WHAT IS IT?

Printing Guide offers tips on how to make your own *Sator Rebirth* game components look and feel like those from the official *Black Rose Wars* box. The method presented here is just one of many ways to achieve a semi-professional finish and should be treated as a suggestion rather than a strict set of rules.

The examples in this guide assume that you are printing the complete set of cards for *Sator Rebirth*, but the methods can be adapted for smaller quantities of game components or other projects.

Standard Cards

This chapter provides guidelines for printing standard-sized cards (63 × 88 mm), including Spell Cards and Familiar Cards.

Resources

Spell Cards files are located in "Spells" subfolders within each School of Magic, "Personal" and "Forgotten" folders. Additionally, each folder contains a "Spell – back" file, which is used for the backs of the Spell Cards.

Familiar Cards files are located in a "Familiars" folder.

Printing Specifications

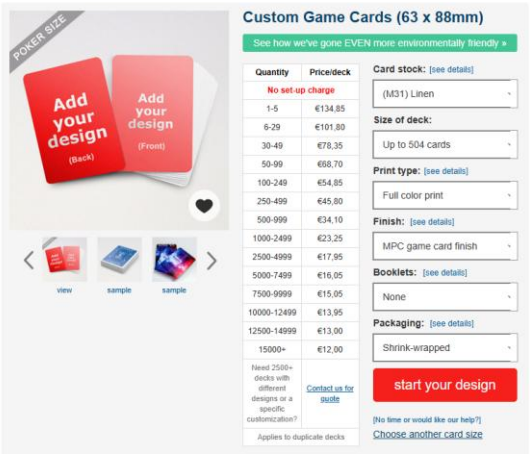

To get started, follow these steps:

- Go to „https://www.makeplayingcards.com".
- Select „Custom game cards" section.
- Select "Custom Game Cards (63 x 88mm)" card size option.

In the Card Specification menu, change the following settings:

- Card stock: „(M31) Linen"
- Size of deck: „Up to 504 cards"
- Print type: "Full color print"
- Finish: "MPC game card finish"
- Booklets: "None"
- Packaging: "Shrink-wrapped"

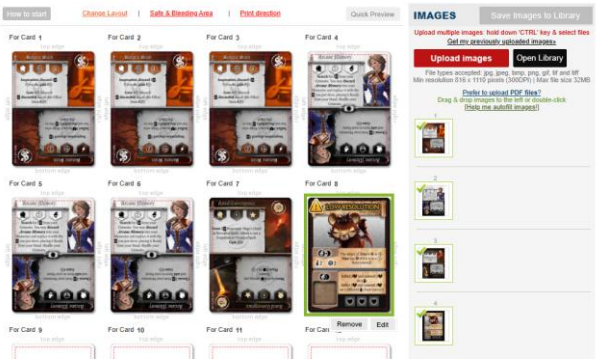

Once these settings are configured, click the "start your design" button to begin designing your cards.

Card Design

Once inside the design project follow these steps:

- In Step 1 set the number of cards to 460.
- In Step 2 select "Different images" option.
- For each School of Magic, add **exactly 3 copies** of each Spell Card front image, for a total of **396** cards.
- For each Personal Spell, add **exactly 3 copies** of each Spell Card front image, for a total of **54** cards.
- For each Forgotten Spell, add **exactly 1 copy** of each Spell Card front image, for a total of **9** cards.
- For Familiar Card, add **exactly 1 copy** of "Nina – front" image. It is recommended that you place this file at the **very end** of your design project.

After uploading all the files and confirming their placement, click the "Next Step" button in the upper-right corner of the page.

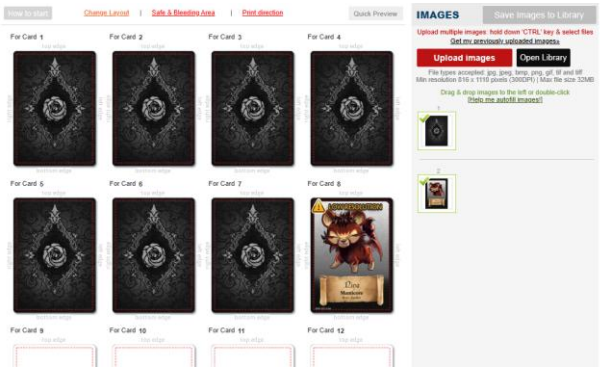

You should skip the "Add Text To Front" step by pressing the "Next Step" button in the upper-right corner of the page.

On the next page follow these steps:

- Don't change anything in Step 3.
- In Step 4 select "Different images" option.
- On each Spell Card position add "Spell – back" image, for a total of **459** cards.
- On Familiar Card position add "Nina - back" image.

After uploading all the files and confirming their placement, click the "Next Step" button in the upper-right corner of the page.

You should skip the "Add Text To Back" step by pressing the "Next Step" button in the upper-right corner of the page.

Finally, verify that each card has the correct matching front and back images. Once you have confirmed that all pairs are correct, scroll to the bottom of the page and click "Add to Cart" button.

Small Cards

This chapter provides guidelines for printing small-sized cards (44 × 67 mm), including Evocation Cards and Time Stability Cards.

Resources

Evocation Cards files are located in “Evocations” subfolders within each School of Magic, “Personal” and “Forgotten” folders. Additionally, each folder contains a text file named “Number of evocations”, which specifies how many copies of each card must be printed.

Time Stability Cards files are located in “Time Stability” subfolder within the “Chronomancy” folder. It contains a text file named “Number of Time Stability cards – Chronomancy”, which specifies how many copies of this card must be printed.

Printing Specifications

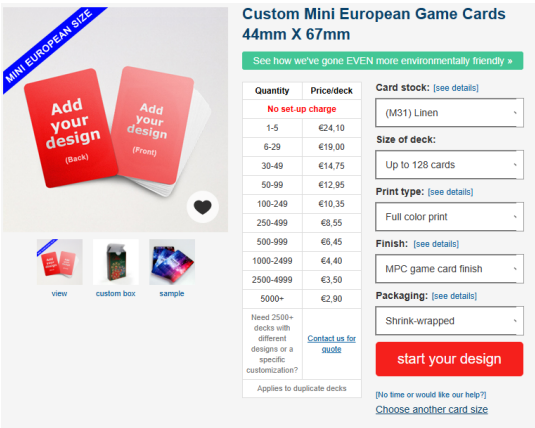

To get started, follow these steps:

- Go to „https://www.makeplayingcards.com”.
- Select „Custom game cards” section.
- Select “Custom Mini European Game Cards 44mm X 67mm” card size option.

In the Card Specification menu, change the following settings:

- Card stock: „(M31) Linen”
- Size of deck: „Up to 128 cards”
- Print type: "Full color print"
- Finish: "MPC game card finish"
- Packaging: "Shrink-wrapped"

Once these settings are configured, click the “start your design” button to begin designing your cards.

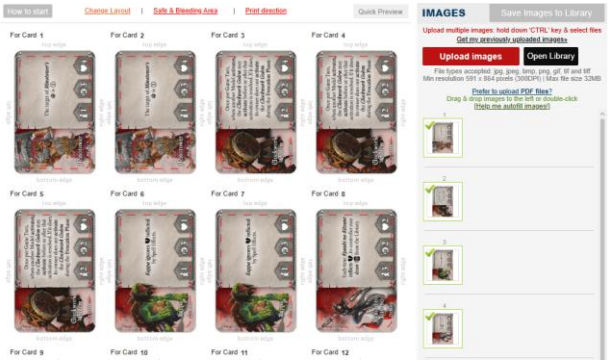

Card Design

Once inside the design project follow these steps:

- In Step 1 set the number of cards to 96.
- In Step 2 select “Different images” option.
- For each School of Magic, add the number of copies of each Evocation Card **front** image, specified in the corresponding “Number of evocations” text file, for a total of **90** cards.
- For Time Stability Cards, add **exactly 6 copies** of “Time Stability - front” image.

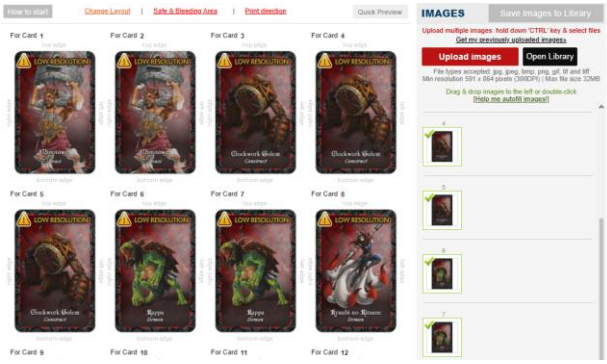

After uploading all the files and confirming their placement, click the “Next Step” button in the upper-right corner of the page.

You should skip the “Add Text To Front” step by pressing the “Next Step” button in the upper-right corner of the page.

On the next page follow these steps:

- Don't change anything in Step 3.
- In Step 4 select "Different images" option.
- For each School of Magic, add the number of copies of each Evocation Card **back** image, specified in the corresponding "Number of evocations" text file, for a total of **90** cards.
- For Time Stability Cards, add **exactly 6 copies** of "Time Stability - back" image.

After uploading all the files and confirming their placement, click the "Next Step" button in the upper-right corner of the page.

You should skip the "Add Text To Back" step by pressing the "Next Step" button in the upper-right corner of the page.

Finally, verify that each card has the correct matching front and back images. Once you have confirmed that all pairs are correct, scroll to the bottom of the page and click "Add to Cart" button.

Mage Cards

This chapter provides guidelines for printing Mage Cards (89 × 146 mm).

Resources

Mage Cards files are located in “Mage cards” subfolder within the “Personal” folder. Additionally, this folder contains the “Mage card - back” file, which is used for the backs of the Mage Cards.

Printing Specifications

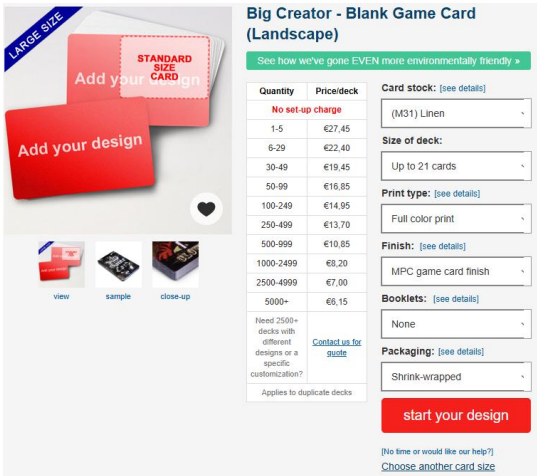

To get started, follow these steps:

- Go to „https://www.makeplayingcards.com”.
- Select „Big cards” section.
- Select “Big Creator - Blank Game Card (Landscape)” card size option.

In the Card Specification menu, change the following settings:

- Card stock: „(M31) Linen”
- Size of deck: „Up to 21 cards”
- Print type: "Full color print"
- Finish: "MPC game card finish"
- Booklets: “None”
- Packaging: "Shrink-wrapped"

Once these settings are configured, click the “start your design” button to begin designing your cards.

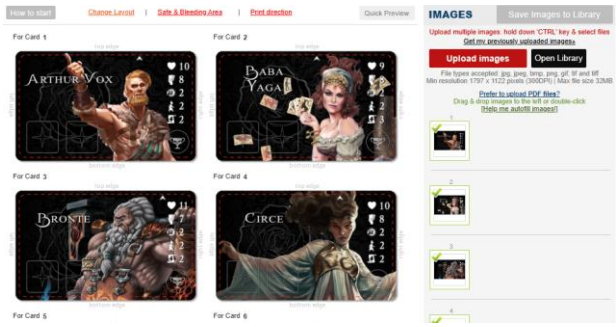

Card Design

Once inside the design project follow these steps:

- In Step 1 set the number of cards to 18.
- In Step 2 select “Different images” option.
- Add **exactly 1 copy** of each Mage Card image, for a total of **18** cards.

After uploading all the files and confirming their placement, click the “Next Step” button in the upper-right corner of the page.

You should skip the “Add Text To Front” step by pressing the “Next Step” button in the upper-right corner of the page.

On the next page follow these steps:

- Don't change anything in Step 3.
- In Step 4 select "Same image" option.
- Add the "Mage card - back" image.

After uploading the file, click the "Next Step" button in the upper-right corner of the page.

You should skip the "Add Text To Back" step by pressing the "Next Step" button in the upper-right corner of the page.

Finally, verify that each card has the correct matching front and back images. Once you have confirmed that all pairs are correct, scroll to the bottom of the page and click "Add to Cart" button.

School Reference Cards

This chapter provides guidelines for printing School Reference Cards (70 × 120 mm).

Resources

School Reference Cards files are located in “Library” subfolders within each School of Magic folder.

Printing Specifications

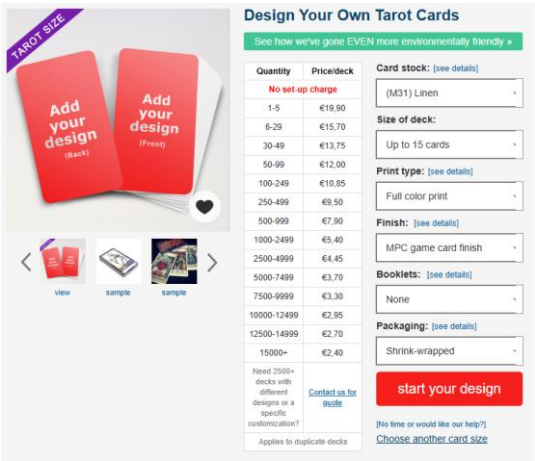

To get started, follow these steps:

- Go to „https://www.makeplayingcards.com”.
- Select „Custom game cards” section.
- Select “Design Your Own Tarot Cards” card size option.

In the Card Specification menu, change the following settings:

- Card stock: „(M31) Linen”
- Size of deck: „Up to 128 cards”
- Print type: "Full color print"
- Finish: "MPC game card finish"
- Booklets: “None”
- Packaging: "Shrink-wrapped"

Once these settings are configured, click the “start your design” button to begin designing your cards.

Card Design

Once inside the design project follow these steps:

- In Step 1 set the number of cards to 11.
- In Step 2 select “Different images” option.
- For each School of Magic, add **exactly 1 copy** of each School Reference card **front** image, for a total of **11** cards.

After uploading all the files and confirming their placement, click the “Next Step” button in the upper-right corner of the page.

You should skip the “Add Text To Front” step by pressing the “Next Step” button in the upper-right corner of the page.

On the next page follow these steps:

- Don't change anything in Step 3.
- In Step 4 select "Different images" option.
- For each School of Magic, add **exactly 1 copy** of each School Reference card **back** image, for a total of **11** cards.

After uploading all the files and confirming their placement, click the "Next Step" button in the upper-right corner of the page.

You should skip the "Add Text To Back" step by pressing the "Next Step" button in the upper-right corner of the page.

Finally, verify that each card has the correct matching front and back images. Once you have confirmed that all pairs are correct, scroll to the bottom of the page and click "Add to Cart" button.

Your cards are now ready to order.

Element Tokens

This chapter provides guidelines for printing and assembling Element Tokens.

Resources

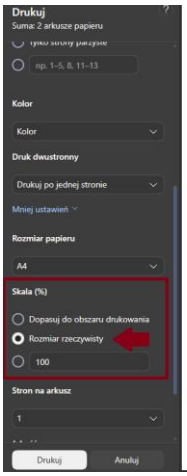

Element Tokens files are located in "Tokens" subfolder within the "Elementalism" folder. Additionally, this folder contains the "Synergy tokens - print" .pdf file, which is formatted for printing the tokens on any home printer.

Printing Specifications

To prepare the tokens you will have to prepare:

- **18** copies of "Synergy – Earth" image.
- **18** copies of "Synergy – Fire" image.
- **18** copies of "Synergy – Water" image.
- **18** copies of "Synergy – Wind" image.

You can print these tokens using the "Synergy tokens - print" file. Select "Actual size" under "Scale (%)" in the printer settings.

Tokens Assembly

Assemble the Element Tokens so that each token has a different symbol on each side. There should be **18 red tokens** and **18 blue tokens**, for a total of **36 tokens**.

Red variant: should have a **fire** symbol on the front side and **earth** symbol on the back side.

Blue variant: should have a **water** symbol on the front side and **wind** symbol on the back side.

For extra durability, it is strongly recommended gluing the printed images onto cardboard and placing the tokens inside coin capsules.
