Game Components

1 MAGE CARD

Talia can be chosen as a Mage during **Step** 8 of the Setup described in the core game rulebook.

3 PERSONAL SPELL CARDS

1 SCHOOL REFERENCE CARD

During **Step** 9 of the Setup, it is possible to replace one of the Schools of Magic present in the core game with the School of Geomancy.

36 GEOMANCY SPELL CARDS

1 FORGOTTEN EVOCATION CARD

Add this card to the Evocation Card deck of the core game.

1 FORGOTTEN SPELL CARD

Add this card to the Forgotten Spell deck of the core game.

Avatar

Gaea is a powerful primordial creature, venerated by the fauns as a deity.
To enter her sylvan realm is to violate her domain's sanctity and incur her wrath.
The luckiest intruders will be hunted down, captured and executed by her faun servants.
The most unfortunate, on the other hand, will take their last breath suffocated by Gaea's roots.

Avatar Card Anatomy

A Avatar Effect
The Effect indicated by the symbol on the Avatar Card must be resolved whenever the Effect of a Command Card shows the symbol.

B Avatar Tool
The Avatar uses a Tool, which is indicated in the Effects with the symbol.
Gaea's Tool is the Root Token.

C Avatar Skills
Gaea has the Avatar Skills explained in detail on page 10.

Gaea Setup

Apply the following steps during **Step** 3 of the Avatar Setup:

- Place the Gaea Model in the *Black Rose Room.*
- Place the Filius Token in the *Throne Room.*
- Place the Filius Evocation Card in the slot of the Avatar Board.
- Place a Root Token in each Room.
- Remove the Nature's Fury card from the Forgotten Spells deck.

Avatar Special Rules — Gaea

ROOTS TOKENS

Some Effects related to Gaea place a **Root Token** in a Room. A Room may contain a single Root Token. If an Effect indicates to place a Root Token in a Room that already contains one, or indicates to place one but no Root Tokens are present in the game pool, do not place any tokens.

Root Tokens follow these rules:

- **Placement:** when a Root Token is placed in a Room, it must be placed to the left of the Instability Slots (D), adding two Instability Slots to the Room. It is possible to place a Root Token in a Rebuilt Room.
- **Instability:** when ● is placed in a Room where a Root Token is, the ● must first be placed on the Root Token's Instability Slots, if available. The ● on the Root Token is considered to be placed in the Room where the token is. If the Root Token is in a Rebuilt Room, only the Black Rose can place ● on it.
- **Destruction:** a Root Token is considered as a Model (🧍). It can be targeted like a normal Model and suffers Effects that target the Room in which it is (⟨⟩). A Root Token that suffers an Effect completely ignores it unless it inflicts at least 2💔 to it, in which case the Root Token is removed from the Lodge and each ▢ on it returns to its owner's pool.
- **Rebuilding:** When a Room containing a Root Token is rebuilt, the Token is removed.

ARBOR VITAE

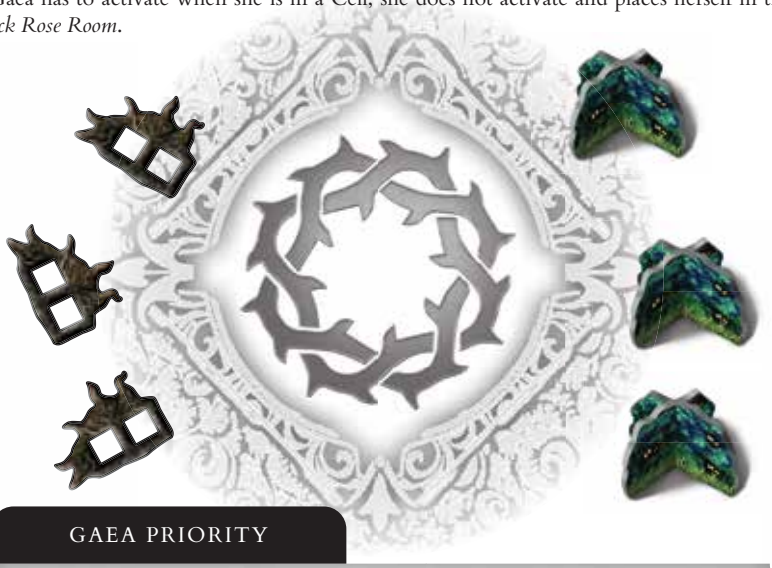

Arbor Vitae Tokens (E) represent the consolidation of Gaea's power in the Lodge and are taken into account by the Effects related to Gaea.

Avatar Skills — Gaea

Blossoming Burst
At the beginning of the Clean-up Phase (before resolving Step 1 of the Phase) the gains 1 for each Arbor Vitae Token and for each Root Token in the Lodge with both Instability Slots occupied. Then, if there are at least three Arbor Vitae Tokens in the Lodge, the immediately wins the game.

Dominion
If Gaea has to activate when she is in a Cell, she does not activate and places herself in the *Black Rose Room*.

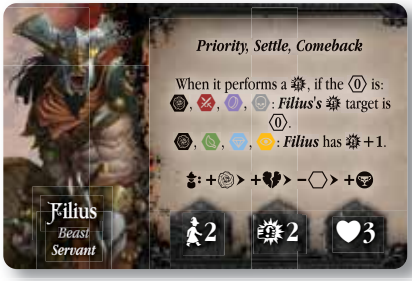

GAEA PRIORITY

1 : − > + > +
Gaea chooses as a target:
−: the Room with no , if tied...
+: the Room with the most , if tied...
+: the Room with the most Models, if tied, the Choice of the Crown applies.

2 : − > + > −
Gaea chooses as a target:
−: the Room with no , if tied...
+: the Room with the most , if tied...
−: the Room with the least Models, if tied, the Choice of the Crown applies.

Servant — Filius

A Servant is an Evocation that has a special bond with the Avatar.
Filius is the Servant of **Gaea** and is represented in the Lodge by the Filius Token (which counts as if it was a regular Evocation Model) and its own Servant Evocation Card. The Servant Evocation Card is never discarded from the ♦ slot of the Avatar Board, even if Filius is defeated or removed.

SPECIAL RULES

Priority
When activated, Filius follows the Priority on its Servant Evocation Card (also see box) to choose a target, move closer to it and attack it.

Settle
When Filius is defeated, it places 1⚙ in a ⟨0⟩ from the Room in which it was defeated.

Comeback
If Filius has to activate when its Model is not in the Lodge (it was previously defeated or removed), Filius does not activate, and the ❀ places its Model in the *Throne Room*.

FILIUS MODEL

Gaea's Servant, Filius, is a faun of the Primaevi people, who appear in the game Nova Aetas Renaissance. If you have a copy of the game, you can replace the Filius Token with the Model of any faun.

FILIUS PRIORITY

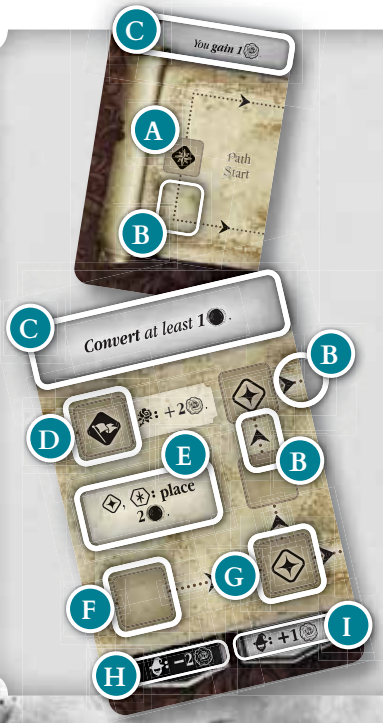

:+⟩+⟩−⟨⟩+
Filius chooses as a target:
+: the Mage with the most , if tied...
+: the Mage with the most , if tied...
−⟨⟩: the closest Mage, if tied...
+: the Mage with the most , if tied, the Choice of the Crown applies

If Filius cannot reach its target, it moves as close to it as possible. If there are no Mages in the Lodge when Filius activates, it does not move and ends its activation.

Paths

The rules introduced in this chapter allow the use of Paths, a new way Mages can gain . Once the regular game Setup is completed, Paths can be inserted into any *Black Rose Wars: Rebirth* game as an additional module by following these steps:

- Create a Path Deck with all the Path Cards available, making sure not to mix Path Start Cards into it.
- Place the Path Deck next to the Quests Deck.
- Assign each Mage a Path Start Card. That Mage places it in front of them and places one of their on the symbol.
- Starting with the Mage who has the and proceeding clockwise, each Mage draws three Path Cards from the Path Deck, chooses one and places it to the right of their Path Start Card so that it is adjacent to it and so that the **Tracks** B on the two cards match; they then shuffle and place the cards not chosen at the bottom of the Path Deck.

Path Start Card Anatomy

- A Path Start
- B Track
- C Advance Condition

Path Card Anatomy

- B Track
- C Advance Condition
- D End Point
- E Effect
- F Empty Passage
- G Effect Passage
- H Penalty Box
- I Points Box

Using Paths

During the game, a Mage must try to meet the **Advance Condition** C of the Path Card or Path Start Card, on which their ❐ is. Whenever they succeed, the Mage can move their ❐ onto one of the next **Passages** connected (with a continuous **Track** B) to the one from which the ❐ starts.

The Mage's goal is to advance their ❐ as far as possible, moving on to the next Path Card until they reach an **End Point** D (see next page).

GAINING A PATH CARD

A Mage can gain a new Path Card in two ways:

Advance: whenever a Mage moves their ❐ onto the Passage of a different card than the one they started from and that is not an **End Point** ◈ (D), that Mage draws three Path Cards from the Path Deck, chooses one and places it to the right of their last Path Card so that it is adjacent to it and the Tracks of the two cards match; they then shuffle and place the cards not chosen at the bottom of the Path Deck.

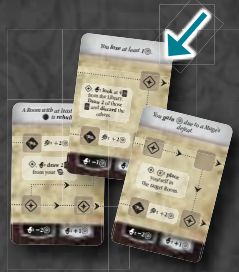

Quests: whenever a Mage would draw a Quest Card they can instead draw three Path Cards from the Path Deck, choose one and place it to the right of their last Path Card (or Path Start Card) so that it is adjacent to it and the Tracks of the two cards match; they then shuffle and place the cards not chosen at the bottom of the Path Deck.

EXAMPLE: A MAGE GAINS A NEW PATH CARD

Advance: the ❐ is moved to the Passage of a Path Card different from the one from which it started.

Quests: the Mage would draw a Quest Card.

Instead, the Mage draws three Path Cards, chooses one and places it to the right of their rightmost Path Card.

REACHING AN EFFECT PASSAGE ✧

When a Mage moves their ❐ onto an **Effect Passage** ✧ (G), they can resolve the **Effect** (E) of the Passage Card on which their ❐ is. These Effects are treated as if they were generated by a triggered **Trap** (⌓) Spell which uses the rules indicated on page 18 of the core game manual.

REACHING AN END POINT ◈

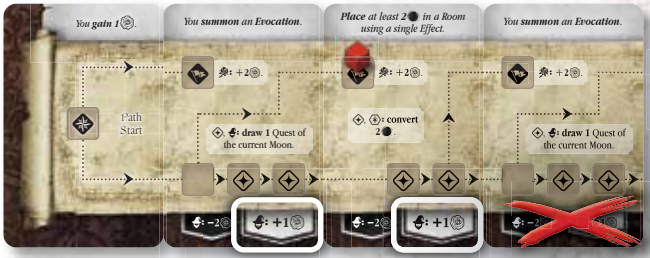

When the ❐ of a Mage reaches an **End Point** ◈ (D) they gain a **Complete Path** and the ❀ gains the ❁ indicated in the Effect next to the **End Point** ◈.

For the remainder of the game, the Mage can no longer meet the **Advance Condition** (C) of the Path Card on which their ❐ is and cannot gain any new Path Cards. That Mage must then wait until the End of the Game to calculate the ❁ gained thanks to their Path Cards.

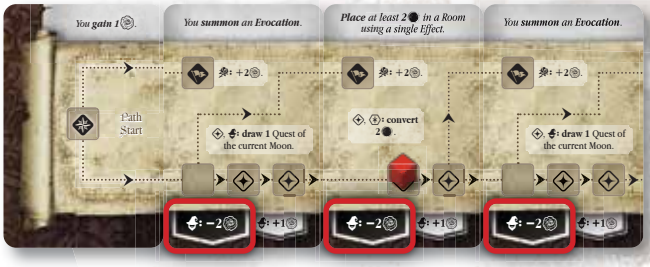

End of the Game — Additional

During the end of game calculations, Mages gain additional from Path Cards as described below:

- **The Mage has a Complete Path:** the Mage gains the sum of the indicated on the **Points Box** (I) of the Path Card with their and all the Path Cards to the left of it.
- **The Mage does not have a Complete Path:** the Mage loses the sum of the indicated on the **Penalty Box** (H) of all their Path Cards.

Complete Path
: +2

Incomplete Path
: −6

Legendary Scenario: Stop the Threat

A Legendary Scenario is a special game that allows you to play an event from the world of *Black Rose Wars: Rebirth* by applying a specific set of new rules and using Legendary Scenario Cards dedicated to it.
In Stop the Threat, the Mages will have to stop the awakening of Gaea, progenitor of the titans, who is attempting to subdue the power of the Black Rose.

Additional Setup

Apply the following during the regular Game Setup:

- **Step 1, 2 and 3:** Instead of what is indicated in these points, arrange the Rooms and Cells as shown in the image in relation to the number of players participating in the game.
- **Before step 4:** Replace the *Black Rose Room* with the *Emerald Rose* Room. Replace the *Forge*, *Garden* and *Treasure Room* with the *Thorny Clearing, Life Fountain* and *Indoor Forest* Rooms.

Once the Setup is complete:

1. Place the Second Moon Cube on Slot 5, the Third Moon Cube on Slot 21, and the Black Rose Cube on Slot 28 of the Power Board.
2. Follow the steps of Gaea's Avatar Setup.
3. Carry out the additional setup to include the Path Deck in the game.
4. Place the Legendary Scenario Card *Stop the Threat* of the relevant Moon Phase on top of each of the three Event decks. These cards will be the first Event to be resolved in each of the Moon Phases.

Scenario Rules

The following rules apply while playing this Legendary Scenario:

- **False Idols:** when a Mage defeats Gaea they do not gain a of the .
- **Toll:** when a Mage removes a Root Token, they gain 1 of the .

Honorable Mention

At the end of the game, the Mage with the most gains 3. If tied, no Mage gains additional .

Large Models and Area Effects

A Large Model is considered to be targeted by an Attack with the Area Trait if at least one of the Squares it occupies is within the Area of the Attack. If a Large Model is the target of an Attack with the Area Trait, it suffers only the Effect intended for the target, even if it occupies multiple Squares within the Area. If a Large Model is not the target of an Attack with the Area Trait and occupies more than one Square within the Area, it suffers the additional Effect only once.

Large Models and Line of Sight

A Large Model always has a valid Line of Sight on all other Models and vice versa

How to use this Expansion

This expansion adds a new Hunt Mission to be included in any Nova Aetas Renaissance Campaign of the Core Game or any Expansion.
If you decide to use Gaea in your Campaign, add the Event Card found in this box to the Core Game Event Card Deck.
Gaea is a Hunt Mission and follows all the rules for this type of Mission, described in the core Rulebook of Nova Aetas Renaissance.

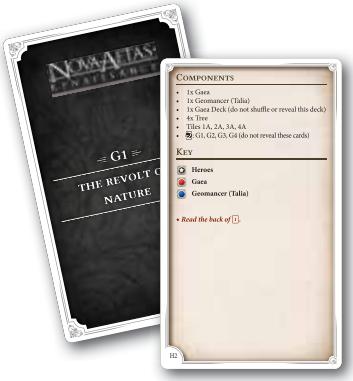

Bounty

Instead of waiting to draw the Event Card "Weeds," at any point in the Main Campaign you can mark the title of this Side Mission in the Active Side Mission Slot and play it as if you had drawn the Event Card "Weeds."

Large Models

Some Models occupy more than a single Battlefield Square. These Models are called Large Models. These Models occupy only a single Square during movement. In other words, while moving, a Large Model is considered as a normal Model, and then returns to occupying more Squares the moment the movement ends. When players need to determine the movement of a Large Model, they choose any of the Squares occupied by the Model and count starting from the chosen Square (a normal-sized Model can be used to simulate the movement of the Large Model). When the Large Model finishes its movement, the players place the Model so that the Squares occupied include the Square where it finished its movement. If placement is not possible because the required Squares (usually 4) are not all available, players refer to the following rules:

- If there are Models occupying the Squares, the Large Model pushes the Models occupying them into adjacent available Squares or the nearest available Square.
- If there are Scenic Elements occupying Squares, place the Large Model in Squares that are available or occupied by other Models. If this is not possible, the Large Model ends its Movement in a Square that allows its placement.
