This rulebook contains all the rules of the Stretch Goals unlocked during **Nova Aetas Renaissance**'s Kickstarter campaign.
The rulebook is divided into two sections:

- **Rules;** where you can find all the rules of the new material and the list of components related to it.
- **Plotbook;** this section contains all the narrative paragraphs (very much like the Core Game Plotbook) of the 4 Encounter Missions and the 7 Exploration Missions included in the Stretch Goals.

Heroes

This Expansion adds four new Heroes to play any Nova Aetas Renaissance Campaign. These Heroes can be chosen at the beginning of a Campaign as indicated in the Core Game Rulebook, bringing the selectable Heroes to eight. Alternatively, you may use their Companion version using the card provided in this Expansion (see the Companion entry in the Core Game Rulebook). The Plot paragraphs referenced by the Destiny Cards of these Heroes are found among the paragraphs of the four Encounter Missions (S1, S2, S3, S4).

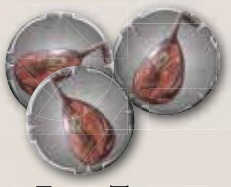
1 Activation Token



3 Fate Tokens

3 Fate Dice

New Rules: Fate Token

At the beginning of a Mission, place 3 Fate Tokens on Fatima's Oud Equipment Card. During her Activation she may spend **1** ⧗ to give another Hero within **4** ✣ one of the Fate Tokens on the Oud Card.

Before performing any Test, a Hero may discard a Fate Token they have to add a Fate Dice to the Test roll. A Fate

Token discarded in this way must be placed back on the Oud Card.
If there are no Fate Tokens on the Oud Card, the Action described on it cannot be used until at least one Fate Token is discarded and placed on the card.
A Hero may have only one Fate Token at a time.

Fate Die

This unique die has sides with better results than a regular Nova Aetas die, but it should be treated exactly the same as all other dice when applying the results, except for the side showing the ♫ icon. This icon does not provide any result to the Test of the Hero who used the Fate Dice (it is considered to have failed to meet the Success Threshold of the Test), but it could trigger some effects of Fatima's Skills.

1 Alchemical Exchange Card

1 Activation Token

New Rule: Alchemical Exchange

If during a Mission Gregorio has the Alchemical Tools Equipment Card equipped, he may use the effects described on the Alchemical Exchange Card.

To be used, each of these effects needs, in addition to an expense of ⧗, a certain number of Reagent Cards of a given type to be discarded from the loot of the current Mission: Elementum ⧗, Alchemia ⧗ or Pecunia ⧗.

It is only possible to discard Reagent cards that form the Loot, not the Reagents marked in the Campaign Sheet Treasury.

Please keep in mind that Loot cards should never be revealed during a Mission, so when selecting cards to activate an effect of the Alchemical Exchange, rely only on the symbol on the back of the Reagent Cards (⧗⧗⧗). Reagent Cards used for an Alchemical Exchange effect must be shuffled back into their respective decks after applying the effect they were used for.

Agorix

Components

Agorix

2 Hero Sheets

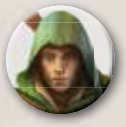
2 Skill Sheets

3 Starting Equipment Cards

6 Advanced Equipment Cards

6 Destiny Cards

Eracleto



1 Activation Token

3 Geode Tokens

1 Soul Token

New Rule: Geode Tokens

The Advanced Class of the Geomancer uses these Tokens. At the beginning of a Mission where Agorix has the Geomantic Die equipped, after the Heroes' Models are placed on the Battlefield, the controlling player places each of these Tokens in a Square within ✣3 of the Square where Agorix's Model is.

A Geode does not occupy the Square it is in, but each Square can contain up to one Geode Token.

When Agorix uses a Spell, he may choose his location or alternatively he may choose the location of a Geode Token as the starting point for the effect of the Spell as if his Model were in the selected Geode Token's Square to establish Line of Sight.

Some Effects allow Agorix to remove and replace a Geode Token. When a Geode Token is removed from the Battlefield, place it next to Agorix's Hero Sheet.

In Agorix's End of Activation Phase, the controlling player must place all Geode Tokens on the Battlefield so that each of them is in a Square within ✣3 of the Square occupied by Agorix.

Eracleto

One of the Starting Equipment cards of Agorix is the Eracleto Familiar Card.
Agorix may spend 1 ⧗ to move the Model of Eracleto up to 3 Squares.
Agorix must always equip Eracleto's Card and cannot equip other Familiar cards.
For the complete rules on Familiars refer to the Familiars paragraph in this rulebook.

Companions

These cards represent the Companion version of the four new Heroes, in addition to Sacripante.
The latter exists only in a Companion version.
These new Companions are used as described in the Rulebook, and can be hired when selecting Companions for a Mission.

Sacripante

1 Sacripante Activation Token

5 Companion Cards

New Equipment

9 Formulae Equipment Cards

You can add these 9 Formulae Equipment cards among those available to be crafted.

Equipment Sets

Each of these 4 sets adds 3 New Formulae Equipment Cards to those in the core game.

Add all of these cards to those available for Crafting when you visit the Artisan's Shop during a Rest Phase.

3 Sacred Set Equipment Cards

3 Wild Set Equipment Cards

3 Arcane Set Equipment Cards

3 Alchemic Set Equipment Cards

New Trait: Y Set (X)

An Equipment Card gains the indicated special rule if the Hero equips X Equipment cards of a given set.
For example, the Crosier is part of the Sacred Set and has the Sacred Set (2) Trait. So it gains the rule indicated if the Hero equipping it has at least one other Equipment of the Sacred Set equipped.

New Enemies

These new Enemies can be added to their respective Factions during an Enemy Draft. When performing an Enemy Draft of a Faction, if the Rank restrictions allow it, add the Draft Card of these Enemies to those of their Faction.

Mercenaries: You can add the Enemy Cards of the Mercenary Faction to any Enemy Draft of the Rome and Venice Factions, always respecting the limitations of the Draft Rank. A Mercenary Model is considered in all aspects a Model of the Faction for which they have been deployed.

Myths: You can add the Enemy Cards of the Myths Faction to any Enemy Draft of the Primaevi Faction, always respecting the limitations of the Draft Rank. A Myth Model is considered in all aspects a Model of the Primaevi.

Familiars

A Familiar is a small animal companion that Heroes can purchase at the Market during a Rest Phase, by paying the cost in Florins indicated on its card.
Familiars follow these rules:

- A Hero may equip a Familiar for a Mission exactly as if it were an Equipment Card that takes up no Encumbrance Slots.
- Each Hero can equip only one Familiar.
- At the beginning of a Mission, place the Familiar's Model in the same Square as the Hero who equipped it, with their bases in contact.
- A Hero may spend 1 ⧗ to move their Familiar's Model up to 3 Squares, ignoring any Terrain effects (e.g., Water). This Movement cannot move a Familiar to a different Height Level than it was on when it was placed at the beginning of The Mission, unless the Familiar has the Fly Trait.
- A Familiar never occupies the Square it is in and can never be attacked by an Enemy.
- If a Hero is KO'd, their Familiar remains on the Battlefield, but performs no Action until the Hero ceases to be KO.
- If a Hero is removed from the Battlefield (for example, because they are placed on a Mission Card) their Familiar's Model is also removed. When the Hero returns to the Battlefield, place the Model of the Familiar in the same Square as the Hero.

Frattaglia

Miele

1 Miele Familiar Card

Romolo

1 Romolo Familiar Card

Location Cards

If you wish, you may use these cards in your campaign to add more variety to the Rest Phase.
Each of these cards adds more customization to the Towns and Villages where you perform the Rest Phase.
Before performing the Rest Phase, take the Card corresponding to the Town or Village you are to perform this Phase in and place it in the upper left slot on the Rest Board.
A Location Card implements changes to the use of Shops in a particular Town or Village:

The Shop is unaffected and is used as described in the Rest Board.

The expense in Florins to use the Shop increases (+) or decreases (-) by X (it cannot, however, go below 0). In the case of the Artisan, the modification applies to the amount of Florins indicated on the Formulae Card you have to Craft. In the case of the Market, the change applies to both the sale and purchase of each Reagent.

The Shop is not available in this Town or Village, so no Hero can visit it.

In addition, if the lower part of the card shows the symbol, it means that Catacombs and their Size (Large, Medium or Small) are available in the Town or Village. The Faction symbols after the icon indicate which Factions can be encountered in the Catacomb. If no Faction symbol is present, it means that you may encounter any of the available Factions.
(for complete rules on Catacombs see the Catacombs expansion.)

15 Location Cards

Zodiac Cards

If you wish, you may include Zodiac Cards in your Campaign.
If you decide to use these cards, each Hero randomly draws a Zodiac Card in the order decided by the players during the Setup Phase of Mission "**0.0 - Prologue**".
Instead of drawing them randomly, each Player may assign to their Hero the Zodiac Card corresponding to their own zodiac sign. If two or more Players have the same zodiac sign, amicably decide who will take the card of their sign; the other Players will randomly draw theirs.
It is not possible to assign 2 or more Heroes the same Zodiac Card.
Once a Hero has been assigned a Zodiac Card, it cannot be changed until the end of the current Campaign.
Zodiac Cards provide an additional Skill to the Hero, which functions exactly like the Skills indicated on the Hero's Skill Sheet, and can be an **Active**, **Passive**, or **Reaction** Skill.
The Skill on a Zodiac Card is always considered Equipped by the Hero.

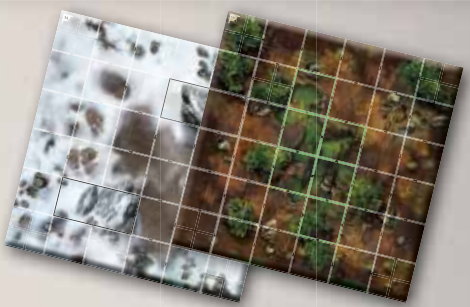
12 Zodiac Cards

New Tiles

These two double-sided Tiles show two new types of terrain, the Poisonous Swamp and the Mountain Pass.
They can be used as you wish in place of regular Tiles, to increase the variability of Exploration Missions, or for Missions you create.
Both Tiles feature a new type of Square:

Poisonous Square (green border): a Hero who ends their Activation on this Square must roll 2 . If they obtain at least 1 with a Success Threshold of 5 or more, nothing happens, otherwise they gain a ***Poisoned*** Token.

Blocked Square (black border): no Model can enter a Blocked Square.



2 Mountain Swamp Tiles (Double-Sided)

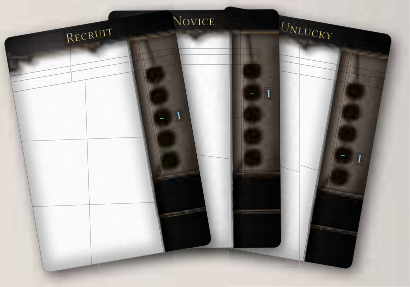
Game for 5 or 6 Players

2 Hero Boards

2 Perilium

12 Hero Cubes

10 Nightmare Cards



10 Divine Help Cards

These components allow you to increase the number of players in a Nova Aetas Renaissance Campaign up to 6. If you decide to play with more than 4 players follow these rules:

- All Missions show 4 deployment Squares for Heroes. Each Hero beyond the fourth must be placed in an Available Square adjacent to a Square indicated with ✪. If this is not possible, each Hero beyond the fourth must be placed in the closest Available Square to one marked with ✪.
- For each Enemy Card in play, randomly draw a Nightmare Card (see below) and place it under the Enemy Card it was assigned to.
- Whenever a new Enemy enters the Battlefield (i.e., through an Enemy Draft), randomly draw a new Nightmare Card and place it under their Card.
- Nightmare Cards remain associated with the same Enemy Card for the duration of The Mission, even if there are no more Enemies of that particular type.
- Nightmare Cards affect all Models of that Enemy present on the Battlefield.

Game for Fewer Than 4 Players

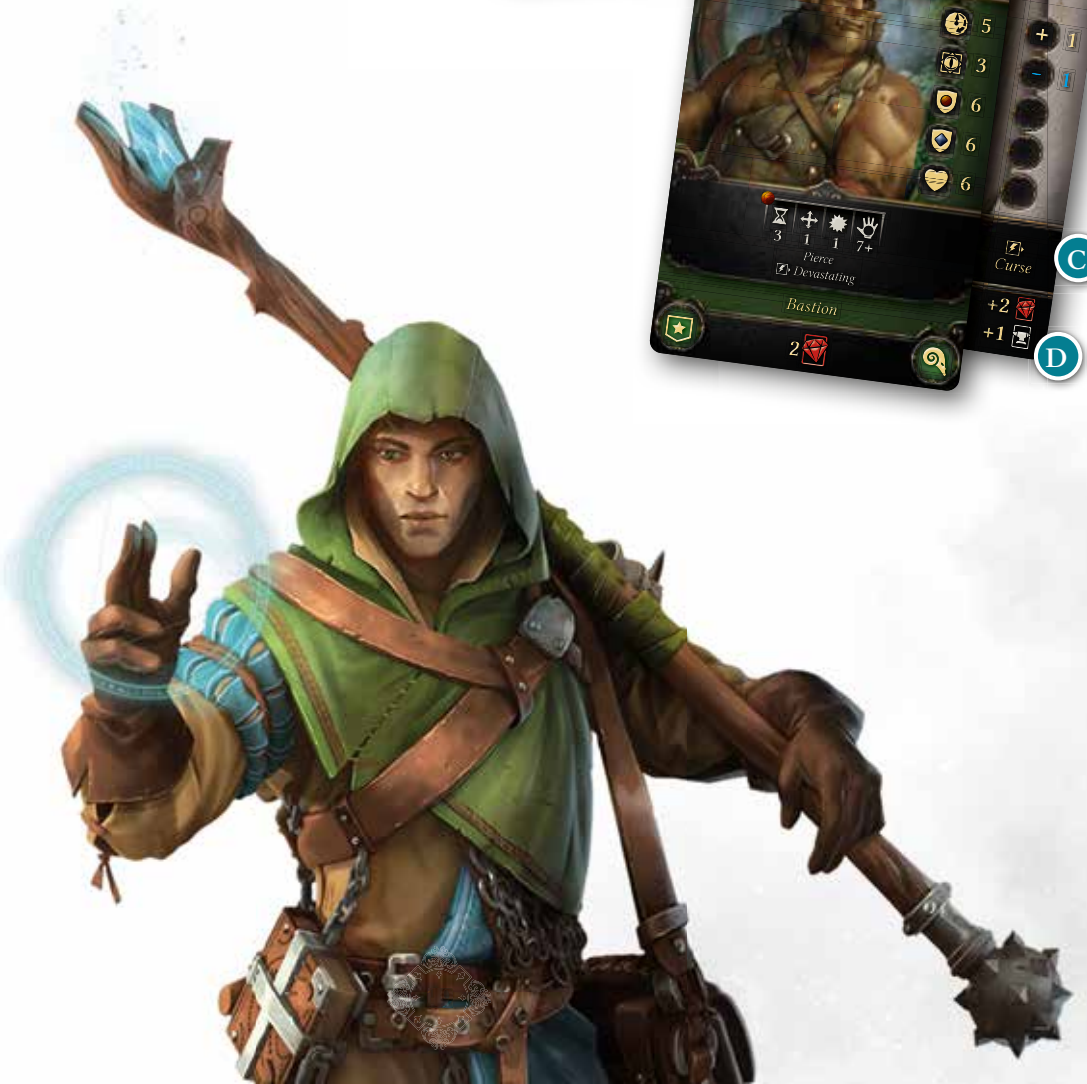
It is possible to Play Nova Aetas Renaissance with fewer than 4 Players but the number of Heroes in the game must still always be 4.
To make it easier to run the game with fewer than 4 players, each Hero in excess of the number of players can be replaced by a Companion, following the rules described in the Nova Aetas Renaissance Rulebook.
In addition, follow these rules:

- At the beginning of the Campaign, define which and how many Heroes will be played. As with the normal rules these Heroes cannot be replaced until the end of the Campaign.
- If you have selected fewer than 4 Heroes, you must hire a Companion for each Hero not selected in each Mission, so that the sum of Heroes and Companions is 4.
- For each Enemy Card in play, randomly draw a Divine Help Card (see above) and place it under the Enemy Card it was assigned to.
- Each time a new Enemy enters the Battlefield (i.e., through an Enemy Draft), randomly draw a new Divine Help Card and place it under their card.
- Divine Help Cards remain associated with the same Enemy Card for the duration of The Mission, even if there are no more Enemies of that particular type
- Divine Help Cards affect all Models of that Enemy present on the Battlefield.

Nightmare and Divine Help Cards

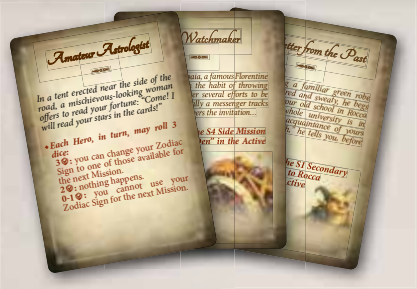
These cards are to be used if you are playing with a number of players greater than or fewer than 4.
Nightmare Cards are designed for campaigns with more than 4 players and are used to upgrade Enemies, to keep a high level of challenge.
Divine Help Cards, on the other hand, are used to weaken Enemies when you are playing with fewer than 4 Heroes and Companions in place of the missing Heroes.
Both types of cards function in the same way:

- They must be placed under an Enemy Card so that the symbols of the Enemies' characteristics match (see figure).
- The Nightmare/Divine Help Card applies its modifiers to the characteristics of Enemies. All Enemies represented by the card modify their characteristics as indicated by the Nightmare/Divine Help Card A.
- Other modifiers may affect the characteristics of Enemy Attacks B.
- No modifier can bring a value down to less than 1. All modifiers that would bring any characteristic below 1 must be ignored.
- In some cases a Nightmare/Divine Help Card can add Traits or Generic Skills to the Enemy C.
- Even the Loot given by an Enemy can be modified by a Nightmare Card/Divine Help D.



Side Missions - Explorations

Components



4 Event Cards

3 Faction Cards

7 Exploration Cards

25 Scenic Element Cards

Explorations

Explorations are a new type of Side Mission that can be added to your Campaign.
Add the 4 Event Cards that start an Exploration to the Event Card Deck.
If one of these 4 Event Cards is drawn during a Travel Phase you may decide to undertake an Exploration as a normal Side Mission, but you will not mark any titles in the Active Side Missions section of the Campaign Sheet. If you decide to undertake an Exploration, this will compulsorily be the next Mission you play.
Otherwise, if you decide not to undertake an Exploration, discard the Event Card.

Exploration Setup

Explorations are Missions that are randomly generated using 3 types of cards.
Follow these steps to set up an Exploration.

1. Shuffle the Exploration Cards and draw one randomly. This card provides the following information: (A) Mission Title, (B) a narrative text that introduces The Mission, (C) Paragraph to be read in the Plotbook section in this rulebook . The 7 Explorations available with this rulebook are numbered E1 through E7.

2. Shuffle the Faction Cards and randomly draw one. This card indicates the Faction of Enemies you will face in The Mission.

3. Read the paragraph indicated on the Exploration Card which will provide you with a small introduction and the Map. You may use any Tile available to you as long as it is of the indicated size. Place the Tiles, Heroes and Scenic Elements indicated as shown on the map.
4. The number of Random Scenic Elements you will need to place is indicated for each Tile. The Tiles must be set up one at a time. Choose one of the Tiles that form the Map. Shuffle the Scenic Element Cards and randomly draw a number of them equal to the number indicated for the chosen Tile. After this, reveal them one at a time and place the Scenic Element represented on the Card, following its Placement rules. If a Scenic Element cannot be placed (for any reason) discard the card and do not place any Scenic Elements. Continue placing Scenic Elements until you reveal all the Cards drawn for the chosen Tile, then repeat this process for all the other Tiles that make up the Map (always setting them up one at a time). If a Map shows Scenic Elements already placed, the random ones are in addition. Unless they are indicated with a specific icon, Scenic Elements already placed on the Map have no special rule.
5. Perform the Enemy Drafts indicated to place all Enemies present at the beginning of The Mission. If there are not enough Models for the Drawn Enemy to occupy all the Squares with their Rank symbol marked on the Battlefield, repeat the Draft until all Enemies of a given Rank have been placed on the Map.
6. Once the Map is set up, follow the directions for setting up the Horologium and read the rules in the box titled "The Mission."

Scenic Element Cards

- These 25 cards are mainly used in Exploration Side Missions.
- They feature the ♥ Health of each Scenic Element that can be attacked by the Heroes (A).
- A Hero may attack a Scenic Element within the ✣ of one of their ● Attacks. A ✋ Attack Test inflicts 1 💔 to a Scenic Element for each die that obtains a ⛨ with a result of 5 or more.
- Some Scenic Elements also have a ☪ Threat Level, and can therefore also be attacked by Enemies (B).
- An Enemy attacks a Scenic Element that is in their ◧ if there are no Heroes with a ☪ equal to or greater than that of the Scenic Element or if it prevents them from reaching the Hero they are to target.
- An Enemy may attack a Scenic Element within the ✣ of one of their ● Attacks and automatically inflicts a number of 💔 to it equal to the value of ✹ of the Attack used.
- Scenic Elements cannot be attacked with ◆ Attacks.
- When a Scenic Element suffers the last 💔 it is removed from the Battlefield. Some Scenic Elements may have an effect that activates when they are removed.
- The Card of a Scenic Element contains the Placement rule, which indicates how it is to be placed on the Tile in which it is drawn (C).
- Each card shows one or more special rules that the Scenic Element has (D).

25 Scenic Element Cards

Tower

This 3D Scenic Element can be used in all Missions that include a Tower, instead of using the 2 stacked 3x3 Houses

1 3D Tower

Side Missions - Encounters

Some Event Cards may allow you to play these types of Side Missions.
Encounters are in all respects similar to Campaign Missions except that their plot is disconnected from the main plot.

To play an Encounter, take the Encounter Mission Envelope indicated in the Event Card you kept aside during the last Travel Phase. Follow the instructions given in The Mission Cards inside, exactly as if it were a Campaign Mission.
You may add the 4 Encounter Side Missions contained in this expansion to your Campaign. Add the Event Card of The Mission you want to add to the Campaign to the Events deck.
These 4 Missions follow the rules for Side Missions - Encounters described in the Nova Aetas Renaissance Rulebook.

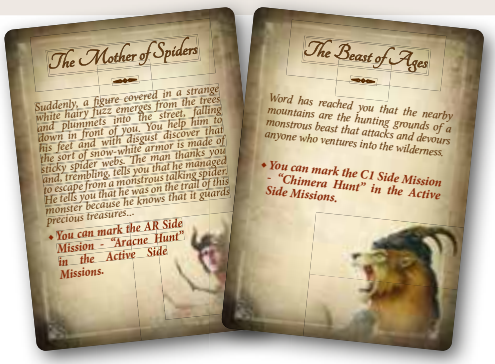
Bounty

Instead of waiting to draw the Event Card **"The Mother of Spiders"** and **"The Beast of Ages"**, at any point in the Main Campaign, you can mark **"AR - Aracne Hunt"** and **"C1 - Chimera Hunt"** in the slot dedicated to the Active Side Missions, and play them as if you had drawn the respective Event Card. If you decide to use this rule for one or both of these Hunt Missions, do not shuffle the corresponding Event Card into the Event Card deck until a Mission Card tells you to do so.



Large Models

Some Models occupy more than a single Battlefield Square. These Models are called Large Models. These Models occupy only a single Square during movement. In other words, while moving, a Large Model is considered as a normal Model, and then returns to occupying more Squares the moment the movement ends. When players need to determine the movement of a Large Model, they choose any of the Squares occupied by the Model and count starting from the chosen Square (a normal-sized Model can be used to simulate the movement of the Large Model). When the Large Model finishes its movement, the players place the Model so that the Squares occupied include the Square where it finished its movement. If placement is not possible because the required Squares (usually 4) are not all available, players refer to the following rules:

- If there are Models occupying the Squares, the Large Model pushes the Models occupying them into adjacent available Squares or the nearest available Square.
- If there are Scenic Elements occupying Squares, place the Large Model in Squares that are available or occupied by other Models. If this is not possible, the Large Model ends its Movement in a Square that allows its placement.

Large Models and Area Effects

A Large Model is considered to be targeted by an Attack with the Area Trait if at least one of the Squares it occupies is within the Area of the Attack.
If a Large Model is the target of an Attack with the Area Trait, it suffers only the Effect intended for the target, even if it occupies multiple Squares within the Area.
If a Large Model is not the target of an Attack with the Area Trait and occupies more than one Square within the Area, it suffers the additional Effect only once.

Large Models and Line of Sight

A Large Model always has a valid Line of Sight on all other Models and vice versa

E5 Skirmish

E5-1

Thanks to the woman's directions, you reach a nearby wood. You locate the noblewoman's estate. The nobleman you are looking for, Rinaldo, is tirelessly following the obnoxious orders of an unkempt woman. The poor man is not the only one passively enduring the woman's vexation–many other men work in the area, moving in an unnatural, almost mechanical way. They are probably all under the influence of a powerful love potion, so you must hurry and find the ingredients to concoct an antidote. Discretion is of the utmost importance, however, if you don't want the witch to send her victims after you.
