Game Components

1 MAGE CARD

Etna can be chosen as a Mage during **Step** 8 of the Setup described in the core game rulebook. The player who uses Etna as a Mage must choose the color red.

3 PERSONAL SPELL CARDS

1 SCHOOL REFERENCE CARD

During **Step** 9 of the Setup, it is possible to replace one of the Schools of Magic present in the core game with the School of Forge.

36 FORGE SPELL CARDS

1 FORGOTTEN SPELL CARD

Add this card to the Forgotten Spell Cards Deck of the core game.

1 FORGOTTEN EVOCATION CARD

Add this card to the Evocation Cards deck of the core game.

15 EQUIPMENT EVOCATION CARDS

Add these cards to the Evocation Cards Deck of the core game.

15 UPGRADE CARDS

Add these cards to the Upgrades Deck of the core game.

5 EVOCATION CARDS

Add these cards to the Evocation Cards Deck of the core game.

Avatar Components

5 Pupa

1 Large Mage Base

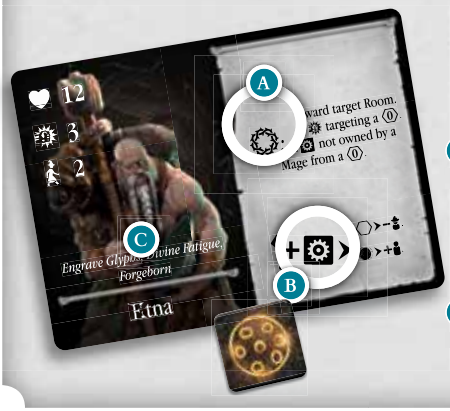

1 Large Avatar Base

Avatar

Etna is the right-hand man of Vesuvio, the king of the cyclopes. Appointed as the Great Blacksmith of the Forge by his lord, he now lives by devoting himself to the creation of magnificent tools. Etna has found in Magma a faithful servant who, as such, follows him in all his endeavors.
Vesuvio has given Etna the task of becoming Grand Magister of the Lodge. He also wants to control the magical aspects that whisper to the world, giving more power to his people.

Avatar Card Anatomy

A **Avatar Effect**: The Effect indicated by the symbol on the Avatar Card must be resolved whenever the Effect of a Command Card shows the symbol.

B **Avatar Tool**:
The Avatar uses a Tool, which is indicated in the Effects with the symbol. Etna's Tool is the Glyph Token.

C **Avatar Skills**:
Etna has the Avatar Skills explained in detail on page 10.

Etna Setup

When used as an Avatar, Etna cannot be chosen as a Mage during **Step** 8 of the Setup. Apply the following steps during **Step** 3 of the Avatar Setup:

- Place the *Forge* Room so that it is adjacent to the *Black Rose Room*.
- Clip the Large Avatar Base to the **Etna** Model.
- Place the **Etna** Model in the *Forge* Room.
- Clip the Avatar's Large Evocation Base to the **Magma** Model.
- Place the **Magma** Model in the *Black Rose Room*.
- Place the **Magma** Evocation Card on the Slot of the Avatar Board.
- Place a Glyph Token in each Room adjacent to the *Black Rose Room*.
- Remove the **Lava Flow** card from the Forgotten Spells deck.

Avatar Special Rules — Etna

Active Glyph Token *Exhausted Glyph Token*

GLYPH TOKENS

The Glyph Tokens in the Lodge can be collected by Mages to exploit their devastating energy.
During the game, **Etna** will try to collect and engrave Glyphs to enhance his Evocation, Magma.

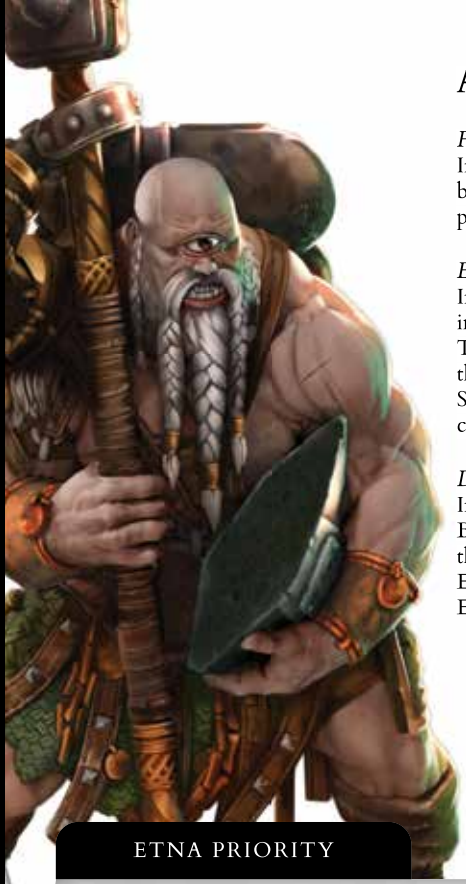

Glyph Tokens follow these rules:

- **Collect:** when a Mage activates a Room in which there is at least one Glyph Token, if that Mage is in that Room, they **obtain** a Glyph Token from that Room (and not from a Mage Card) and place it on their Mage Card (Avatar Card for Etna) showing its Active side (see image). A Glyph Token that is on a Mage Card is considered to be in the same Room as that Mage.
- **Defeat:** when a Mage (including Etna) defeats another Mage who has at least one Glyph Token on their Mage Card (Avatar Card for Etna), they **must** take **one** of those tokens and place it on their Mage Card (Avatar Card for Etna) while keeping the side currently visible (Active or Exhausted, see image). If the defeated Mage still has Glyph Tokens on their Mage Card, they must be placed in the Room in which they were defeated.
- **Attack:** a Mage who possesses at least one Active Glyph Token on their Mage Card can use the **Mystic Strike** Physical Action (see box).
- **Clean-up Phase:** during Step 2 of the Clean-up Phase, starting with the player who has the Crown and proceeding clockwise, each Mage places all the Glyph Tokens they have in the Room in which they are. The Mage gains 2 for each Glyph Token placed this way.

Mystic Strike (Physical Action,)

- Exhaust all Active Glyph Tokens on your Mage Card and perform a Physical Attack () on a 0; you have +1 for each Glyph Token you just Exhausted.
- **Move** your Mage up to 1.

Avatar Skills — Etna

Forgeborn
If Etna begins his activation in his Cell, before revealing the Command Card, he places himself in the *Forge* Room.

Engrave Glyphs
If at the end of his own activation Etna is in the same Room as Magma, all Glyph Tokens on his Mage Card must be placed on the Event Board, in the Black Rose Trophy Slot. These Glyph Tokens are no longer considered to be in the Lodge.

Divine Fatigue
If there are **six** Glyph Tokens on the Event Board, the immediately wins the game. If this does not happen, at the end of the game Etna gains **1** for each Glyph Token on the Event Board.

ETNA PRIORITY

1 : + > − > −
Etna chooses as a target:
+: the Room with the most , if tied...
−: the closest Room, if tied...
−: the Room with the least , if tied, the Choice of the Crown applies.

2 : + > + > +
Etna chooses as a target:
+: the Room with the most , if tied...
+: the Room with the most , if tied...
+: the Room with the most , if tied, the Choice of the Crown applies.

Servant — Magma

A Servant is an Evocation that has a special bond with the Avatar.

Magma is the Servant of **Etna** and is represented in the Lodge by the corresponding Model and its Servant Evocation Card. The Servant Evocation Card is never discarded from the ♦ Slot of the Avatar Board, even if Magma is defeated or removed.

SPECIAL RULES

Priority

Magma follows the Priority on its Servant Evocation Card (also see box) to choose a target, move closer to it and attack it.

Comeback

If Magma has to activate when its Model is not in the Lodge (it was previously defeated or removed), Magma does not activate, and the places its Model in the *Black Rose Room*.

MAGMA PRIORITY

:+>+>+

Magma chooses as a target:

+ The Mage that has the most , if tied...

+ The Mage with the most , if tied...

+ The Mage with the most ♥, if tied, the Choice of the Crown applies.

If Magma cannot reach its target, it moves as close to it as possible.

If there are no Mages in the Lodge when Magma activates, it does not move and ends its activation.

Legendary Scenario: Catastrophe

A Legendary Scenario is a special game that allows you to play an event from the world of *Black Rose Wars: Rebirth* by applying a specific set of new rules and using Legendary Scenario Cards dedicated to it.
In *Catastrophe*, the Mages will have to stop the cyclops blacksmith Etna who, by infusing power glyphs into his golem Magma, wants to conquer the Black Rose.

Additional Setup

Apply the following during the regular Game Setup:

- **Steps 1 and 2:** instead of what is indicated in these points, arrange the Rooms and Cells as shown in the image in relation to the number of players participating in the game. The Room adjacent to the *Black Rose Room* must be the *Forge* Room.
- **Before step 4:** Turn the *Forge*, *Garden* and *Treasure* Rooms so as to show the Rebuilt side. Place the corresponding Room Activation Tokens on these Rooms.

Once the Setup is complete:

1. Place the Second Moon Cube on Slot 7, the Third Moon Cube on Slot 19, and the Black Rose Cube on Slot 32 of the Power Board.
2. Follow the steps of Etna's Avatar Setup.
3. Place the Legendary Scenario Card *Catastrophe* of the relevant Moon Phase on top of each of the three Event decks. These cards will be the first Event to be resolved in each of the Moon Phases.

Scenario Rules

The following rules apply while playing this Legendary Scenario:

- **Unquenchable Forge:** when the *Forge* Room is activated, its Room Activation Token is not turned to the Exhausted side.
- **Magmatic Passages:** a Mage who would exit a Room with a "Move 1." Effect of a Physical Action, may instead give up that Effect and place itself in another Room.

Honorable Mention

At the end of the game, the Mage with the most of the gains **3**; if tied, no Mage gains these .

SIX PLAYERS

Large Models and Area Effects

A Large Model is considered to be targeted by an Attack with the Area Trait if at least one of the Squares it occupies is within the Area of the Attack. If a Large Model is the target of an Attack with the Area Trait, it suffers only the Effect intended for the target, even if it occupies multiple Squares within the Area. If a Large Model is not the target of an Attack with the Area Trait and occupies more than one Square within the Area, it suffers the additional Effect only once.

Large Models and Line of Sight

A Large Model always has a valid Line of Sight on all other Models and vice versa

How to use this Expansion

This expansion adds a new Hunt Mission to be included in any Nova Aetas Renaissance Campaign of the Core Game or any Expansion.
If you decide to use Gaea in your Campaign, add the Event Card found in this box to the Core Game Event Card Deck.
Gaea is a Hunt Mission and follows all the rules for this type of Mission, described in the core Rulebook of Nova Aetas Renaissance.

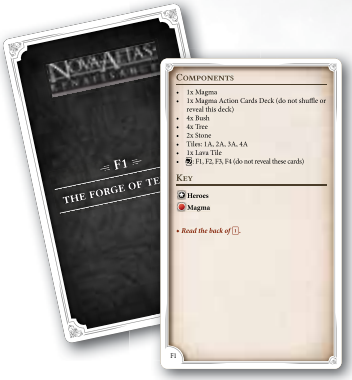

Bounty

Instead of waiting to draw the Event Card "The Hill that does not Sleep," at any point in the Main Campaign you can mark the title of this Side Mission in the Active Side Mission Slot and play it as if you had drawn the Event Card "The Hill that does not Sleep."

Large Models

Some Models occupy more than a single Battlefield Square. These Models are called Large Models. These Models occupy only a single Square during movement. In other words, while moving, a Large Model is considered as a normal Model, and then returns to occupying more Squares the moment the movement ends. When players need to determine the movement of a Large Model, they choose any of the Squares occupied by the Model and count starting from the chosen Square (a normal-sized Model can be used to simulate the movement of the Large Model). When the Large Model finishes its movement, the players place the Model so that the Squares occupied include the Square where it finished its movement. If placement is not possible because the required Squares (usually 4) are not all available, players refer to the following rules:

- If there are Models occupying the Squares, the Large Model pushes the Models occupying them into adjacent available Squares or the nearest available Square.
- If there are Scenic Elements occupying Squares, place the Large Model in Squares that are available or occupied by other Models. If this is not possible, the Large Model ends its Movement in a Square that allows its placement.
