect that places a model in a Room considered a movement?
Is the model considered to have entered that Room in both cases?
- A. Place and Move are different keywords. This applies even if the Place keyword resolves in a Room adjacent (or in the same Room) to where the model was located.
- A model is considered to have entered a Room whether it moves or places itself in that Room.

ACTIVE SPELL, MOMENTUM (page 38)

- Q. A non revealed Spell with a Trap/Protection token is called an Active Spell.
Is it still considered a Ready Spell?
Can I discard an Active Spell to perform a Momentum Action?
- A. No, an Active Spell is not considered a Ready Spell, therefore it is not possible to discard an Active Spell to perform a Momentum Action.

FORGOTTEN EVOCATIONS, SUMMON (page 21)

- Q. If an Effect allows me to summon an Evocation of a certain archetype, can I choose a Forgotten Evocation with that archetype?
- A. No, Forgotten Evocations can only be summoned by Forgotten Spells or Effects that specify to summon a Forgotten Evocation.

ARCHETYPE (page 21)

- Q. Are an Evocation and a Forgotten Evocation with the same Archetype considered the same Archetype for the purposes of Game Effects?
- A. Yes, They are the same archetype.
- For example, an Evocation Card that says Forgotten Beast identifies a (Forgotten) Evocation with the Beast Archetype.

DEFEATED MAGE, ONLY ONE COLOR (page 28)

- Q. A Mage is defeated by a text Effect, without being inflicted Damage equal to their Health value. If that Mage only suffered Damage of one color, does the Mage who inflicted that Damage gain 5?
- A. The Mage gains 5 when an opposing Mage is defeated and that Mage is the only one to have inflicted Damage to the defeated Mage.

MAGE DEFEAT (page 28)

- Q. If a Mage is defeated while resolving an Effect, after the defeat is resolved, that Mage continues resolving the interrupted Effect.
What happens if the defeated Mage had more Effects to resolve?
For example if they had performed an Explore Action with multiple "Move 1" Effects to resolve.
Are Effects not yet resolved lost or can they be resolved?
- A. After a Mage's defeat has been resolved that Mage continues to resolve only the Effect that was interrupted. All other Effects produced by the same Action are lost.
- This rule is given on page 18 in the section Timing of Resolution of Trap/Protection Spells, but it applies in any case where a Mage is defeated while resolving an Effect.

AVAILABLE EVOCATION, CLEAN-UP PHASE (page 31)

- Q. At point 1 of the Cleanup Phase it is stated that the Evocations are available again.
Does this mean that the Evocations can be activated again in the following Turn or does it mean that they are removed from the Lodge and must be returned to the Evocation deck?
- A. The sentence in this paragraph is not very clear.
- It refers to the case when the optional "Crown of the Summoner" rule is used and indicates the time when Evocation Cards are rotated to their original position.
- Evocations are not removed because of this rule.

EQUIPMENT LIMIT

- Q. Is there a limit to the number of Equipment a Mage can own?
Is it possible to sum the Effects of two or more Equipment that provide a similar bonus or to the same characteristic?
- A. The Effects of Equipment with different names are added together, however a Mage cannot have 2 or more Equipment with the same name.

DISCARD A QUEST

- Q. If an Effect indicates a Mage to discard 1 Quest (without any other details), can they choose to discard only one of their Active Quests or can they also choose one of their Completed or Solved Quests?
- A. The mage targeted by this Effect must choose one of their own Active Quests, Completed Quests or Solved Quests.

EVOCATIONS AVAILABLE, COMPONENTS AVAILABLE

- Q. Which Evocations are defined as available to be summoned?
For example, if an Effect allows me to summon an Evocation with a Health value of 3 or less, can I choose an Evocation that is not summoned by any of the Schools of Magic used in the current game?
- A. All Evocations in the game are considered available. However, before starting a game, players could mutually define which components and expansions to use for the current game. This applies to Evocations but also to Upgrade Cards and all other game components.

MECHANICAL ARCHIVE, TECHNOMANCY

- Q. The Mechanical Archive card from the Technomancy school tells you to reveal a Spell Card. Is this considered as a Revealed Spell?
- A. The Effect of this card means that the chosen card must be shown to the other players, then it is drawn by the player. This is not considered a Revealed Spell.

STEAL, POWER POINTS

- Q. Can I steal Power Points from a Mage with 0 Power Points?
- A. Stealing an amount of Power Points means that the target loses that amount of Power Points and the Mage gains that same amount of Power Points. If the target has fewer Power Points than indicated they lose all the Power Points they had, then the Mage gains Power Points equal to the amount lost by the target. Stealing can also be applied to other game elements such as Quests or Trophies, the same rule must be followed.

PHYSICAL ATTACK

- Q. A Spell allows my Mage to perform a Physical Attack. Is this Damage considered inflicted by the Spell?
- A. No, in this case the Damage is considered to be inflicted by a Physical Attack.

DISCARDED SPELL, PERSISTENT EFFECT

- Q. Does a Persistent Effect of a Spell remain active if that Spell is discarded from the Mage Sheet? For example, if it is moved to the Memories via the Armory Room.
- A. A Persistent Effect is no longer active if the Spell that generated it is no longer in the corresponding Space of the Mage Sheet. In this case the Persistent Token returns to the Mage's personal reserve.

SPELL DISCARDED, EFFECT INTERRUPTED

- Q. If a Spell is discarded from the Mage Sheet while its Effect is being resolved, is the Effect interrupted or resolved completely?
- A. In this case the Spell Effect is resolved up to the first period (.) then the Card is discarded. The rest of the Effect is ignored.

COLOSSUS, DAMAGE

- Q. If a Colossus Evocation and a Mage are moved into a Room due to an Effect, does that Colossus inflict 3 Damage to that Mage?
- A. No, because the Effect of the Colossus Evocation Card applies to a Mage who enters a Room where the Colossus is already present.

QUEST, MASTER OF DEATH

- Q. If a Mage is in their Cell can they be chosen for the Effect of the "Master of Death" Quest?
(Rebirth Core Box, Third Moon Quest)
- A. No, a Mage in their Cell cannot be chosen by an Effect, therefore not even by the Effect of this Quest.

CELL

- Q. When a Mage is in the Cell, that Mage cannot be targeted or influenced in any way. Does this refer only to the Mage's Model or to all components and game values (e.g. Power Points) of that Mage?
For example, is it possible to target one of their Evocations or one Instability Cube? Can that Mage lose Power Points?
- A. An Effect that removes 1 Instability from a target Room can be applied even if the Mage owner of that Instability is in the Cell. The same applies to any other Effect that affects a component owned by that Mage and does not require targeting the owning Mage. However, if, for example, an Effect requires you to choose a target Mage, you cannot choose a Mage who is in the Cell.

A Mage in the Cell plays normally with the following exceptions:

- During their Activation (or at the start of their Activation), a Mage who is in a Cell must perform a Physical Action or a Momentum Action to leave the Cell. They can then choose to resolve other Effects. As long as they are in the Cell, all phrases in their Physical/Momentum Action that do not allow them to leave the Cell are ignored.
- A Mage in the Cell cannot be targeted for Effects resolved by other Mages. A Mage in the Cell ignores any Effects (in any part of it) resolved by other Mages, except Effects that specify that they apply to a Mage in the Cell.
- The Effects of Event Cards also apply to Mages in the Cell.

The Cell cannot be chosen as a target for Effects that require a ①, ②, ③, ④ target. The Cell ignores all Effects that would apply to a Room, with the exception of Effects that specify that they apply to a Cell.

CELL

- Q. Can a Mage who is in the Cell be placed in a different Room by resolving the Final Duel Trap Effect?
- A. Yes, when this spell is resolved, the Mage in the Cell may leave the Cell.

COMPATIBILITY

- Q. Some Effects in Black Rose Wars have phrases containing multiple keywords such as 'inflict' or 'summon'. How should these Effects be resolved with the new Traps/Protections rules?
- A. In order to resolve Traps and Protections these Effects should be understood as if the different keywords were written in several sentences separated by a period (.).

DEFEATED, REMOVED

- Q. What is the difference between a defeated or removed model? There are Effects that refer to only one of these terms.
- A. A Mage or Evocation is defeated when it takes a number of Damage equal to its Health value. When the defeat of an Evocation is resolved, its model is removed from the Lodge and its Evocation Card is returned to the deck of available Evocations. Some Effects allow you to remove an Evocation without it being defeated, i.e. regardless of how much Damage it has suffered. When an Evocation is removed due to an Effect it is not considered defeated.

PLACE INSTABILITY

- Q. A condition requires me to place 2 Instabilities, if I play an Effect that places 2 or more Instabilities but the target Room has only 1 free slot, is the condition considered as fulfilled?
- A. No, the condition is not considered to be fulfilled.

INFLICT DAMAGE (page 28)

- Q. Can I inflict more Damage to a Model than its Health value?
- A. A Model can suffer a maximum amount of Damage equal to its own Health value. When an Effect inflicts Damage on a Model it can inflict a maximum amount of Damage equal to the target's Health value minus any Damage that target has already suffered before the Effect is resolved. The amount of Damage inflicted on a target is always equal to the amount of Damage suffered from that Effect.

VULNERABILITY, JINX

- Q. Can a Mage inflict 1 Damage to the target Mage when the Jinx card Vulnerability is assigned to the target?
- A. No. Vulnerability allows the Mage to inflict 1 Damage on the target Mage each time a Jinx is assigned if Vulnerability is already assigned to the target.

JINX SPELL - SUFFOCATION

- Q. My Mage has the Weakness Jinx assigned, and another Mage has the Suffocation Trap ready. In my Activation, I activate a Green Room that allows me to place the third Cube on the Jinx. The Jinx is discarded, but the Trap can only target a Mage with a Jinx. In what order are these Effects resolved?
- A. When a Condition occurs (in this case, Activating a Room), each Mage in Play Order may resolve one or more Effects that require that Condition. So once the Room is Activated, the First Mage may choose to resolve an Effect, and so on. If the Mage who activated the Room is also the First Mage, they can discard the Jinx and the other Mage cannot resolve their Trap.

AVATAR COMMAND CARD (page 36)

- Q. When an Avatar Command Card is resolved, does it count both as a Revealed Spell and as a Physical Action for the purposes of trigger conditions of other components?
- A. A single Command Card can contain several different Effects, it can contain both a Physical Action and a Spell. When a Command Card is revealed the Avatar is considered to have revealed a Spell Card if that Command Card has a Spell Effect. When a Physical Action Effect is resolved the Avatar is considered to have performed a Physical Action.

CUBES ON QUEST AND JINX (page 12)

- Q. When I complete a Jinx/Quest, do the Cubes return to the Mage's Pool?
- A. Yes, the cubes return to the Mage's Pool.

LIQUID FIRE SPELL, SCHOOL OF ALCHEMY

- Q. The effect of Spell Liquid Fire (Dark Side) targets a Room. Does the Enhancement part apply to my construct in the targeted Room or to any of my constructs in the Lodge?
- A. The Card Effect applies in full to the Target Room unless otherwise stated. In this case the construct must be in the Target Room.

EFFECT "EACH TIME"

Q. Some Effects have the condition “each time” occurring in the text. How can you distinguish something that occurs at the same time from something that occurs at two separate times?

For example, the Forgotten Spell Cursed Bond: “Each time the target places Instability, you place the same amount of Instability in a ⓪.”

If I activate the Garden Room (Rebuilt) Effect, can I apply the Cursed Bond Effect only once or twice?

Garden Room (Rebuilt) : “ⓧ Place 1 Instability. ⓧ Place 1 Instability.”

A. Two sentences separated by a period (.) are considered different moments.

The condition required by an Effect (in the same way as the Trigger Condition of Traps and Protections) is checked at the end of each period (.) of the Effect being resolved.

In the case where the Garden Room (Rebuilt) is triggered, the Cursed Bond Effect is applied twice.

Instead, an Effect: “Place 1 Instability in each ⓪.” is to be considered resolved at a single time.

CA' DARIO'S AMULET SPELL, SCHOOL OF HEX

Q. Does the Ca' Dario's Amulet Spell Card also deal 2 Damage to a target Mage who has no Jinx assigned?

A. Yes, the number of Jinxes assigned only affects the previous sentence concerning stealing PP. The Spell deals 2 Damage regardless of the Jinxes assigned to the target.

EFFECTS "OR"

Q. Some Effects contain the word "or", how should they be read?

For example, if I reveal the Slicing Spell from the War School, can I move 1 and then choose one of the two parts or can I only move if I choose the first part?

A. The word "or" between two sentences is meant to divide the text into two parts. The Mage chooses whether to resolve the part before “or” or the part after “or.”

TROPHY

Q. Some Effects allow you to discard, gain, take or steal a Trophy Token.

1. What is the difference between these words?

2. Can I discard 1 Trophy of my color to perform an Effect?

3. Can I steal a Trophy of my color owned by another Mage?

A. At the end of the game a Mage gains Power Points for the Trophies obtained. Trophies obtained through the defeat of a Mage or thanks to other Effects that allow you to obtain a Trophy from other Mages are counted. Trophy tokens of your own color are not counted.

1. For the purposes of this rank the words gain/obtain/take must be considered synonymous.

2. When a Mage must discard 1 Trophy it refers to an obtained Trophy, therefore a Mage cannot discard a Trophy of their color.

3. When a Mage steals 1 Trophy they must choose Mage, so they obtain a Trophy Token obtained by that Mage. In this case the Mage cannot choose a Trophy Token of their color.

NIGHTMARE IN THE CELL

Q. According to the Nightmare School Reference Card, all Nightmares in the Lodge are considered to be Black Rose properties. However, it may happen that a Mage (with an assigned Nightmare) is placed in the Cell without being defeated. Is the Nightmare assigned to a Mage placed in the Cell still considered to be Black Rose property?

A. The Cell is not considered part of the Lodge, this means that a Nightmare assigned to a Mage who is in the Cell is not considered Black Rose property. It is not activated during the Evocation Phase. When that Mage leaves the Cell the Nightmare returns to being Black Rose property.

BLACK ROSE ROOM

Q. If I activate the Room of the Black Rose (not-Rebuilt) and I only have 2 Spell Cards in my hand, do I discard all the cards in my hand or none?

A. In this case you have to discard 2 Spell Cards and you cannot draw the Forgotten Spell.

PERSISTENT EFFECT, MAGE IN THE CELL

Q. If the condition of a Revealed Persistent Effect occurs while my Mage is in the Cell, can I apply its Effect?

A. Yes, a persistent Effect follows the same Timing as Traps/Protections so I can resolve a persistent Effect while my Mage is in the Cell. However, Effects that apply to the Room my Mage is in (i.e. the Cell) are ignored. For example, it is not possible to place Instabilities or Evocations in the Cell.

TARGET HAS BEEN MOVED

- Q. Once I have chosen the target, if that target moves because of a Trap/Protection and moves into a Room out of line of sight, can I apply the effect of the Spell?
- A. After the target has been declared you can continue to resolve Effects that apply to the target even if it has moved. Only in case the target is in the Cell, ignore the remaining part of the Effect.

INSTABILITY ON SPELL CARD

- Q. If a Spell shows the Instability symbol in the center of the card should I place that Instability before or after declaring the target of the Spell Effect?
- A. The target of the Effect should be declared after placing the Instability. The central Instability represents an Effect separate from the textual Effect of the card.

EVOCATION ABILITY, TIMING

- Q. When you activate an Evocation, does that Evocation's Ability resolve before any Traps/Protections? For example, when the Nigredo inflicts Damage, can its controller immediately place 1 Instability, or can the Crown Holder resolve a Trap/Protection before placing Instability?
- A. The Evocation Skill must be treated as an Effect that is resolved by the Mage controlling that Evocation, so it follows the same Timing as Traps/Protections. In the case of the Nigredo, when it activates, the Crown Holder might resolve a Trap/Protection Effect (which is triggered when the Nigredo has inflicted Damage) before the Nigredo's controller resolves the Nigredo's Skill.

COMPATIBILITY BRW-REBIRTH, QUEST

- Q. How can I use BRW Quest Cards in a BRW-Rebirth game?
- A. The Quests of BRW only provide  or  and an alternate Effect for Quests that require a Room to be activated. When a Quest of the first BRW is completed it is also immediately solved. All Effects of BRW that refer to a Completed Quest are understood to refer to a Solved Quest.

EFFECTS "OR"

- Q. The Spell Card An Eye for an Eye contains the word or within the same sentence, how should it be read?
- A. In this card the word "or" separates the two parts contained within the same sentence. That "or" affects only the sentence in which it appears; either the first part or the second part of that sentence must be resolved.

MARK OF PAIN, SCHOOL OF AGONY

- Q. The Permanent Effect of the Spell Card "Mark of Pain" requires the target Mage to inflict Damage by a Spell or Physical Action. Is the condition considered fulfilled if that Mage performs a Physical Attack due to a Spell Effect or a Room Effect?
- A. No, it is not fulfilled. Damage must be inflicted through a Physical Action (Fight) or through the Effect of a Spell

NIGHTMARE SCHOOL

- Q. The rulebook does not explain what it means for a Nightmare to be attached to a Mage. In the Seal of Fire rulebook a Familiar attached to a Mage is considered one Model with that Mage, so it cannot be targeted. Does this also apply to a Nightmare?
- A. The term "attached" is not a school keyword, it refers to putting the miniature with the half-moon base side by side with the Mage's miniature. The correct word in reference to a Nightmare is assigned to a Mage and the rules for a Nightmare assigned to a Mage apply. Instead, a Familiar passing into a Guard Position attaches to the Mage and follows the rules for a Familiar in a Guard Position. A Nightmare assigned to a Mage is considered an Evocation that is in the same Room as that Mage.

FORGOTTEN, REFERENCE CARD

- Q. The Forgotten Reference Card indicates the cases in which a Forgotten Spell must be removed. For the purpose of removing a Forgotten Spell, is the Memories slot considered part of the Mage Sheet?
- A. No, the Memories Slot is not considered part of the Mage Sheet. When a Forgotten Spell must be placed in the Memories, it is instead removed from the game.

PERSISTENT EFFECT

- Q. Some Spells with a Persistent Effect show the  symbol at the beginning of the text rather than within the text. In this case, when the persistent condition occurs, do I have to resolve the whole Effect or only part of it?
- A. In this case, phrases found before the  symbol are to be resolved only when the Spell is revealed. Sentences that are after the  symbol are to be resolved only when the indicated condition is met.

EVOCATION ACTIVATION

- Q. If an Effect allows one of my Evocations to perform a Physical Attack is it considered as an Activation of that Evocation? For example, when the Nocturnus Evocation is in the Lodge, the other non-nightmare Evocations can activate. If I resolve an Effect that allows a non-nightmare Evocation to perform a Physical Attack (not to activate) or move, is this Effect blocked by the Nocturnus?
- A. A Physical Attack (or movement) is not an activation. In this case, the Nocturnus skill does not prevent the Evocation from performing a Physical Attack or movement.

DEFEAT, TROPHY

- Q. In the case where a Mage converts the rightmost Damage on the Mage Sheet of a defeated Mage, who gains the Trophy Token? The Mage who inflicted the Damage or the Mage who converted that Damage?
- A. The Trophy Token is gained by the Mage who resolved the Effect that caused the Mage's defeat. In this case, by the Mage who inflicted the Damage that caused the Mage's defeat.

SPELL SOURCE OF LIFE (SHAMANIC), GAIN POWER POINT

- Q. The Spell targets a Room, and the last sentence says "gain 1 ☹️". In this case, does the Mage who resolved the Effect gain 1 Power Point or do all Mages in the target Room gain 1 Power Point?
- A. The sentence "gain 1 ☹️." means that the Mage who resolves that Effect gains 1 Power Point, regardless of the target of that Effect.

SPELL (AGONY) INELUCTABLE PAIN

- Q. The Target of this card is a Model. If I have assigned this Persistent to an Evocation, can I inflict 2 Damage when that Evocation defeats a Mage and thus allows its controller to gain Power Points for defeating a Mage?
- A. This is an inaccuracy in the target of the Spell, in fact an Evocation cannot gain Power Points. It is useful to assign this Persistent only to a Mage. When that Mage gains Power Points you can inflict 2 Damage on that Mage.

THIRD MOON

- Q. When a Power Token reaches or passes the End of Game Moon Phase Cube, the Third Moon Phase ends. When this happens, must the decks of Event Cards and Quest Cards belonging to the Third Moon be removed or do they remain in play?
- A. The decks of Event Cards and Third Moon Quest Cards remain in play until the end of the game.

TOTEM, ACTIVATION

- Q. When the Totem Evocation is activated, can it heal 1 ❤️ on a Model within distance 1 of itself or within distance 1 of its controller?
- A. The Totem can convert 1 ❤️ or heal 1 ❤️ to a Model (other than itself) within distance 1 of that Totem.

NIGREDO AND EXPLODING BONES

- Q. A Nigredo has the Explosive Bones Upgrade from the Lex School. When that Nigredo is defeated/removed, it inflicts Damage in the Room. In this case, can I apply Nigredo's skill to place 1 Instability or can it not be applied because the Nigredo is defeated and its skill is no longer active?
- A. No game rule specifies that as soon as an Evocation is defeated/removed its Evocation Card must be ignored. Therefore, in this case, when the Nigredo inflicts Damage you resolve its skill to place/convert Instability.

JINX, HEX SCHOOL

- Q. At what exact time is it possible to discard a Jinx Card? For example, I have been assigned the Slowness Jinx, can I move only 1 the third time I perform the Explore Action or can I consider that it has already been discarded and I can move up to 2?
- A. The number of "Move 1" Effects provided by the Physical Action Explore is determined at the time the Mage declares that they want to perform that Action and the Physical Action Token is exhausted; thus the Mage's Speed value is 1 due to Slowness. Immediately thereafter, the Mage can discard that Jinx, before performing the Effects "Move 1." or "Activate a Room."

TRAP/PROTECTION

- Q. At what point exactly can I choose to reveal a Trap Card if the condition is verified while an Effect is being resolved? Do I have to reveal the Trap as soon as the condition is met? Or can I wait until the current Effect is resolved to the (.) period?
- A. A Mage must declare that they intend to resolve a Trap Card whose Trigger Condition is verified. They can do so when the current Effect has reached the (.) period.

CAST A SPELL

- Q. What are all the procedures to be followed (and in what order) to perform the Cast a Spell Action other than Trap/Protection?
- Does the Trigger Condition present on some Traps, "A Spell targets you or you are about to suffer its Effect" turn out to be verified when the Mage is chosen as the target, thus before the Effect is applied, or only after a phrase of that Effect is applied to the Mage who has the active Trap/Protection?
- A. The procedure to be performed is:
1. Reveal the Spell Card.
 2. If an Instability ☹️ symbol is in the center of the card, place 1 ☹️ in a ①.
 3. Choose target of the Spell Card Effect.
 4. Resolve the Spell Card Effect.
- The Trigger Condition "a Spell targets you or you are about to suffer its Effects" is verified when:
- At the time of choosing the target if the target of the Spell Card is ♀️ or ♂️ and if the Mage who has the active Trap/Protection is chosen as the target.
 - Before a phrase is applied, if the Mage who has the active Trap/Protection is not the target of this Spell, but if that phrase affects them.

NIGREDO, ABILITY

- Q. When a Nigredo activates and inflicts Damage, am I obliged to Place/Convert 1 Instability, or can I choose neither?
- A. You must choose one of two options: Convert 1 Instability or Place 1 Instability. However, the choice is totally free, for example you could choose to Convert 1 even if there is no Instability in that Room.

AVATAR DEFEAT, CELL

- Q. The Avatar usually does not perform the Physical Actions Explore or Momentum. If the top Effect of the additional Command Card shows a Physical Action, does it have to be resolved even if the Avatar is in their Cell?
- A. Only Physical Actions that allow for a Move (or a placement) or Momentum can be resolved while a Mage is in the Cell, so the Avatar cannot leave the Cell if the Command Card it revealed shows a Physical Action with an Effect other than these.

DRAWING SPELL CARDS

- Q. An effect says, "Draw 1 Spell Card." Can I draw this card from either my Grimoire or the Library of my choice?
- A. When a Mage resolves an Effect that allows them to draw a Spell Card, it must always be drawn from their Grimoire, unless otherwise specified by the Effect.

WISE MOON QUEST

- Q. The Wise Moon Quest can be completed after a Mage resolves the Bibliotheca Room Effect. Is it possible to complete this Quest if it is drawn using the Bibliotheca Effect?
- A. Yes, it may be completed after resolving the Bibliotheca Effect.

INFLICTING DAMAGE

- Q. When is damage considered inflicted? If it is ignored, is it still considered inflicted? (see channeling energy spell and regenerative ichor upgrade)
- A. Damage is considered inflicted when the Cube representing that Damage is placed on the Mage Sheet (Damage inflicted on a Mage) or on an Evocation Card (Damage inflicted on an Evocation). Ignored Damage is not considered inflicted. The defeated Mage may resolve a Trap/Protection before resolving the defeat, which ignores/heals some Damage. If healed from Damage, they are no longer defeated, but the Damage is still considered inflicted (and then healed). Ignored Damage is not considered inflicted.

ALCHEMY SPELL - PURIFY ALUDEL

- Q. The text reads "Heal three on your target evocation. The target activates." Can I only target one of my evocations?
- A. One of my Evocations must be chosen as the target.

ERRATA

E: Error — F: Fix

PERSISTENT EFFECT (page 20)

- E. The text of the ☼ "Persistent" paragraph on page 20 is not comprehensive and does not indicate all cases where these Effects apply.
- F. Persistent effects are a type of Spell Effects that remain active for the duration of the Turn. Persistent Effects apply whenever the condition required in their text is met. To show that one of these Effects is active, the Mage who cast the Spell featuring it places on the target their Persistent Token corresponding to the Spell Slot (☁, I, II or III) in which that Spell is located. If the target is a Mage (including themselves), they place the Persistent Token on their Mage Sheet; if it is an Evocation, they place it on their Evocation Card; if it is a Room, they place it in the Room. The Persistent Effect ends when the Spell Card is removed from the Mage Sheet for any reason; when that happens, the Mage regains their Persistence Tokens. Resolution of a Persistent Effect uses the same rules as those described in Timing and Resolution of Traps/Protections on page 18. A Mage who is in the Cell may also resolve a Persistent Effect of a Revealed Card whenever the required condition occurs.

REPLACED EVOCATION (page 20)

- E. When a Mage performs an evocation and has all of their Evocation Slots already occupied, the replaced Evocation is considered Removed.
- F. The correct rule is as follows: "If a Mage summons an Evocation when all of their Evocation Slots are occupied, they may choose one of their Evocations already present in the Lodge and replace it with the newly summoned one. The replaced Evocation is not considered removed. To do so, discard the Evocation Card of the replaced Evocation and replace it with that of the newly summoned Evocation; then place the Model of the replaced Evocation in the reserve, and place the Model of the newly summoned Evocation in the Room indicated by the Effect that summoned it."

DEFEATED MAGE, POINT 6, TIE (page 28)

- E. The sentence regarding the case of a tie for inflicted Damage is not correct, because the tied mages should always gain at least 1 Power Point.
- F. The correct version is as follows:
"Tie: in the event that multiple Mages (or the ☼) have inflicted the same number of Damage, those Mages gain the corresponding amount of ☁ reduced by 1. In the case of 1 ☁ or less, this amount is not reduced."

DAMAGE AND INSTABILITY (page 27-28)

- E. Some texts in the Rulebook incorrectly state that it is possible to decide how many cubes to place/convert, or even none at all, when resolving an inflict/place/convert Effect.
- F. When a Mage resolves an Inflict/Place/Convert Effect, they must do so using the number of Cubes indicated by the Effect. Any limitations apply in cases where, for example, the Instability slots available in a Room are full, the Damage slots available on a Mage Card are full, the Cubes in their reserve are full, or the opponent's Cubes that can be converted are full.

TURN ORDER (page 9)

- E. In the Rulebook Setup is stated that Cells are placed covered randomly, and it may happen that a player does not sit in front of their Cell. This causes a problem when using Avatars.
- F. On page 10 in step 11, add the following sentence:
"Players take their places around the table so that they are facing the Cell of their own color."

APPLY A PHRASE OF AN EFFECT (page 16)

- E. The following text in the gray box must be updated:
"Each phrase that makes up an Effect must be applied, starting with the first and proceeding in order. If a sentence cannot be applied, it is skipped and continued to be applied from the next sentence"
- F. "Each sentence that makes up an Effect must be applied in full, beginning with the first and proceeding in order. If a phrase cannot be applied in full, the parts that cannot be applied (even all of them) are skipped and you continue with the next phrase."

HEALTH, EVOCATION (page 20)

- E. The description of the Health value indicates that when an Evocation has suffered Damage equal to that value it is removed, rather than defeated.
Replace the incorrect sentence:
"When an Evocation has a number of Damage Cubes on its card equal to its Health value , it is removed from play. Remove the Model from the Lodge, then return its card to the proper Evocation Deck. Then return its base ring to its owner."
- F. Replace with:
"When an Evocation has a number of Damage Cubes on its card equal to its Health value, it is defeated. Remove its Model from the Lodge, place its Evocation Card in the Evocation Card Deck. The owner takes back the Evocation Base attached to the defeated Model."

REMOVE EVOCATIONS (page 21)

- E. Effects that remove evocations need a general rule.
- F. Insert the following text:
"Some game Effects allow you to remove an Evocation from the Lodge. When a Mage resolves one of these Effects they must comply with these points:
 - A non-Forgotten Spell cannot remove another Mage's Forgotten Evocation.
 - A non-Forgotten Spell cannot remove another Mage's Evocation with a Health value greater than 3. Note that some Effects may change the Health value of an Evocation from that printed on the Evocation Card.
 - An Effect that removes your own Evocation allows the Mage to ignore the previous points; therefore you can remove your Evocation with any Health value even if it is a Forgotten Evocation.
 - A Forgotten Spell that removes an Evocation ignores the previous points; therefore you can remove one of your own (or another Mages's) Evocation with any Health value even if it is a Forgotten Evocation.

DAMAGE, EVOCATION (page 21)

- E. In the description of the Strength value the last sentence specifies that damage inflicted by an Evocation is considered to be inflicted by both the Mage and the Evocation. This sentence is wrong.
- F. The correct last sentence is: "When an Evocation inflicts Damage, place Damage Cubes of its controller's Color on the target Mage Sheet or Evocation Card; this Damage is considered as dealt by the Evocation Model."

CELL, MOVEMENT (page 25)

- E. The Rulebook states that it is not possible to enter the Cell voluntarily. It must be specified that this applies both to your own Mage and to other Mages.
- F. Replace the last point of the list with:
"You cannot move your Mage or another Mage into a Cell, however some Game Effects may place a Mage into their Cell."

CELL, PHYSICAL ACTION (page 25)

- E. In the Cells paragraph at point 4 it is indicated that if a Mage begins their Activation in the Cell they must perform an Explore or Dash Action to exit. This is applied even if the Mage is placed in the Cell during their Activation. Furthermore, the Physical Actions from the Apocalypse expansion have been included which allow you to exit the Cell.
- F. Replace point 4 of the paragraph Cells with the following text:
"A Mage in a Cell may exclusively perform the following:
- Reveal and resolve Effects of their own Trap/Protection Spells if triggered.
 - Resolve the Persistent Effect of a their own Revealed Spell.
 - Activate their own Evocations during the Evocation Phase.
 - Perform any Physical Action (or Momentum) that allows them to move (or place) to exit the Cell.
- When a Mage begins their Activation in a Cell, or if they are placed in the Cell during their Activation, they must perform an Action of their own to exit the Cell if they can do so. If they have no other Actions available they remain in the Cell."

DUMMY TARGET (page 26)

- E. The Dummy Target paragraph needs to be updated.
- F. Replace the text from "It is possible to choose a Dummy Target" with the updated text:
"It is possible to choose a Dummy Target as the target of an Effect that targets Models --. The Dummy Target counts as a Model, even if it is not physically in the Lodge; the purpose of choosing it as a target is to allow Mages to cast a Spell and resolve as much of its Effect as possible, even when there are no Models available as targets.
The Dummy Target has the following characteristics:
1. It has no archetype, so it cannot be chosen as the target of Effects that require a specific archetype.
 2. It ignores Effects that inflict Damage, steal Power Points or involve components owned by a Mage (such as Trophies).
 3. It is not represented by a Model, so it cannot be moved and is never considered to have entered a Room.
 4. It has no values; any Effect that refers to a Dummy Target value is ignored."

CUBE ORDER (page 27)

- E. It is not specified that Instability cubes are placed in the Room starting from the first leftmost Slot.
- F. Add the following sentence at the end of the Instability paragraph:
"When a Mage (or ) places Instability they must place cubes on the vacant slots starting from the left."

IMMUNITY, RULE (page 28)

- E. The Immunity rule has been updated.
- F. Here is the correct version:
"Unless specified by the Effect, a Mage and the Evocations they control ignore all Damage inflicted or converted by any Effect resolved by that Mage.
An Evocation does not inflict Damage on the Mage that controls it or the Evocations controlled by that Mage (see page 20 control an Evocation)."

HEAL (page 28)

- E. It is not indicated in the Rulebook how to resolve a Heal Effect.
- F. Insert the following text in the Damage and Defeat paragraph:
"Some Effects Heal the Damage that has been inflicted on a model. When Healing Damage the Mage chooses a number of Damage Cubes equal to or less than the amount indicated by the Effect, among those inflicted on the target Model (or Models). Healed Damage Cubes must be returned to their owners. You can choose any color combination of Damage Cubes to Heal from those assigned to the target. When an Avatar Heals Damage on themselves or another Mage they choose the Damage cubes placed on the target's Mage Sheet starting from the right."

REBUILD ROOM, CLEAN UP-PHASE (page 31)

- E. Point 3 of the Clean-Up Phase contains some inaccuracies. At point 3.3 it is indicated that the Mage who has placed the lowest number of Instability receives the lowest amount of Power Points in the Rebuilt Room, instead that value goes to all Mages who have placed at least 1 Instability. In case of a tie for the same amount, the Mages always receive at least 1 ⚡.
- F. Replace point 3 with the following text:
Check if there are any Rooms in the Lodge that must be Rebuilt (see page 27).
1. For each Room that must be Rebuilt, count the Instability Cubes of each color and assign Power Points ⚡ as described below and based on the quantities indicated by the banner of the Rebuilt Room:
 2. If there are only Instability Cubes of one color, the Mage (or 🧙) of that color gains ⚡ equal to the amount indicated by the leftmost banner increased by 1.
 3. The Mage (or 🧙) who has placed the greatest number of Instability Cubes gains ⚡ equal to the quantity indicated by the leftmost banner.
 4. The Mage (or 🧙) who placed the second highest number of Instability Cubes gains ⚡ equal to the quantity indicated by the central banner.
 5. Every other Mage (or 🧙) who has placed at least one Instability cube gains ⚡ equal to the amount indicated by the rightmost banner.
- Tie: in the event that multiple Mages (or 🧙) have placed the same number of Instability Cubes, those Mages gain the corresponding amount of ⚡ reduced by 1. In the case of 1 ⚡ or less this amount is not reduced.

EVENT CARD POWER INFUSION (THIRD MOON)

- E. The Effect of this card is Instant but in the text it says "At the beginning of the Action Phase".
- F. The Event applies as soon as it is revealed, the phrase "At the start of the Action Phase" must be ignored.

BLACK ROSE ROOM, LANGUAGE VERSION

- E. In some language version of the game the Black Rose Room is missing the "If you do" text on its Effect.
- F. The correct Effect is: "discard 3 🗑️. If you do, draw 2 Forgotten 🗑️, keep 1 and discard the other.

END OF THE GAME, QUESTS (page 32)

- E. The sentence regarding the case of a tie in terms of number of Solved Quests is not correct, because the tied Mages should always gain at least 1 ⚡.
- F. The correct version is:
"Tie: in the case in which multiple Mages (or the 🧙) have the same number of Solved Quests, those Mages gain the indicated amount of ⚡ reduced by 1. In the case of 1 ⚡ or less this amount is not reduced."

END OF THE GAME, TROPHIES (page 32)

- E. The sentence regarding the case of a tie in terms of number of Trophies obtained is not correct, because the tied Mages should always gain at least 1 ⚡.
- F. The correct version is:
"Tie: in the case in which multiple Mages (or the 🧙) have the same number of Trophies obtained, those Mages gain the indicated amount of ⚡ reduced by 1. In the case of 1 ⚡ or less this amount is not reduced."

NIGHTMARE, REFERENCE CARD

- E. The Nightmare School reference card does not say how a Nightmare assigned to a Mage behaves when that Mage moves (or places themselves) in a Room.
- F. The following text must be added to the bottom of the Nightmare School reference card:
"A Nightmare assigned to a Mage is considered an Evocation that is in the same Room as that Mage. Whenever a Mage moves (or places themselves) in a Room all Nightmares assigned to that Mage move (or place themselves) in that same Room. The Nightmare's miniature remains attached to the Mage's miniature."

END OF THE GAME, TROPHIES (page 32)

- E. The sentence regarding the case of a tie in terms of number of Trophies obtained is not correct, because the tied Mages should always gain at least 1 ⚡.
- F. The correct version is:
"Tie: in the case in which multiple Mages (or the 🧙) have the same number of Trophies obtained, those Mages gain the indicated amount of ⚡ reduced by 1. In the case of 1 ⚡ or less this amount is not reduced."

DEFEAT, TROPHY (page 32)

- E. In the Defeat of Mage paragraph in step 5, it is stated that the Trophy Token is gained by the Mage who inflicted the last Damage, but this rule needs to be updated.
- F. Replace Step 5 with the following:
"The Mage (or the Black Rose) who inflicted the Damage that caused the Mage to be defeated (or who resolved the Effect that automatically defeated the Mage) gains 1 Trophy Token of the defeated Mage.
Gaining Trophy Tokens is important, because these grant additional Power Points at the end of the game."

POSSESSED, COMMAND CARD

- E. The Command Card of the Third Moon of the Possessed "Dark Blade (25/30)" indicates in its Priority 🎴 Effect that it identifies a Room, but the target of the Spell Card is a Mage.
- F. It must be Priority 1 🎴.

JINX, HEX SCHOOL

- E. The Hex School Reference Card does not indicate at what specific time a Jinx can be discarded.
Replace the sentence "In order to discard a Jinx assigned to them, a Mage needs to perform the specific Task required by the Jinx"
- F. "Whenever a Mage fulfills the Task requirement of a Jinx assigned to them, they place a  on the leftmost Slot of that Jinx Card. When a Mage has placed a  on each Cube Slot of a Jinx they assigned to them, they discard that Jinx."

SPELL (FORGOTTEN) - CURSED BOND

- E. The Dark Side Effect allows you to gain Power Points when the Target gains Power Points due to the Effect of a Quest or Event. The Effect must be corrected, otherwise it only allows Power Points to be gained from a Quest when the Effect of that Quest allows Power Points to be gained.
- F. Replace with:
"☀: Each time the target gains  for solving a Quest or Event Effect, you gain the same amount of . Each time the target places , place the same amount of  in a .

SPELL (SHAMANIC) - ASTRAL PATH

- E. The light side effect indicates "Complete the chosen Quest".
- F. The correct version is "Solve the Chosen Quest"

DEADLY MASK

ERRATA

E: Error — F: Fix

PREPARATION FOR 5 OR 6 PLAYERS

- E. The Lodge's layout for 5 and 6 players is wrong.
- F. The following layout is correct:

SEFU'S PERSONAL SPELL - MASK OF THE WORLD.

- E. This card has been updated for better balance..
- F. On the Light Side, the Persistent Effect now allows you to draw 1 Quest or gain 1 Power Point.

SEAL OF FIRE

FREQUENTLY ASKED QUESTIONS

Q: Questions — A: Answers

FAMILIARS, UPGRADE

Q. Is it possible to assign an Upgrade to a Familiar?

A. According to the Rules, the Familiar is a special type of Evocation, so it is possible to assign an Upgrade to a Familiar. However, when the Familiar is in a Guard Position, it is not considered a Model in the Lodge so it cannot be targeted.

ROTAS: MADNESS

ERRATA

E: Error — F: Fix

RUBEDO, COMMAND CARDS.

- E.** Some Avatar Rubedo Command Cards show the Protection symbol on the back, but indicate a Trap Effect on the front.
- F.** This is an error, all Rubedo Trap Effects should be considered as Protection Effects.

NOCTURNUS, FORGOTTEN EVOCATION

- E.** The Nocturnus Forgotten Evocation has been updated for better balance.
- F.** Evocation Effect:
"Other non-Nightmare Evocations cannot activate. Nocturnus has +1 for every other Nightmare in the Lodge."

FREQUENTLY ASKED QUESTIONS

Q: Questions — A: Answers

CHAOS SCHOOL

- Q.** If the optional Instinctive Spell rule is used in a game, am I obliged to place a Spell in the Quick Spell slot if I have already exhausted my Physical Actions and if I have cast the remaining 3 Spells?
- A.** No, you don't have to. If a Mage has already exhausted their 2 Physical Actions and has already cast/activated the remaining 3 Spells placed in the other slots of their Mage Sheet, they can choose to either place a Spell in the Quick Spell slot or not perform any more Activations in the current Action Phase.

ROTAS: ANTIQUITIES

ERRATA

E: Error — F: Fix

ORACLE, TAROT CARD

- E. In the paragraph about the Prophecy keyword, the last sentence says to shuffle non-Instant cards into the deck, but this is wrong.
- F. Replace the last sentence of the Prophecy paragraph with the following: "Shuffle the revealed Instant cards into the current Moon's Event deck."

ROTAS: ONCE UPON A TIME

FREQUENTLY ASKED QUESTIONS

Q: Questions — A: Answers

HASTUR AVATAR, SANA N

- Q. Is the Damage inflicted by the Black Rose equal to the Cubes remaining on Hastur's Avatar Card after the Mend Effect, or equal to the N value minus the number of Cubes actually recovered?
- A. When a Mage is targeted by this Effect, if the number of Cubes on Hastur's Avatar Card is less than N, the Avatar inflicts Damage to that Mage equal to the number of Cubes recovered through this Effect.

VENTICELLO PERSONAL SPELL

- Q. The "The Eight Spells" Spell of the Mage Venticello allows you to draw 1 Quest of the current Moon, even if it is not indicated which Moon, or you can choose the Moon?
- A. The Mage who resolves that Spell draws 1 Quest of the current Moon.

ERRATA

E: Error — F: Fix

CHAIN QUESTS

- E. It is written that Chain Quests are resolved from left to right. This is not correct, the Mage chooses the order of resolution if they have more than 1 Effect to resolve.
- F. The first sentence in the Solving a Completed Chain Quest paragraph must be replaced with the following text: "When at least one Chain Quest is Completed, wait until the current Effect is fully resolved, then proceed as follows:"
The third point of the Chain Quest Resolution must be replaced with the following text:
"In Play Order, each Mage who has placed at least one of their  on a Chain Quest Card applies the Effect shown on the Reward Side of that card. If a Mage has placed cubes on multiple Chain Effects they choose in which order to resolve the Effects".

BELLA, PERSONAL SPELL

- E. Mage Bella's Personal Spell Card "Elemental Spirits" has an error in the Dark Side Effect.
- F. The Dark Side Effect of the card must be replaced with the following:
Target: "
Effect: ": Each time you inflict  on a target with an  Spell Effect, inflict 1 additional  on the target."

GAEA REBORN

FREQUENTLY ASKED QUESTIONS

Q: Questions — A: Answers

AVATAR GAEA

- Q. Does Gaea's Avatar Effect only apply to one single Room where a Root is located or to all Rooms where 1 Root is located?
- A. The effect applies in each Room in which there is at least 1 Instability and 1 Root.

NORTH WINDS

FREQUENTLY ASKED QUESTIONS

Q: Questions — A: Answers

DRUIDIC SCHOOL

- D. Some Spells of the Druidic School allow you to transform into Bjorn or Loki. When I cast a Spell of this type, can the new Physical Action described at the bottom of the card be performed as part of my Action after I have transformed? Or does my Action end after I have transformed into Bjorn or Loki?
- R. After the Mage has resolved an Effect that transform themselves into Bjorn or Loki their Action ends. If this was their second Action their Activation ends, otherwise they can perform a second Action. As long as a card of this type is near to the Mage Sheet the Mage gains a new option to use the Physical Action Token.

DRUIDIC SCHOOL, TRANSFORMATION

- D. In the first BRW when my Mage is transformed (for example into Abomination) they are considered both a Mage and an Evocation, does this also happen with the Druidic School when my Mage is transformed into Loki or Bjorn?
- R. No, a Transformation is not an Evocation. Although it uses the same word the Druidic School transformation is a separate and distinct rule from the transformation found in some BRW Schools, such as the transformation to Abomination. In fact, the transformation used in the Druidic School does not use any Evocation Card.

DRUIDIC SCHOOL SPELL, PACT OF THE CLAW

- D. The Effect of this card provides the new Charge Physical Action if transformed into Bjorn. Must the effects "Move 1. Move 1. Physical Attack." be performed in order from top to bottom, or can they be performed in any order?
- R. If a Physical Action has multiple Effects, these can be resolved in any order. The different Effects are written in bullet point form. The Charge Physical Action consists of a single Effect, so the instructions indicated must be resolved in order from top to bottom.

ERRATA

E: Error — F: Fix

DRUIDIC SCHOOL

- E. The Druidic School Reference Card has been updated for better balance.
- F. A printable version of this card can be found in the "Printed Material P&P ENG" Document. The North Wind rulebook has been updated with the Transformation rule.

ROTAS: LAST DYNASTY

ERRATA

E: Error — F: Fix

HEKA SCHOOL, REFERENCE CARD.

- E. The Heka School Reference Card indicates that a Jinx can be removed, but the correct term is "discarded". Replace the sentence: "When all the slots on the Jinx Card are occupied by a , it is removed."
- F. "Inflict 3 . Inflict 2  to a different 2 from yourself. Inflict 1  to another different 3 from yourself."

DREAD FORGE

ERRATA

E: Error — F: Fix

SPELL CHAIN LIGHTING, FORGE SCHOOL.

- E. The last phrase on the dark side Effect says: "Inflict 2  to a 3." but it is wrong.
- F. "Inflict 3 . Inflict 2  to a different 2 from yourself. Inflict 1  to another different 3 from yourself."

SUMMON AN EQUIPMENT

- E. The Reference Cards of the Schools that summon Equipments (War and Forge) are missing a sentence that specifies which Effects can summon an Equipment.
- F. Insert this point into the Equipment Evocation rules: "An Equipment can only be summoned by an Effect with target . In fact, you cannot summon an Equipment when resolving an Effect that summons any evocation if the target of that Effect is a Room."

APOCALYPSE

FREQUENTLY ASKED QUESTIONS

D: Domande — R: Risposte

DESTINY TOKEN AND INFECTIO TOKEN

- Q. Are Destiny or Infectio Tokens resolved even if the Mage they are assigned to is placed in their Cell?
- A. Yes, they are resolved even if the Mage is placed in their Cell.

DESTINY TOKEN AND INFECTIO TOKEN

- Q. Some Effects are resolved at step 2 of the Cleanup Phase. In what order are they resolved if more than one such Effects are resolved in the same phase?
- A. At step 2 of the Cleanup Phase, Effects are resolved in Play Order. If a Mage has more than one Effect to resolve, they choose in which order to resolve the Effects. All Infectio Tokens from the same Mage assigned to multiple targets are considered resolved at the same time. All Destiny Tokens from the same Mage assigned to multiple targets are considered resolved at the same time. The Mage chooses in which order to resolve the different types of tokens.

HORDE FEAT

- Q. The Collective Sacrifice Quest (Third Moon) requires you to Heal Damage to Evocations. Is the Horde Talent valid for the purpose of this Quest Task? How many times is the Task fulfilled?
- A. The Quest Task is considered fulfilled once when in the Cleanup Phase the Mage heals all Damage on one or more of their own Evocations.

HEAL INFECTIO OR DESTINY

- Q. Is it possible to Heal an Infectio Token or a Destiny Token?
- A. Unless otherwise specified, "Heal" applies only to Damage, so it is not possible to Heal an Infectio or Destiny Token.

FIELD MANEUVRER SPELL

- Q. The Field Maneuvers Spell from the War School indicates removing 1 Event. In this case should it be read as synonymous as discard 1 Event? Does the  gain  from this removed/discarded Event?
- A. In this case the word remove should be understood as a synonym for discard. The Black Rose does not gain  for an Event discarded in this way.

TROPHY BELT, EQUIPMENT

- Q. I have the Trophy Belt Equipment and I activate the Rebuilt Abyss Room which places all 4 Mages in play in their Cell.
How many Trophies are placed on the belt?
Does the Gain 3  phrase only apply when I discard the Trophies?
- A. In this case it is considered that the Mages are placed in the Cell at the same time, so only 1 Trophy is placed on the Trophy Belt.
The phrase Gain 3  applies only when discarding Trophies.

TROPHY BELT, EQUIPMENT

- Q. If my Mage is placed in the Cell, when another Mage is placed in the Cell should I place 1 Trophy on the Trophy Belt?
- A. Yes.

PESTIS ACTIVATION

- Q. In the Evocations Phase, how do I keep track of which Pestis I have already activated? Do they activate one at a time or all at once?
- A. The Mage chooses in what order to activate each of their Evocations, including Pestis. There is no specific game component to mark which Pestis has already activated and which have not yet, however it is useful to remember that when a Pestis performs a Physical Attack it is removed. It is possible to use an unused Token (such as a Trophy or Trap) and place it next to the Pestis that has activated; remove this Token during Step 1 of the next Cleanup Phase.

FAMINE SCHOOL, STARVE

- Q. The keyword "Starve" indicates to place the target Mage's Cubes on the Event Board. What happens if an Effect of this type targets an Avatar? Are the Black Cubes that are on the Event Board from the beginning of the game and the Black Cubes that are placed here by this Effect considered to be the same pool?
- A. An Avatar must be treated as if it were a Mage controlled by a player. In this case, the two pools of Black Cubes must be treated as two separate pools.

INFECTIO / DESTINY TOKENS

- Q. When a Mage resolves more than 1 Infectio Token assigned to another Mage, is each damage inflicted considered a separate effect, or are all Infectio Tokens considered a single effect? Does the same apply to Destiny Tokens?
- A. A Mage who resolves one or more Infectio/Destiny Tokens on one or more Mages is considered a single Effect, consisting of a single sentence, which targets those Mages. Yes, the rule applies in the same way to Destiny Tokens.

ERRATA

E: Error — F: Fix

PERSONAL LIBRARY

- E. The section Creating a Personal Library has been updated in case a Spell Card has 2 different symbols on Light Side and Dark Side.
- F. Add the following point to the list:
 - In case a Spell Card shows 2 different symbols on the Light Side and Dark Side, both symbols of that card must be accounted for.

DEATH SCHOOL

- E. The Death School Reference Card has been updated for better balance.
- F. A printable version of this card can be found in the "Printed Material P&P ENG" Document

MAGISTER BOX

FAMILIAR ERACLETO (page 8)

- E. The sentence in the Familiar Setup is wrong:
'Place the Familiar Room instead of a Lodge Room that is of the same color, chosen by mutual agreement between the players. Place all other Familiar materials to form a reserve accessible to all players.'
- F. Replace with the correct text:
"Place all Familiar materials next to the board of the player who chose the Agorix Mage."

REMOVE EVOCATION (page 5)

- E. In the Compatibility Compendium between BRW and Rebirth, the rule regarding Spell Cards that remove Evocations must be included.
- F. Use the following new rules.

"Some game Effects allow you to remove an Evocation from the Lodge. When a Mage (or ) resolves one of these Effects they must comply with these points:

 - A non-Forgotten Spell cannot remove another Mage's Forgotten Evocation.
 - A non-Forgotten Spell cannot remove another Mage's Evocation with a Health value greater than 3. Note that some Effects may change the Health value of an Evocation from that printed on the Evocation Card.
 - An Effect that removes your own Evocation allows the Mage to ignore the previous points; therefore you can remove your Evocation with any Health value even if it is a Forgotten Evocation.
 - A Forgotten Spell that removes an Evocation ignores the previous points; therefore you can remove one of your own (or another Mage's) Evocation with any Health value even if it is a Forgotten Evocation.
