Sator Rebirth

Another whisper, another shard, another journey marked by thorns.

Alessandro still roamed the world, drawn onward by the Voice of the Black Rose. It led him to the archives of distant lands, the tombs of forgotten masters, and libraries whose doors had remained shut for years. Yet the whisper never led him astray.

Among the crumbling pages lay further accounts, further tales of long-forgotten arts born beneath foreign skies. New perspectives, like shards of a shattered mirror.

He did not know which one the thorns would lead him to next. He knew only that he would follow. As long as the Black Rose spoke, Alessandro would listen. As long as he listened, his journey would never end.

GAME COMPONENTS

This expansion allows you to use components from the previous chapter of *Black Rose Wars* and its stretch goal content in games of *Black Rose Wars: Rebirth*. It requires the models and tokens included in the following products:

- *Black Rose Wars*: *Sator Box*
- *Black Rose Wars*: *Crono Expanison*
- *Dungeonology: Rocca Civetta Stretch Goals Box*

Game Components

396 SPELL CARDS

54 PERSONAL SPELL CARDS

9 FORGOTTEN SPELL CARDS

Add these cards to the Forgotten Spell Deck of the core game.

11 SCHOOL REFERENCE CARDS

18 MAGE CARDS

These Mages can be chosen as your Mage during **step 8 of the Setup** described in the core game rulebook.

90 EVOCATION CARDS

Add these cards to the Evocation Cards Deck of the core game.

6 TIME STABILITY CARDS

A player using Spells of the School of **Chronomancy** must keep one of these cards.

3 ROOM INFESTATIONS TOKENS

These tokens are used by the **Trickery** School of Magic Effects.

36 ELEMENT TOKENS

These tokens are used by the **Elementalism** School of Magic Effects.

12 POISON TOKENS

These tokens are used by the **Blood** School of Magic Effects.

9 QUEST TOKENS

These tokens are used by the **Cartomancy** School of Magic Effects.

Familiars' Components

1 FAMILIAR CARD

1 FAMILIAR ACTION TOKEN

7 EGG CUBES

Basilisk

Bull-O

Crono

Necrodragon

Evocations

The Schools of Magic included in this expansion use Models from *Black Rose Wars*. This chapter introduces rules for using these Models alongside the new components of *Black Rose Wars: Rebirth*.

Rose Pins and Evocation Bases

Black Rose Wars Models have up to three slots on their bases, into which their owner inserts one or more of their **Rose Pins**. These identify the Model's owner and indicate which **Evocation Slot** on their Mage Sheet holds its **Evocation Card**.

In **Black Rose Wars: Rebirth**, Rose Pins have been replaced by **Evocation Bases**, featuring one to three ⧫ symbols. As with the number of **Rose Pins** placed in the base of an Evocation, the number of ⧫ determines which **Evocation Slot** on the Mage Sheet holds its **Evocation Card**.

A Mage cannot own two different Evocation Models that have the same number of pinned Rose Pins and ⧫ on the clipped Evocation Base.

Large Models

In **Black Rose Wars: Rebirth** each Mage has at their disposal a **Large Evocation Base** that features no ⧫ symbol. A Mage can own a maximum of one Evocation with a large base.

Some Evocations from **Black Rose Wars** have bases that can hold only one **Rose Pin**. This means that a Mage can own only one copy of such an Evocation, and it must be treated as an Evocation with a large base.

Even though only one **Rose Pin** is inserted into the Model's base, its Evocation Card can be placed in any **Evocation Slot** on the Mage Sheet, chosen when the Model is summoned.

New Rules

This chapter contains all the rules that are not tied to a specific phase of the game, but that must be followed when the situation requires it.

Transformation

Some Spell Cards allow you to perform a **Transformation** as part of one of their Effects. A Transformation is identified by the Transform keyword followed by the name of the Transformation. When a Mage performs Transform, they follow these steps:

- They replace their Mage's Model with the Model of the indicated Transformation, if available; otherwise, they ignore the Transformation.
- They discard all their **Equipment** Evocations.
- They place the ◎ that transformed them next to their Mage Sheet, rotated as indicated by the Transform Effect**.**

As long as that ◎ remains next to their Mage Sheet, the Mage is considered **Transformed** and the Physical Actions listed on that ◎ are available to that Mage. When it is in that position, that ◎ is considered the ◎ that **Transformed** the Mage.

The Mage discards the ◎ that transformed them when:

- They are **defeated**.
- They are about to perform **Transform.**

When this happens, that Mage is no longer **Transformed** and must replace the Model of their Transformation with the Model of their Mage.

At the Beginning of the Evocations Phase, in play order, a **Transformed** Mage may perform one of the Physical Actions listed on the ◎ that **Transformed** them without exhausting a ✚.

Fading Evocations

Some Evocations have ⧗**N** on their card. When one of these Evocations is summoned, place a **N**❐ from the ❀ on that card. The ♥ value of this Evocation is equal to the number of ❐ from the ❀ on that card and it ignores all 💔.

During Step 1 of the Clean-up Phase remove **1** of these ❐. When the last ❐ is removed, remove this Evocation from the Lodge.

Hashomer

Hashomer is a special Evocation used by the **Blood** School of Magic. Hashomer ignores all 💔, cannot be removed by any Effect, and does not activate 🪤.

SETUP
During **Step 11 of Setup**, place the Hashomer Model in the ◎.

HASHOMER ACTIONS
Some Spells of the **Blood School of Magic** allow you to summon special Evocations with the **Hashomer Action** archetype.

They follow these rules:

- **Hashomer Actions** can be targeted as though they were a ⧗**0** from Hashomer.
- **Hashomer Actions** cannot have **Upgrades** assigned to them.
- **Hashomer Actions** can be activated during the Evocation Phase just like normal Evocations.
- A Mage cannot own more than one **Hashomer Action** with the same name.

Moving Instability

When a Mage or the **Black Rose moves Instability,** they choose and remove **Instability Cubes** from the target Room, up to a maximum of **Instability** equal to those indicated by the Effect that allows you to move.

They then place those **Instability Cubes** on the free Instability Slots furthest to the left in the Room indicated by the Effect. If there are not enough free Slots, the excess cubes are not moved.

The **Black Rose** moves **Instability** starting from the cubes furthest to the right in the Room, while a Mage can freely choose which cubes to move.

Exhausting Physical Actions

When a Mage resolves **Exhaust** keyword, they flip one of their Available **Physical Action Tokens** ( ) onto the Exhausted side.

Nina

Nina is a Familiar, a special Evocation that a Mage can summon as a trusted and powerful ally. Nina has a special bond with the Mage who summoned her, serving them with her powers and protecting them at the same time.

To use Familiars in a *Black Rose Wars* game, follow the rules below.

Manticore Setup

After **Setup** is complete, but before the game begins, the **Crown Holder** prepares **7 Eggs**. They place **1 white ❒ Egg Cube** inside one Egg and **1 black ❒ Egg Cube**. inside each of the others. They then mix the Eggs and choose two Room colors. They place 1 Egg in each of the six Rooms of the chosen colors and the last Egg in the **Black Rose Room**.

Eggs are not considered Models in the Lodge.

Place all remaining Familiar components in a reserve accessible to all players.

Summoning the Manticore

Nina is not summoned from her Room, but through the **Eggs** scattered around the Lodge. When a Mage **activates a Room** containing an Egg, they may open that Egg instead of activating the Room.

If they find a **black ❒ Egg Cube,** they gain 1 Power Point (◉) and remove the Egg from the Lodge.

If they find a **white ❒ Egg Cube,** they summon the Familiar and remove the Egg from the Lodge.

A Familiar can be summoned only if one of its Models is available in the reserve. When a Mage summons a Familiar, they place the Model of that Familiar in the Room they are in, attached to their own Model (Guard Position). They then take the **Familiar Card** and place it in one of their own available **Evocation Slots** and then place the **Familiar Action Token** on the Familiar Action Token Slot, showing the active side.

A Mage can have a maximum of one Familiar among their Evocations.

Familiar's Actions

The Mage who owns a Familiar has access to new Actions, which can be used by flipping the Familiar Action Token on its Exhausted side. These Actions are:

- **Assault**: only if the Familiar is in Guard Position, the Familiar switches to Hunt Position and its Model releases from that of the owning Mage, then the Familiar **activates**.
- **Flanking**: only if the Familiar is in Hunt Position and is in the same Room as the Model of the owning Mage, the Familiar switches to Guard Position (the two Models attach).
- **Concentration**: only if the Familiar is in Guard Position, apply the Effect of the Familiar's Guarding Skill.

Available side

Exhausted side

An Exhausted Familiar Action Token becomes Available again at the end of **step 1 of the next Clean-up Phase**.

Familiar's Positions

A Familiar is always in one Position of the two available; these are:

Guard Position: in this Position the Model of the Familiar and the Model of the owning Mage are **attached** and are considered as **one Model**.

Hunt Position: in this Position the Model of the Familiar and the Model of the owning Mage are **released** and are considered **two separate Models**.

Each Familiar's Position has specific rules.

GUARD POSITION RULES
In this position, these rules apply to the Familiar:

- It is not considered in the Lodge.
- Its Hunting Skill is **not active**.
- It can sustain an amount of 💔 instead of its owning Mage, up to the number of free Health Slots on its Familiar Card. The owning Mage can freely choose how to distribute those 💔.
- The owning Mage can use the **Concentration Action**.
- The owning Mage can use the **Assault Action**.
- When the owning Mage is defeated, if the Familiar doesn't have all its Health Slots occupied by 💔, the Familiar remains in the Room in Hunt Position.

HUNT POSITION RULES
In this position, these rules apply to the Familiar:

- Is considered an Evocation of the owning Mage.
- Its Hunting Skill is **active**.
- If at the end of the Clean-up Phase the Familiar is within a ⟨1⟩ from the owning Mage Model, it can move to a Guard Position **without spending the Familiar Action Token.**

Damage and Defeat of the Manticore

When a Familiar sustains 💔, place that many Cubes on its Health Slots. A Familiar can never sustain more 💔 than its available Health Slots.

When all the Health Slots of a Familiar are occupied by 💔, the Familiar is defeated; remove its Model from the Lodge and put all its materials back into the reserve.

If Nina is defeated, the **Crown Holder** removes all Eggs from the Lodge and repeats the **Manticore Setup** described above.
