REQUIEM
DOWNFALL OF MAGIC
Rulebook

Requiem: Downfall of Magic

Magic on the Brink

AD 1530. As the Protestant Reformation burns across Europe, relations between the continent's secret magic academies and their members grow increasingly unstable.
The ancient magical order of the Black Rose Lodge remains in ruins, and the Perceivers, a group granted powers unknown to common mortals, have lost their leader.
Against this backdrop, a young mage, driven by extraordinary ambition, hatches a plan to increase his power, a plan that threatens to shatter the delicate balance between the magical orders.

REQUIEM: Downfall of Magic is an adventure game set in the Nova Aetas Chronicles universe.

NOVA AETAS CHRONICLES

The game in a nutshell

REQUIEM is a cooperative adventure game with a total of 13 Chapters, each one full of different challenges and difficult choices. Over the course of a Campaign, you'll play 9 of these Chapters in succession, with your choices deciding where the story takes you and which Chapters you get to explore.

Each Chapter begins with a Prologue that describes the narrative context and ends with an Epilogue where you'll discover the consequences of your actions.... Each Chapter has its own Discovery Book and Discovery Cards, which you'll use to explore the world of REQUIEM: Downfall of Magic, and make your way through the Campaign to one of the story's myriad possible endings.

Setting the Scene

Read on for a glimpse of the world in which the events of your REQUIEM: Downfall of Magic Campaign will take place. At least one player must read this text before you start the Campaign, and ideally all players should do so.

It is the year of our Lord 1530...

The Church of Rome has been shaken to its foundations by the growing tensions with the Protestant movement inspired by the theses of Martin Luther. Ever since he dared to challenge papal authority in 1517, this German monk's words have spread from Wittenberg like a slow-burning fire. The followers of the new doctrine call for a purer faith, free from the corruption and abuse that they claim are corroding the Catholic Church and tarnishing the very concept of the salvation of the soul.

Over the course of his papacy, Clement VII has attempted reconciliation with the reformers several times. Recently, however, a new threat, darker and more unpredictable, has been coalescing in the shadows, forcing him to turn his attention from this goal. This is no dispute over doctrine or religious power, but something that runs deeper, rooted in fears once believed long-vanquished. Vatican spies have reported disturbing testimonies, fragments of legends that seem to be taking physical form: supernatural presences, creatures once no more than folk tales that now stalk the land. As he searches for a way to contain these forces, Clement VII has relied on the works of inquisitor Ezechiele da Ferrara. His pen chronicles the history of the Perceivers, the Black Rose Lodge, and the beings summoned by the mysterious Magisters.

The sudden death of Ezechiele, just two years ago, has forced the Pope to seek a new advisor for these special affairs, someone who knows firsthand the darkness that lurks at the heart of magic, a strategic guide who will work to purge all traces of the arcane arts. He has chosen for this role Vincenzo Nicola Furia, recently appointed cardinal. Once a mercenary in the Company of Grifoni, Vincenzo Nicola Furia witnessed with his own eyes the same wonders described by Ezechiele. For this reason, his first task in his new role as advisor has been to establish a secret body within the Church, dedicated to studying, containing, and eliminating the demonic forces intent on conquering the world.

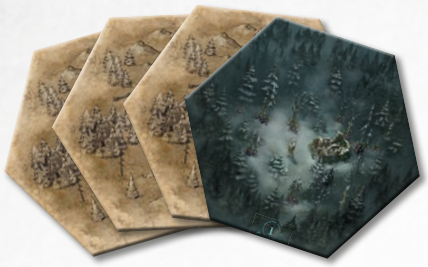
And so the Order has come into being, a council composed of monks, nuns, and lay people, charged with defending the faith against all forms of magic, heresy, and dark ritual. Its members are trained to recognize the tell-tale signs of impiety, spell use, and the forbidden arts, and to move in the shadows where demonic forces are attempting to take root. Under the guidance of Cardinal Vincenzo Nicola Furia, the Order combines discipline, faith, and military pragmatism, training men and women capable of confronting the corruption of evil, fighting unnatural creatures, and disrupting the kinds of ritual that all who witness them would rather forget.

You are part of a select group of men and women whom the Cardinal considers reliable in situations where a watchful eye is no longer enough, and direct action is required. You have been chosen for a delicate mission: to reach Wittenberg, the hiding place of Cosma de Gubernatis, a young necromancer whom Cardinal Vincenzo and the Order have been investigating for some time with growing concern. According to reliable information from Berthold, one of the Order's trusted sources, Cosma has infiltrated the Totentanz, an occult sect operating near the German town. Berthold has told the Order that this cult has a history longer than any of you had imagined, its roots as ancient and deeply established as those of the Magisters and the infamous and cryptic Black Rose Lodge.

However, the situation has proved to be more complex than expected. Cosma, endowed with fierce charisma and uncontrollable ambition, has fueled an internal rift within the Totentanz, drawing a number of its followers to him and upsetting the balance of the sect. The Totentanz, which has previously always operated in the shadows and kept a low profile in Germany, is now shaken by an internal schism that risks spreading beyond the confines of the cult. The young necromancer is fanning the flames, with many of the group's members abandoning the cautious and time-worn rituals of the order to follow Cosma, convinced that his more daring practices can open doors that the Totentanz has never dared approach.

However, his impatience has left a trail that is all too obvious. Rumors you have gathered in the countryside around Wittenberg speak of forbidden rituals celebrated in the surrounding forests. Cardinal Vincenzo has been clear: Cosma must be stopped and brought before him. Every step the young man advances in his rituals casts a growing shadow over the Holy Roman Empire, a shadow capable of devouring all before it. Your mission is urgent. You must reach Wittenberg, contact Berthold, and assess the extent of the corruption before the necromancer's actions cause irreversible damage.

Game Components



32 Tiles

1 Book Stand

24 Potion Tokens (6 per type)

12 Medication Tokens

4 Character Boards

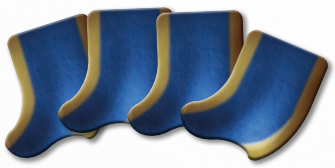
9 Destiny Tokens

46 Wound Tokens (39 1/3 and 7 5/10)

24 Character Action Tokens (8, 8, and 8)

30 Companion Action Tokens (20 and 10)

40 Exploration Tokens



4 Time Tokens

12 Companion Tokens

12 Random Reward Tokens

4 Activity Tokens

1 Enemy Deck Token

32 Thaler Tokens (14 1 and 18 3)

1 Market Token

1 Destiny Die

8 and Character Fight Dice
(2 per Character)

2 and Companion Fight Dice

2 and Enemy Fight Dice

50 Cubes (white)
4 Block Cubes (gold)

8 Discovery Books

13 Chapter Books

4 Aid Cards

237 Discovery Cards,
divided by Chapter

54 Enemy Cards

30 Equipment Cards

2 Class
Companion Cards

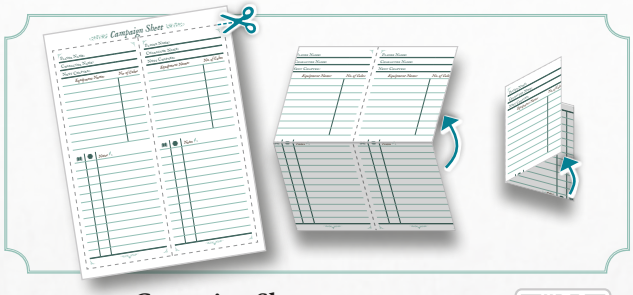
4 Character Cards

9 Nemesis Cards,
divided by Chapter

48 Tactic Cards,
divided by Chapter

27 Skill Cards

16 Level Cards



Campaign Sheets
(photocopy the Campaign Sheet at the end of this Rulebook, or download and print from our website)

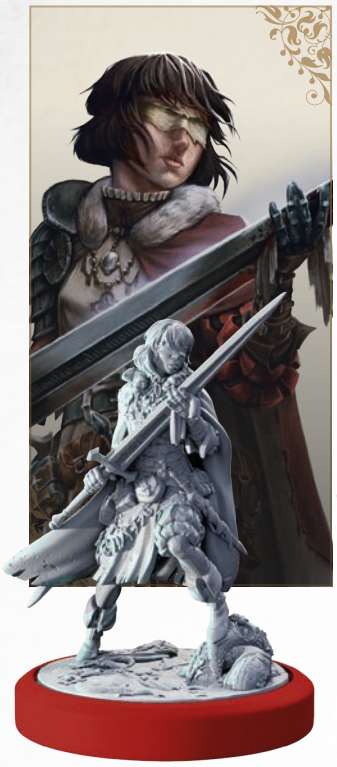
Insight: Component Limit

Game components are limited to the quantity provided in this box, with the exception of:

- Thalers
- Wounds
- Cubes

If these components run out, use an appropriate substitute to represent the extras you need.

Miniatures



Agnese

Valerio

Melchiorre

Beatrice

Cosma / Necromancer

Mors/Death

6 Cultists

6 Arquebusiers

9 Nachtkrapps

3 Abominations

3 Elite Guards

Setup

Read this section of the rulebook when you're ready to set up the table for a game of REQUIEM. To first learn the rules of the game, you can skip this section for now and instead read the ***Basic Concepts*** section on page 16.

Insight: Character and Player

You are your Character! Throughout this Rulebook, we refer to "the player" and "the Character" they control interchangeably.

Play Area Setup

1. Leave some space free in the center of the Play Area A for the **Map**, which you will assemble later, in Chapter Setup (below).
2. Stack B all the Tiles ⬣ face down to one side of the table.
3. Shuffle the **Equipment Cards** into a deck and place it face down to one side of your Play Area C .
4. Gather all the following components: **Potion Tokens**, **Medication Tokens**, **Thaler Tokens**, **Wound Tokens, Destiny Tokens, Companion Tokens, Companion Action Tokens, Market Token,** and **Cubes**. Place them in separate piles within reach of all players to create the general supply D.
5. Shuffle all the **Random Reward Tokens** and place them on the table in a face-down pile E.
6. Place the **Book Stand** F on one side of the Play Area.
7. Place the **Destiny Die**, **Enemy Dice,** and **Companion Dice** to one side of the table G.
8. Place the **Character Boards** around the Play Area. H.
9. Place a Player Aid **Card** I next to each Character Board.
10. Sort the **Enemy Cards** using the numbers on their backs. Place them in order from lowest number to highest. Put this deck face down next to the Book Stand J.

Character Setup

Decide as a group which Character(s) will be assigned to each player, or assign them at random (see Insight: Four Characters).

Agnese	Melchiorre	Valerio	Beatrice
Soldier	Leader	Artificer	Tactician

Each player performs the following steps for each Character they control:

1. Take all the components in the color corresponding to your Character:
   - Your miniature (A) and your **Character Card** (B).
   - Your **4 Level Cards** (C), 10 **Exploration Tokens** (D), 2 **Fight Dice** (E), and **Skill Cards** (F).
   - If your Character belongs to the Leader Class, also take your **Class Companion Cards**.
2. Place your **Character Card** (B) on the designated space on your Character Board, gameplay information side up.
3. Stack your **Level Cards** (C) on the designated space on your Character Board, with the appropriate Level Card for this game on top. If you are playing your first game, **this will be your Level 1 Card**.
4. Take the **Character Action Tokens** indicated on the Level Card. Place them face up in the dedicated slots (G) on your Character Board, in any order.
5. Place a cube in the **Focus** Track slot (H) corresponding to your Character's Maximum Focus value (I). Place a **Block Cube** (gold) in the slot with the next highest value.
6. Place your **Skill Cards** (F) next to your Character Board (you won't use them in the first Chapter).
7. Place your **Exploration Tokens** (D) next to your Character Board.
8. If you are about to play Chapter 1, each Character gets 1 **Medication** and 2 **Thalers** (J); otherwise, refer to the "Continue the Campaign" section immediately below.

CONTINUE THE CAMPAIGN

To continue a Campaign that you've already begun, set up the Play Area as normal, then each consult the Campaign Sheet(s) for the Character(s) you control. Each Character gets the Medication, **Thalers**, and **Potions** listed on their Sheet. Place these on their Character Board.
Then, equip them with any listed Equipment Cards and Treasure Cards, and place Cubes as indicated on those cards.
Place any **Discovery Cards** with the Usage symbol next to the Book Stand.

Insight: Four Characters

You will always play REQUIEM with four Characters, with a maximum of one Character per Class. If you are playing with fewer than four players, decide as a group which player (or players) will be responsible for controlling multiple Characters.

Story Chapter Setup

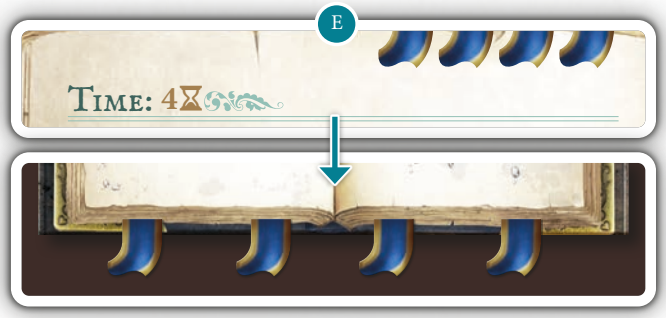
This page tells you how to set up a **Story Chapter**. The first Chapter of the Campaign is a Story Chapter, but later on you'll also encounter **Challenge Chapters,** which follow slightly different rules. You can differentiate between the two by the heading on page 3 of each Book, which will be either "Story" or "Challenge." See the next page for how to set up and play a Challenge Chapter.

Refer to the back of the **Chapter Book** you are about to play and gather all the components listed there.

1. Open the **Chapter Book** and read the **Prologue** (A) on page **2**.
2. Place the **Discovery Book** (B) for this Chapter within reach of all players.
3. Place the **Discovery Cards** (C) for this Chapter within everyone's reach.
4. Set up the **Map** in the center of the table (D) as described on page **3** of the Chapter Book. Place your Characters and any Companions on the indicated Tile.

Please note: Leader Class Companions must not be placed on the Map during Setup. The diagram of the Map in each Chapter Book shows which Tile should go in which space (Tile 11 in space A and Tiles **1** through **9** in the B spaces, in the example below).

5. Turn to page **4** of the Chapter Book, and place the indicated number of **Time Tokens** (E) on the Book stand.



6. If there is a Special Setup section, carry out any steps listed there.
7. If there is an Enemy Deck section, shuffle the **Enemy Cards** it lists into a deck. Place the **Enemy Deck Token** on top of it.

8. Place the Enemy Deck next to the Book stand.
9. Read the **Special Rule(s)** and the **End of Game** section.
10. Each Character selects the **Skills** they will use int his Chapter (see ***Skill Cards***, page 35).

Now you're ready to play!

Challenge Chapter Setup

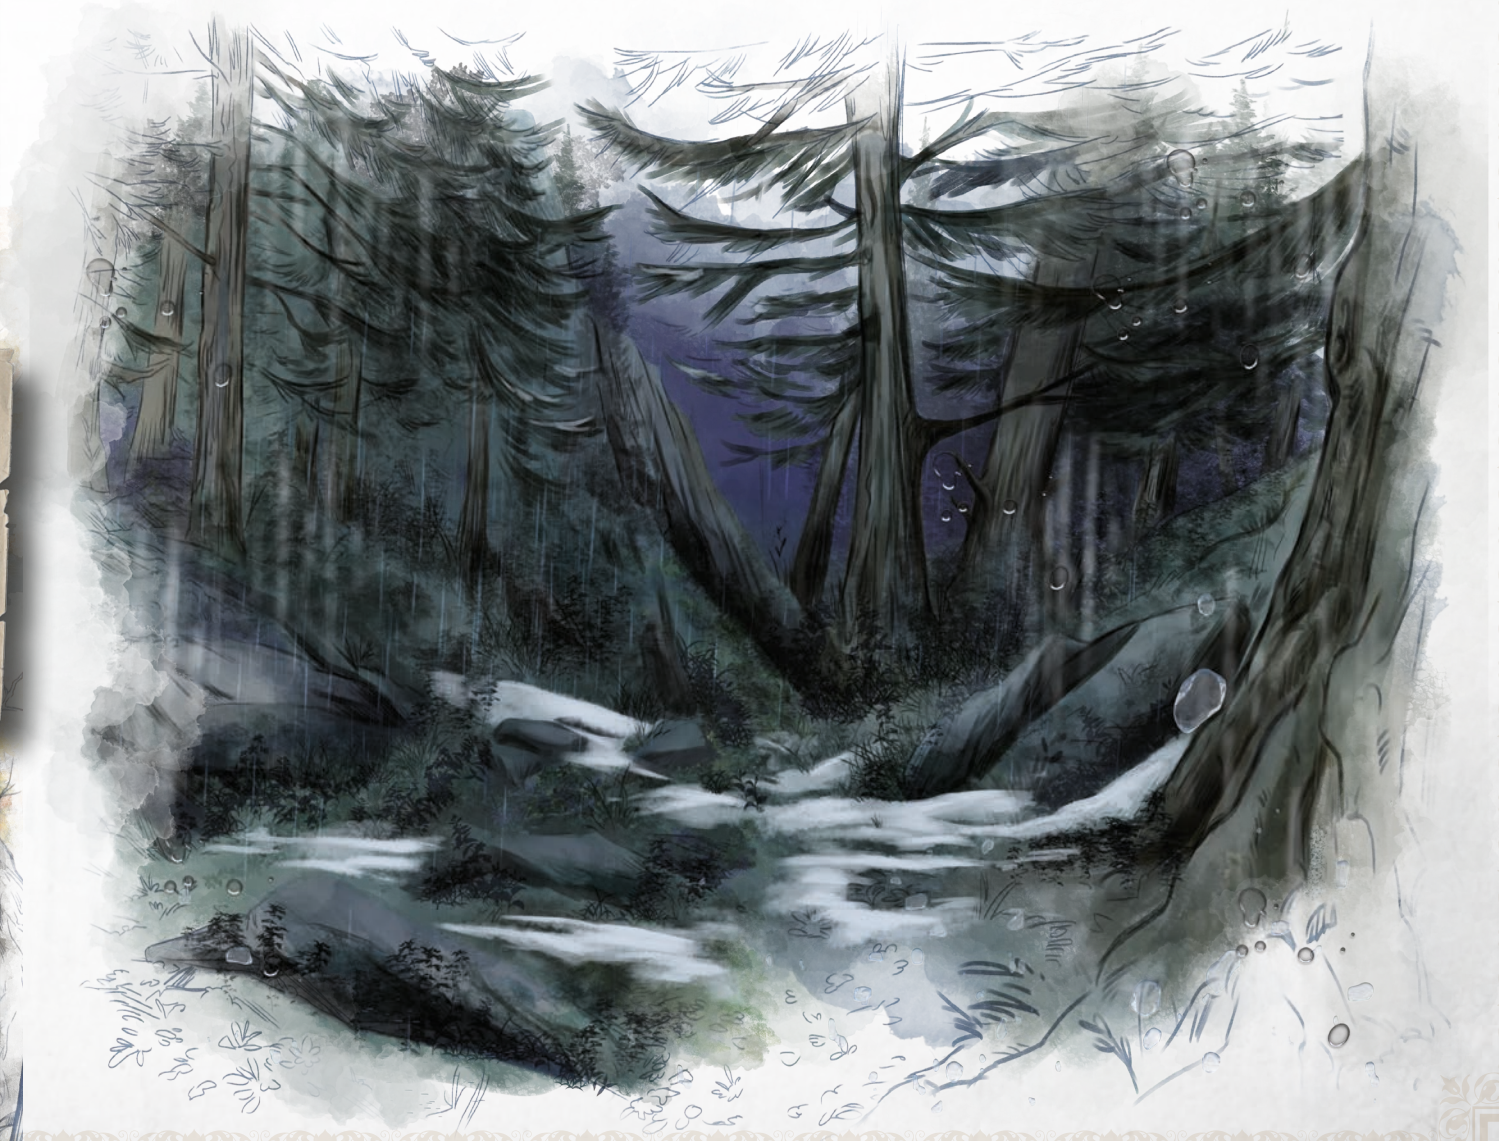
Gather all the components listed on the back of the Chapter Book you're about to play, as normal. Note: Challenge Chapters do not have a Discovery Book.

Setting up a Challenge Chapter involves the same steps as setting up a Story Chapter, with the exception of step 2. Replace this with the following steps:

2a. The **Nemesis Cards** and **Tactic Cards** may list an Act on the back. If so, separate them into Act I and Act II cards.

2b. Place the Nemesis Card (A), for this Chapter or for the current Act face up next to the Book stand.

2c. Shuffle the Tactic Cards for the Chapter or for the current Act to create the Tactic Card deck (B) face down next to the Book stand.



Basic Concepts

Skip the Setup section for now and start here if you're looking for an overview of key concepts that will help you understand the rest of the rules and learn how to play.

Playing a Campaign

TThis core box set contains the REQUIEM: Downfall of Magic Campaign, which is divided into a series of Chapters. You'll play through nine different Chapters over the course of your Campaign.
Each player will choose at least one Character to play in Chapter 1, and continue playing that Character (or those Characters) throughout the Campaign.
At the end of a Chapter, players can choose whether to play the next one immediately or to pause the game session and resume later.

STORY OR CHALLENGE

Some Chapters are Story Chapters, while others are Challenge Chapters. In a **Story Chapter**, the Characters explore their surroundings, fight Enemies, and solve mysteries in order to complete their objective. In a **Challenge Chapter**, the Characters go head to head with a Nemesis, one of the main Enemies in this Campaign.
You can check the heading on page 3 of each Chapter Book to find out whether it is a Story Chapter or a Challenge Chapter.

CAMPAIGN STRUCTURE

Over the course of your REQUIEM Campaign, you'll make many choices. At the end of certain Chapter Books, you'll face decisions that will affect the narrative to come.

Map and Movement

A ⬣ **Tile** represents a limited segment of the game world. The set of Tiles used during a game forms the **Map**. A Tile can be **Covered** (A), if it shows its parchment side, or **Revealed** (B), if it shows the unique picture that corresponds to its particular location.
The Tiles are divided into two types based on the landscape they represent: **City** or **Forest**. The illustration on the Covered side of the Tile tells you which type it is.
Some game rules may specifically affect Revealed or Covered Tiles, or indicate a specific Tile by referring to its number.

MOVING

Characters 🧍, **Enemies** 💀, and **Companions** ✋ are represented on the Map by their miniatures or tokens, and can move from one Tile to another. Some Actions or Game Effects allow you to move a miniature **once or more**.
Each time a miniature moves, it can do so only to a Tile adjacent to the one it is currently occupying.

REVEALING A TILE

During a Story Chapter, whenever a 🧍 **Character moves** onto a Covered Tile, flip that Tile to its Revealed side.
When you reveal a Tile, align it with any other Revealed Tiles on the Map. To do this, make sure that the numbers on the bottom of each Tile are oriented the same way. The Map as a whole must be set out as shown in the Chapter Book.

Anatomy: Tile

(A) **Covered side:** all City Tiles show one illustration on this side, and all Forest tiles show another
(B) **Revealed side:** each Tile has a unique illustration on this side
(C) **Number**

ADJACENCY
Two Tiles are considered adjacent if they are touching on at least one side, regardless of whether they are Revealed or Covered.

PLACING A MINIATURE
Some game Effects allow you to place a miniature on a specific Tile. This may be a miniature that is already on the Map or a miniature that is not yet in play.
Unlike when moving, which is to an adjacent Tile, when you are instructed to place a miniature, you can take a miniature from any location and place it on the Tile indicated by the Effect. When you place a miniature that was already on the Map, it doesn't pass through the Tiles between its current position and the Tile on which you are placing it, but is placed directly on the Tile indicated by the Effect.

EXPANDING THE MAP
Setup includes arranging the Map for your current game session. However, certain Chapters may tell you to Expand the Map. The Chapter Book will show you how to position the new Tiles that you're adding to the Map. Make sure you place them oriented in the same direction as your starting Map.

Activate, Discard, Exhaust, and Restore

In REQUIEM, there are many different types of cards and tokens representing different game elements.
Each card and token has its own specific rules (see below), but the following general rules apply to them all.

ACTIVATE
When instructed to **activate a card**, put that card into play face up. Then follow the specific instructions for the type of card activated.

DISCARD
Whenever you are instructed to **discard a token**, place that token back in the general supply. Whenever you are instructed to **discard a card**, place that card face up next to its deck.

EXHAUST
When instructed to **exhaust a token**, flip the token face down.

Not Exhausted *Exhausted* *Not Exhausted* *Exhausted*

When instructed to **exhaust a card**, rotate the card 90 degrees to that it is now horizontal rather than vertical.
Unless otherwise specified, you may never use the Effect of an exhausted component. You cannot exhaust a card or token that is already exhausted.

RESTORE
When instructed to **restore a token or card**, return it to its original position. Its Effect is once again available to you
You cannot restore a card or token that is not currently exhausted.

Effects

Many game components, such as cards and tokens, have an **Effect**.
An Effect always has an **Outcome**, and it may also have a **Cost** *and/or* a **Condition**. If you meet the Condition and/or pay the Cost (if applicable), you may apply the Outcome, allowing you to influence the state of the game.

CONDITION
A **Condition**, if present, indicates that this Effect can only be resolved when the specified condition is met.

COST
The **Cost**, if present, indicates the resources that must be spent to resolve the Effect. If you cannot pay the Cost, you cannot resolve the Effect. Below are some examples of Costs:
- **1**: exhaust **1** Character Action Token of your choice.
- **X**: lose **X** **Focus**, where X can be any value.
- **1**: discard **1** **Cube** from this card.
- : exhaust this card.

OUTCOME
The **Outcome** indicates what happens when you resolve the Effect. Unless otherwise specified, you may apply the Outcome only **once**.
An Outcome may have various different parts. These must be applied in the order in which they are written. Certain Outcomes or parts of Outcomes are optional. The text will specify that you "may" apply these. Otherwise, you must apply each part of an Outcome, as far as is possible.

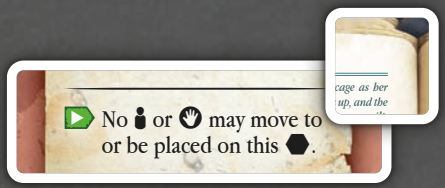
RESOLVING AN EFFECT
As soon as its Condition has been met and/or its Cost paid, an Effect must be resolved as soon as possible.
Always resolve Effects one at a time. If multiple Effects are available to you at any time, decide as a group the order in which you will resolve them, one after the other.
Always fully resolve one Effect before resolving the next.
- If an Effect has neither a **Cost** nor a **Condition**, resolve it as soon as its associated component comes into play.
- If an Effect has a **Condition** but no **Cost**, and the Condition is met, you must resolve the Effect as soon as possible.
- If an Effect has a **Condition** and a **Cost,** and the Condition is met, a Character **may choose to pay** the Cost to resolve the Effect. This is never mandatory.
- If an Effect has a **Cost** but no **Condition**, a Character **may choose** to pay that Cost in order to resolve the Effect. This is never mandatory.

Insight: Losing Resources as an Outcome

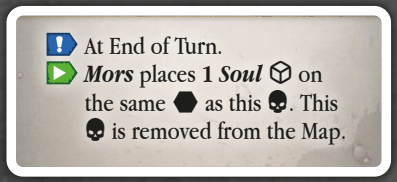
Characters often have to return resources to the supply to pay a **Cost**. They may also have to do so as an Outcome. In this case, this is considered a consequence rather than a payment. This means that you still apply the Outcome even if you don't have all the listed resources to lose: just discard as many as you can.

Example: Resolving an Effect

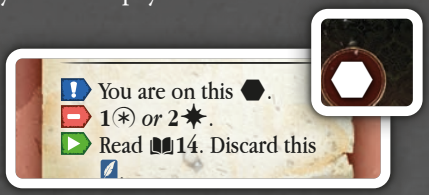
No Cost or Condition. The card in this example only has an **Outcome**. This Effect is resolved when the card is activated.



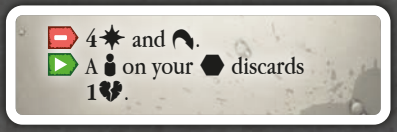
Condition but no Cost. The Enemy in the example below has an **Outcome** that is applied as soon as the listed **Condition** is met.



Cost and Condition. This Effect has a **Condition**, **Cost,** and **Outcome**. If a Character meets the Condition (is on the Tile that this component is linked to), they may choose to pay the **Cost** to resolve the Effect.



Cost but no Condition. This Effect has a **Cost** and an **Outcome**. If a Character chooses to the pay the Cost, they resolve the Effect.



Health and Wounds

Each miniature (Character, Enemy, or Companion) has their own ♥ **Health** value, which you can find on their Character, Enemy, or Companion Card.

Health represents a miniature's life force, i.e., the maximum number of 💔 **Wounds** they can withstand. Each time a miniature suffers a 💔 **Wound**, place **1 Wound Token** on their card.

If a miniature suffers Wounds equal to their Health value, that miniature is Defeated. For more information about Defeated Characters, Enemies, and Companions, see the specific sections (below) for each of these miniature types. A miniature cannot suffer more Wounds than their Health value; any excess Wounds are ignored.

INFLICTING VERSUS SUFFERING WOUNDS

In some cases, a miniature will inflict a Wound on another miniature.

In other (rare) cases, a miniature suffers a Wound without another miniature inflicting that Wound. When this happens, the Character who suffered the Wound cannot resolve Effects designed to be resolved against a miniature that inflicted a Wound, such as a reaction to an Attack.

Cosma

Cosma de Gubernatis is a necromancer who studied under a legendary Magister of the Turin Lodge—known more formally as the Black Rose Lodge. Thanks to his charisma and skill in manipulating others, he has managed to infiltrate the Totentanz school of magic in Wittenberg. He has secured greater and greater power, winning his own following of cultists who have rejected their former school to follow Cosma as he conducts his daring research. His true goal is shrouded in mystery, but it seems that he seeks to regain something he lost in the past.

Shared Game Materials

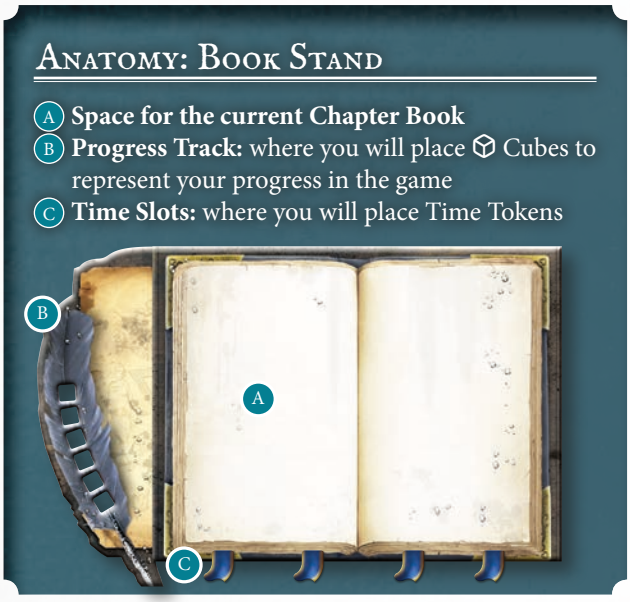
These components are not related to a specific Character or Chapter.

BOOK STAND

You'll use the Book Stand to organize the components related to your current Chapter.

During the game, you'll place Cubes on the **Progress Track** to represent your group's progress. Each Chapter will tell you what exactly the Cubes on the Progress Track represent during this particular game.

Time Tokens track the passage of time during the game. Do your best to complete the Chapter before time runs out!



RANDOM REWARD TOKENS

Random Reward Tokens offer a grab bag of different rewards. Each time you gain **1**, draw a Random Reward Token from the face-down pile, reveal it, and gain the reward it shows.

Keep revealed tokens face up until all of them have been revealed, then reshuffle them face down to create a new pile. There are 2 Equipment, 3 Thaler, 4 Potion, and 3 Medication Random Reward Tokens in total.

Equipment (2)

Thalers (3)

Potion (4)

Medication (3)

MARKET TOKEN

The **Market Token** is used as a reminder that there's a Market on a particular Tile. When a card representing a Market is revealed, place this Token on the Tile that that card is linked to.

DESTINY DIE

Throughout the game, you'll use the **Destiny Die** to determine outcomes where chance plays a role. Depending on the situation, you may be asked to consider only the number or the symbol that you roll.

The possible outcomes are:

- Numbers: 1, 2, 3, 4, 5, 6.
- Shapes: triangle, diamond, circle.

DESTINY TOKENS

You may be told to place a Destiny Token on a specific Tile after rolling the Destiny Die or reading a particular piece of text. There are six Token with both a number (1 to 6) and a symbol, and three Tokens with only a symbol. If you place a Destiny Token on a Covered Tile and later flip that Tile, place the token back on the now Revealed Tile.

ACTIVITY TOKENS

Activity Tokens are there for you to use however you like—they don't have an official use, or interact with any of the rules. Many players use them to mark Tiles they want to return to later.

CUBES

White ⬡ **Cubes** have various different functions throughout the Campaign. Whenever ⬡ Cube have a specific purpose, they will be given a specific name. They will then be referred to by that name until the end of the Chapter.

THALERS

Thalers ⓣ are the currency of the world of REQUIEM. You'll find 1- and 3-Thaler coins in this core box. Characters may gain Thalers as a reward for defeating an Enemy or completing a specific task.

Characters mainly use Thalers to purchase new items when they are on a Tile with a Market. See "Trade" on page 26.

Destiny

Some see a hidden design in the unfolding of events, which moves humankind like pawns in a celestial game. Others see only the blind inevitability of fate, and curse inescapable misfortune even as they accept favorable throws of the dice. Then there are those who are awake to their own free will and consider themselves the architects of their own destinies.

Beatrice

Self-flagellation is common among the members of the Order, not only as a means of atonement for one's sins, but also as a form of training to strengthen the body and mind. Beatrice is one of the main proponents of this discipline: her rigidity of spirit and purpose goes beyond that of any cloistered nun. Fasting, vigils, and flagellation have honed her body, making it sstrong as iron despite her age.

Game Flow

Once you've completed Play Area, Character, and Chapter Setup, you're ready to start the game! Read on for an overview of the structure of a REQUIEM game session.

Game Turn

A REQUIEM game is divided into Turns. After the end of one Turn, a new one begins. Turns continue until the End of Game conditions are met.

A Turn is divided into the following phases:

- **Opening Phase**
- **Action Phase**
- **Closing Phase**

Opening Phase

1 RESTORATION

Each Character restores their game components:

- All their ✳ **Character Action Tokens**.
- All their ➔ and ✕ **Companion Action Tokens**.
- All their exhausted cards.

2 START OF TURN

Resolve any Effects with a "! At Start of Turn" Condition at this point, in the order of the players' choice.

Action Phase

In this phase, Characters perform Actions to progress in the game. There is no set player or Action order. Discuss and decide as a group the order in which the Characters will perform their Actions.
During this phase, you should discuss as a group the best strategy for advancing in the Campaign. To perform an Action, you will usually have to exhaust a Character Action Token *or* resolve the Effect of a game component such as Equipment or a Skill.
See the next section for more detail on the available Actions.
If a Character still has Action Tokens, but can't or doesn't wish to use them (including if they are Defeated), they must exhaust the Tokens without performing any Actions, gaining 1 ✸ Focus for each Token exhausted in this way.
This phase ends when all Characters have exhausted all their ✳ **Character Action Tokens**.

Closing Phase

1 END OF TURN

Resolve any Effects with a "! At End of Turn" Condition at this point, in the order of the players' choice.

2 AGGRESSION

Each **Enemy** on the Map performs an **Aggression** against each **Character** and each **Companion** on the same **Tile** as that Enemy.

3 TIME

Discard **1** Time Token. If this is the last Time Token, the Chapter ends and players proceed to one of the possible Epilogues (see page 27).

Actions

Characters can perform Actions to interact with the world of REQUIEM. There are three types of Actions:

- **Character Actions**
- **Free Actions**
- **Component Actions**

Character Actions

A Character Action is an Action that requires the Character to exhaust one or more of their Character Action Tokens to perform it. Each Character's Character Card shows the core Character Actions available to them, as well as the type and number of Character Action Tokens they must exhaust to perform those Actions. Your particular Character is unlikely to have all the game's potential Character Action options on their Character Card, but they might acquire other components that open these choices up to them (see the Insight below).

Characters may perform Character Actions at any time during the **Action Phase**. However, Character Actions may not interrupt any other Effects or Actions: if another Action or Effect is currently being resolved, complete this before performing your Character Action.

Character **Actions** featured in the game:

WALK
A Character **moves** up to **once**.

RUN
A Character **moves** up to **twice**.

SLINK
A Character **moves** up to **once**. When a Character uses this Action to move, their movement does not trigger an Enemy **Aggression.**

Insight: Moving, Revealing, and Aggression

Keep the following important rules in mind when moving:

- Whenever a Character **moves**, check to see whether they trigger an Enemy Aggression; see the "Aggression" section on page 41.
- Whenever a Character **moves** to a Covered Tile, flip that Tile to its Revealed side; see the "Map and Movement" section on page 16.

EXPLORE
A Character checks out the Tile they are on. **Exploring** is one of the main ways players make progress during the game. You'll need to carefully plan your Exploring to reveal as many useful elements as possible.
Whenever a Character Explores a Tile, they place an **Exploration Token** on that Tile. Leave this Token on the Tile for the remainder of this game session, unless instructed to do otherwise. This will help you keep track of which Tiles the party has checked out so far.
When a Character Explores, they must:

- Place one of their Exploration Tokens on the Tile their Character is currently on.
- Find and read the correct Paragraph in the Discovery Book, according to the number of the Tile and the number of **Exploration Tokens** currently on it.

Limitations:

- A Character **cannot Explore** a Tile that contains one of their own Exploration Tokens.
- A Character **cannot Explore** if there are one or more Enemies on the Tile they are on.
- A Character **cannot Explore** unless they have other Exploration Tokens in their reserve.
- A Character **cannot Explore** if there is no Paragraph to read based on the number of Exploration Tokens present on that .

Insight: Character Actions via Components

Some game components allow a Character to perform an Action that would normally be classed as a Character Action; for example, the Felingrace Potion, which allows Characters to Slink or Run without exhausting their Character Action Tokens.

FIGHT

A Character attempts to inflict Wounds on an Enemy in order to defeat them. This will also give the targeted Enemy the chance to inflict Wounds on the Character who is Fighting them.

To **Fight**, the **Character** chooses an Enemy located on the same Tile as themselves, then resolves the following steps in order:

1. Roll your Fight Dice and the Enemy Dice.
2. First, defend against the Enemy's Attack. Compare the Enemy's **Attack Die** with your **Defense Die**. If the number of their is greater than the number of your , the Enemy inflicts **1 Wound** on you.
3. Now launch your own Attack. Compare your **Attack Die** with the Enemy's **Defense Die**. If the number of your is greater than the number of their , you **1 Wound** on the Enemy.
4. Gain a number of **Focus** equal to the number of icons showing on both of your Character Fight Dice.

Important: if the face of a die shows two outcomes separated by a **divider**, you must choose between those two options. Inflict and suffer all the Wounds mandated by the dice, even if your Character or the Enemy is Defeated.

RECOVER

A Character regains their strength. This Action may only be performed by a **Defeated Character,** and allows them to get back on their feet and resume performing Actions and resolving Effects.

When a Character performs **Recover**, discard all **Wounds**, then return their miniature to an upright position. The Character is no longer Defeated (see page 36).

CHARACTER FIGHT DICE

Use the Character Fight Dice in the color matching the color of your Character's Class.

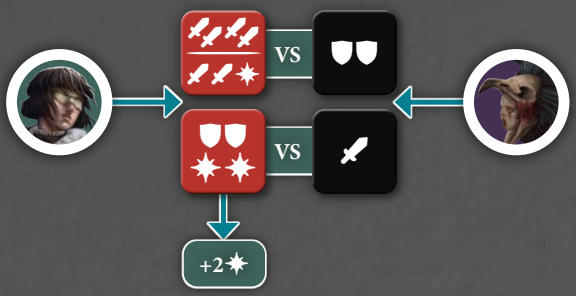
Your set of two Character Fight Dice comprises an **Attack Die, which allows you to roll** Attack symbols, and a **Defense Die**, which allows you to roll Defense symbols. They both also have faces with Focus symbols, which allow you to gain Focus while Fighting.

Example: Fighting

Agnese is Fighting, so she rolls her two Character Fight Dice and the two Enemy Dice.

She was hoping for a better roll, so she decides to resolve the Effect of one of her to reroll her .

Her reroll gives her a choice of two outcomes, separated by a divider. The outcome on top would give her more than the Enemy's , and therefore allow her to inflict **1** on the Enemy. The one on the bottom would give her the same number of as the Enemy's , so she couldn't inflict any , but she would gain 1 additional and the couldn't inflict any on her, either. Whichever she chooses, she gains **2** thanks to the result of her .

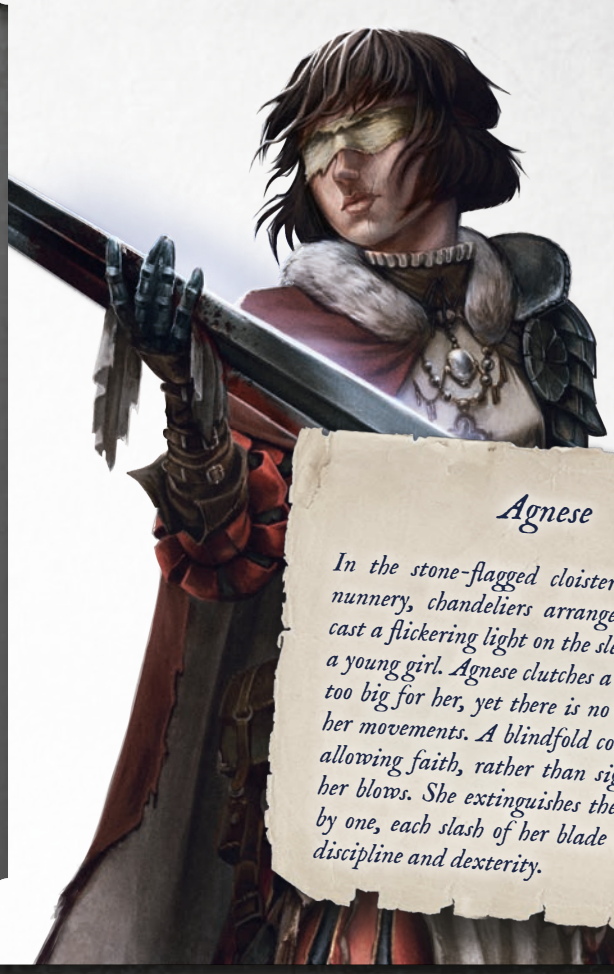


Anatomy: Fight Dice

- (A) **Attack Die:** allows you to roll Attack
- (B) **Defense Die:** allows you to roll Defense
- (C) **Divider:** separates two outcomes for you to choose between
- (D) **Focus:** Focus you'll gain during this Fight Action

Example: Walking, Running

Valerio (A) performs Walk, allowing him to move once, from his current Tile to an adjacent one.
Melchiorre (B) performs Run, allowing him to move twice, each time from his current Tile to an adjacent one.

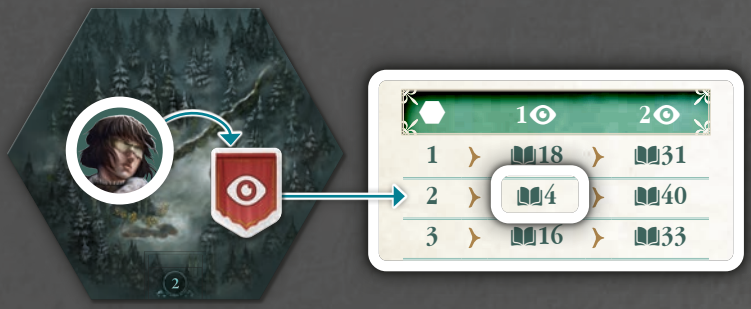


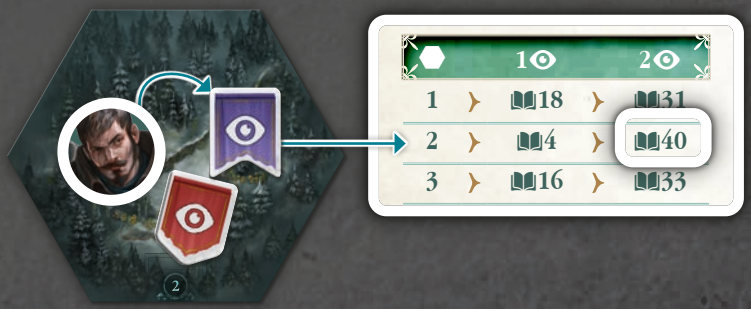
Agnese

In the stone-flagged cloister of a remote nunnery, chandeliers arranged in a circle cast a flickering light on the slender figure of a young girl. Agnese clutches a sword that is too big for her, yet there is no hesitation in her movements. A blindfold covers her eyes, allowing faith, rather than sight, to guide her blows. She extinguishes the candles one by one, each slash of her blade the result of discipline and dexterity.

Example: Exploring

1. Agnese performs **Run** and moves to a Covered Tile. As soon as she lands on it, she flips it over to show its Revealed side. She then decides to perform **Explore**. She places one of her 👁 Exploration Tokens on her ⬢ Tile. This allows the players to read the Paragraph in the Discovery Book that corresponds to the Tile number and number of Exploration Tokens on that Tile: Tile **2**, 1👁 on that Tile, so players get to read a different Paragraph in the Discovery Book.
2. Valerio moves onto the Tile just explored by Agnese and decides to perform **Explore** in turn. He places one of his 👁 Exploration Tokens on the ⬢ Tile. He is on the same tile as Agnese (Tile 2), but there are now **2**👁.





Free Actions

A Free Action is an Action that does not require the Character to exhaust, spend, or otherwise discard tokens or other resources to perform it.
Characters may perform Free Actions at any time during the Action Phase. However, Free Actions may not interrupt any other Effects or Actions: if another Action or Effect is currently being resolved, complete this before performing your Free Action.
Free Actions must be resolved one at a time. There is no limit to how many Free Actions a Character can perform, other than the limitations imposed by game components (e.g., running out of Thalers).

COMMAND

A Character may exhaust a **Companion Action Token** to perform the corresponding Action with that **Companion**. For more information, see the ***Companions*** section on page 37.

EXCHANGE

A Character exchanges any number of items with another Character on the same Tile (they may take and/or give items). At the end of this Action, the limit on the number of items that can be owned must be respected. If a card is exchanged, it retains its status: restored or exhausted. **Items** that can be exchanged are:

- **Equipment**
- **Treasures**
- **Discovery Cards** with Character Usage
- **Medication**
- **Potions**
- Thalers

TRADE

A Character located on a Tile with a Market may resolve any number of these options:

- **Refine: discard** 2 to gain 1 .
- **Synthesize: discard** 4 to gain 1 Potion.
- **Purchase: discard** equal to the cost of 1 Equipment available in the Market (see page 42) to gain it.

Component Actions

A Component Action is an Action in which the Character resolves the Effect of a game component that has a Cost. (Effects with no Cost do not count as Actions.) You can find details of Card Effects on each card itself, and Token Effects in the sections of the Rulebook dedicated to those tokens.
Characters may perform Component Actions at any time during the Action Phase. However, Component Actions may not interrupt any other Effects or Actions: if another Action or Effect is currently being resolved, complete this before performing your Component Action. The only exception to this is if the Component Action has a Condition that is fulfilled in the middle of another Action or Effect. In this case, you may pay the Cost and resolve the Effect of the Component Action immediately.
See page 18 for a complete description of how to resolve an Effect.

QUICK EFFECTS

Some Effects have a **Quick** icon inside an orange box. A Character may perform a **Component Action** to resolve a **Quick** Effect not only in the Action Phase, but also during the Opening and Closing Phases, as long as the Effect's Condition is met.

End of Game

Near the beginning of each Chapter Book, you'll find that Chapter's **End of Game** conditions:

- A specific condition is met, or
- The last **Time Token** is discarded.

In the same section, the Chapter Book tells you which page to turn to once you've fulfilled one of these conditions: you'll find the corresponding Epilogue A there.
The **Epilogue** for the End of Game condition you met describes how the story unfolds based on the progress made by the Characters over this game session.

After reading an Epilogue, Characters must perform Upkeep B (see below).
Once you've done this, you'll be directed to the next Chapter C in the Campaign.

VICTORY OR DEFEAT

If you end the game by successfully completing that Chapter's goal, you'll be directed to a positive Epilogue. However, if you are unable to complete the goal and/or run out of time, your Characters fail to gain control of the narrative and the Epilogue could have some nasty surprises in store. Either way, move on to the next Chapter; you don't need to repeat a Chapter, even if you failed in your mission!
Try to successfully fulfill as many Chapter goals as possible, as this will give you advantages for the rest of the Campaign. These include unique Discovery Cards called Milestones, which will interact with Special Rules in later Chapters to help out the party.

CHAPTERS WITH MULTIPLE ACTS

Some Chapters are divided into two Acts. For these Chapters, the Chapter Book's usual End of Game section is replaced by an End of Act I section for the first Act, with the End of Game section reserved for the end of the second and final Act.
Chapters divided into Acts are designed to be played straight through, like a normal Chapter. Continue your game session until you complete the final Act and fulfill one of the End of Game conditions.
You'll be directed to complete Upkeep at both the end of an Act and the end of a game. Once you've completed Upkeep, if you reached the end of the game, you can now save the game in preparation for your next session (see below).
If instead you've only completed Act I of this Chapter, the Chapter Book will now tell you how to set up the Map for the next Act, as well as the Goal, Special Rule(s), and End of Game conditions for that Act.

At the **end of an Act**, before performing **Upkeep** and continuing to the next Act, follow the steps below to reset the Game Area:

1. Remove all **Characters** and all **Companions** from the Map and place them next to their associated Character Boards. Note Characters' and Companions' **Wounds** and **Focus** : unless otherwise specified, these are carried over as-is to the next Act.
2. Each Character recovers all of their **Exploration Tokens**.
3. Discard all **Discovery Cards** in the following categories: **Search**, **Task**, **Maneuver**, **Market**, and **Enemy**. Do no discard Discovery Cards in the following categories: **Companion**, **Milestone**, and **Treasure**.
4. Remove all Enemies from the Map. Return all Enemy Cards used during this Act to the box, including the cards in the Enemy Deck, in the discard pile, currently in play, and waiting to be activated.
5. Remove all the Tiles that make up the Act I Map from the Play Area.
6. Remove all Cubes on the **Progress Track**.

Upkeep

Upkeep consists of a series of actions performed at the end of a Chapter or Act, such as gaining Discovery Cards to record the completion of a goal or advancing Characters to the next level.
All actions to be performed during Upkeep are listed in the dedicated section of the Chapter Book. For more information on leveling up, read the "Leveling Up" section on page 34.

Saving a Game

At the end of a Chapter, players can save their progress up to that point to pause the Campaign and resume it later. To do so, each player takes a **Campaign Sheet** and notes down the following information:

- The **level** reached by your Character.
- The next **Chapter** that the party will play.
- The name of each piece of **Equipment** and each **Treasure** in your Character's possession, and the number of Cubes on each of them.
- Any Thalers, Medication, and Potions they have.
- All **Discovery Cards** with **Character** Usage or that are **Non-Transferable** that they own.
- One of the players notes down all the Discovery Cards with **Party** Usage currently in play.

Once you've done this, you're ready to pack up the game!

Please note: you don't need to record the number of Wounds and Focus your Characters and Companions have at the end of the game.

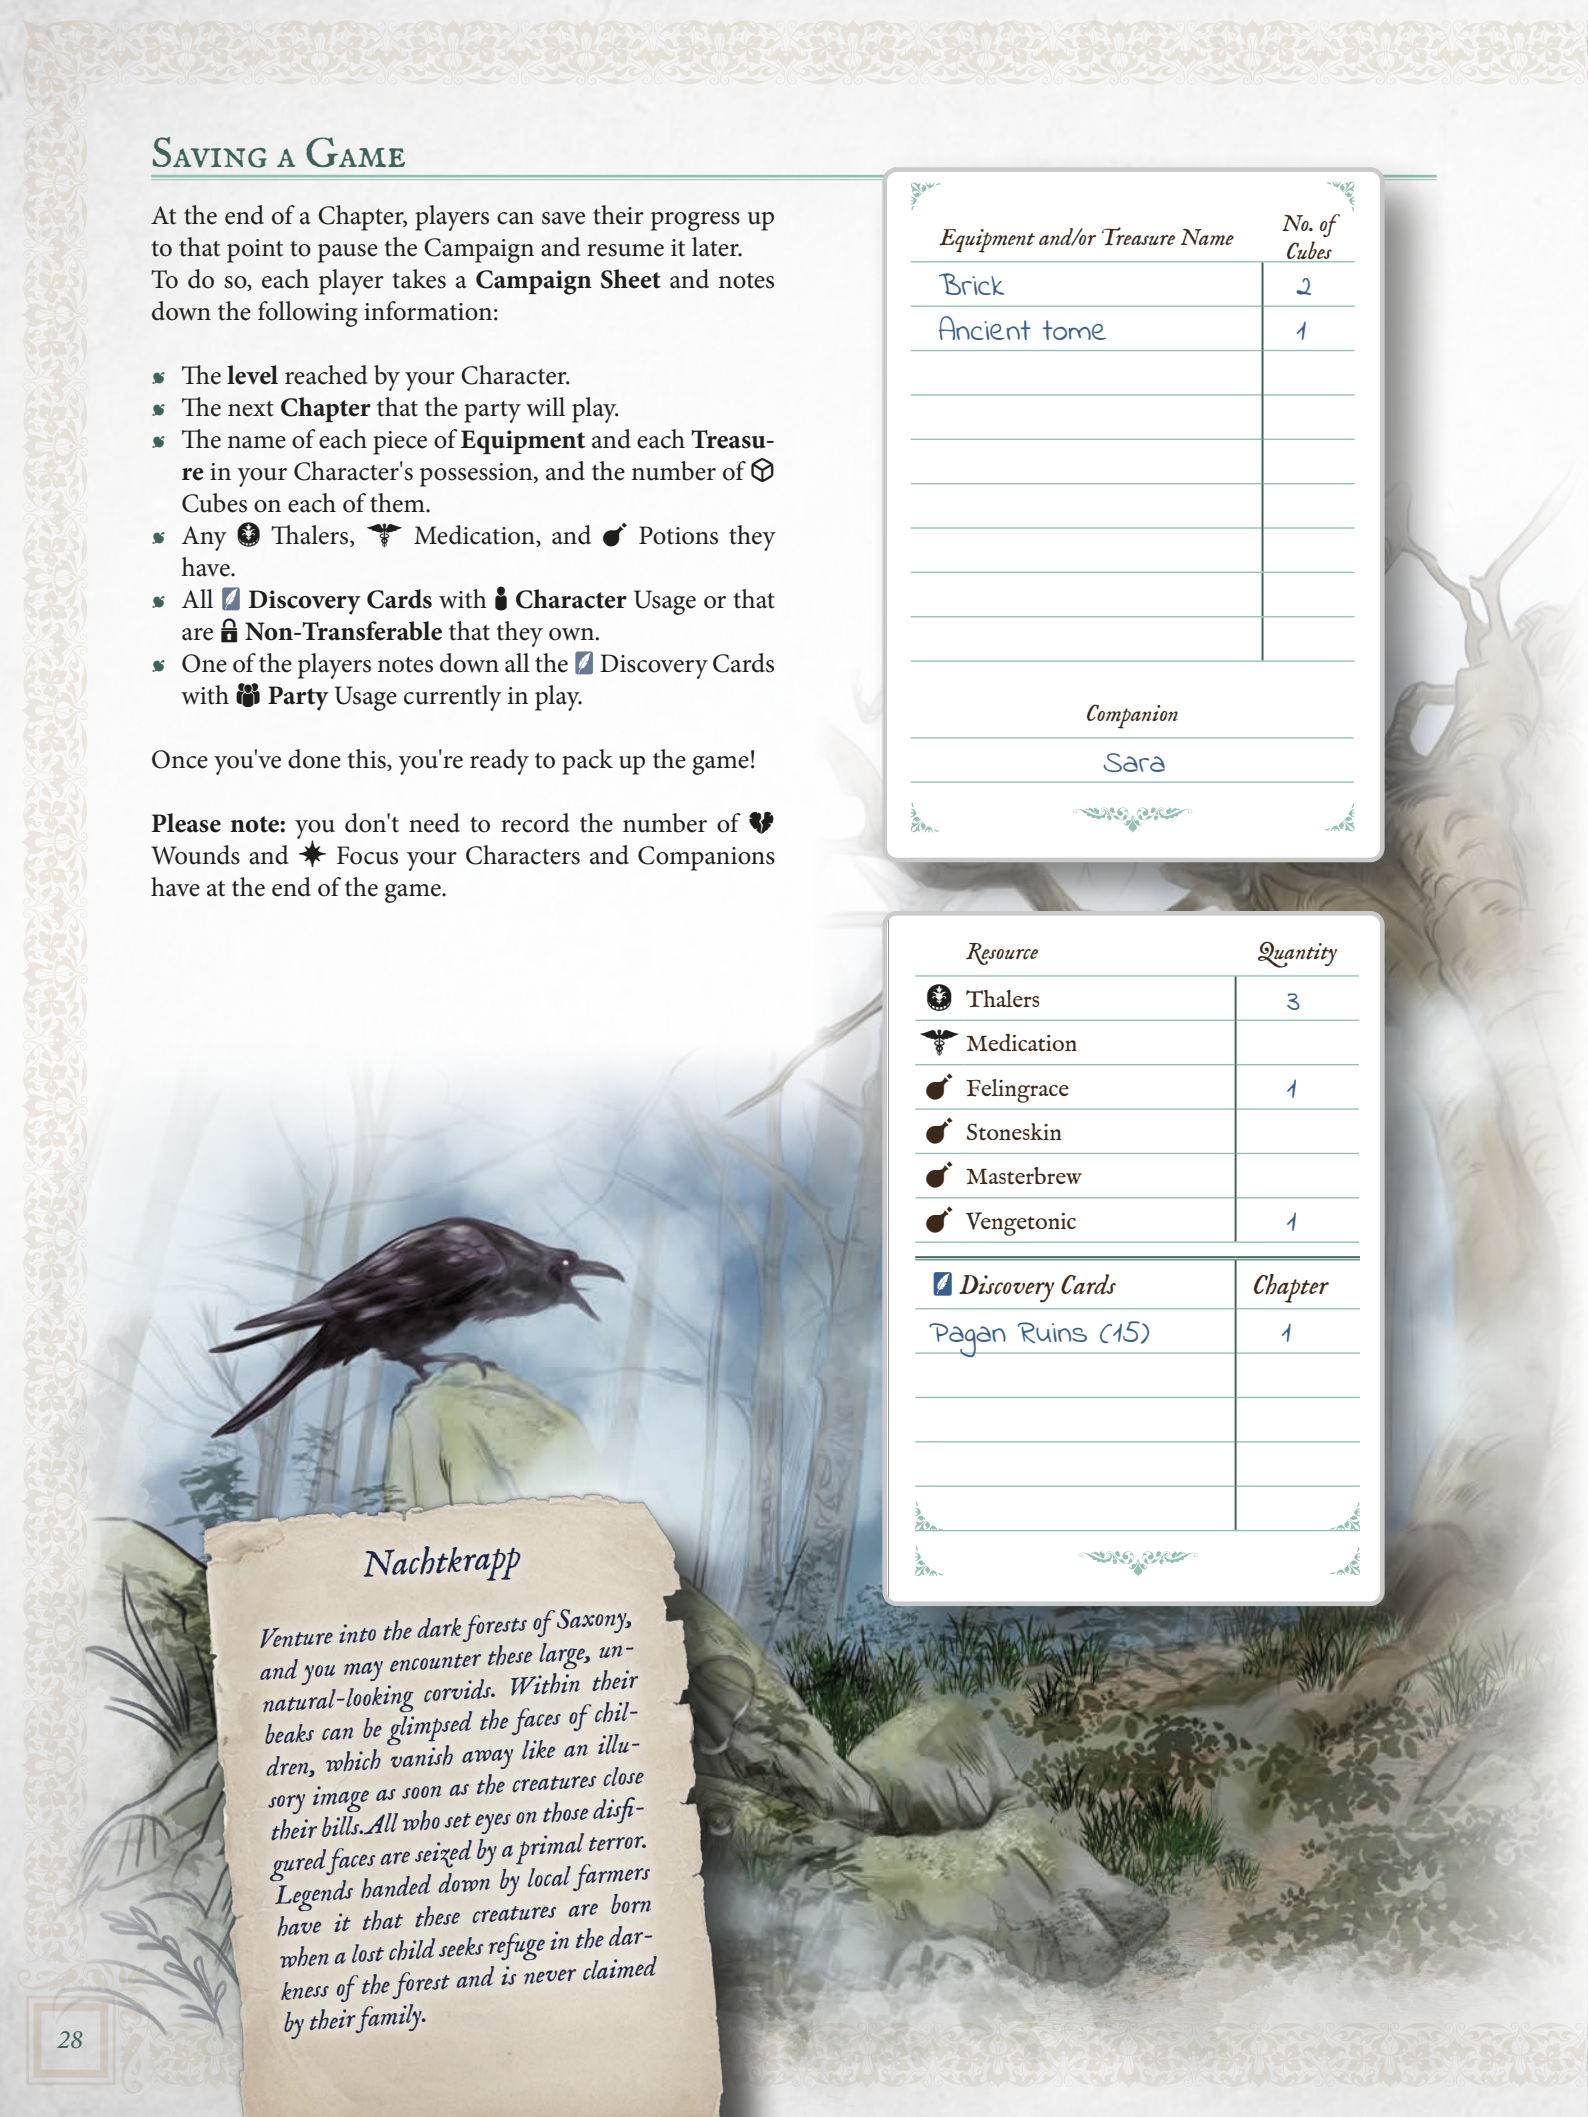
Equipment and/or Treasure Name	*No. of Cubes*
Brick	2
Ancient tome	1

Companion

Sara

Resource	*Quantity*
Thalers	3
Medication	
Felingrace	1
Stoneskin	
Masterbrew	
Vengetonic	1

Discovery Cards	*Chapter*
Pagan Ruins (15)	1



Nachtkrapp

Venture into the dark forests of Saxony, and you may encounter these large, unnatural-looking corvids. Within their beaks can be glimpsed the faces of children, which vanish away like an illusory image as soon as the creatures close their bills. All who set eyes on those disfigured faces are seized by a primal terror. Legends handed down by local farmers have it that these creatures are born when a lost child seeks refuge in the darkness of the forest and is never claimed by their family.

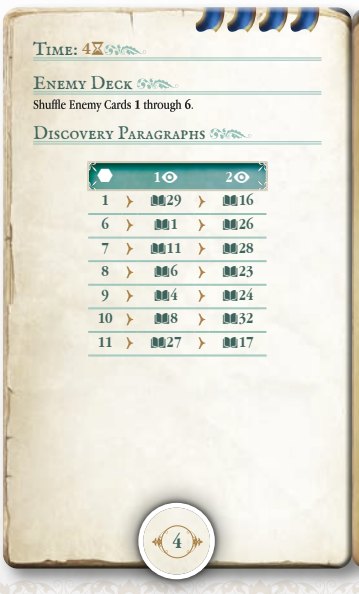
Chapter

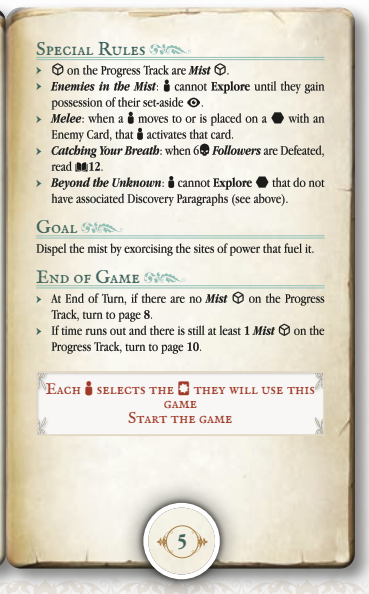
Read on to learn how the various game components that make up a Chapter work.

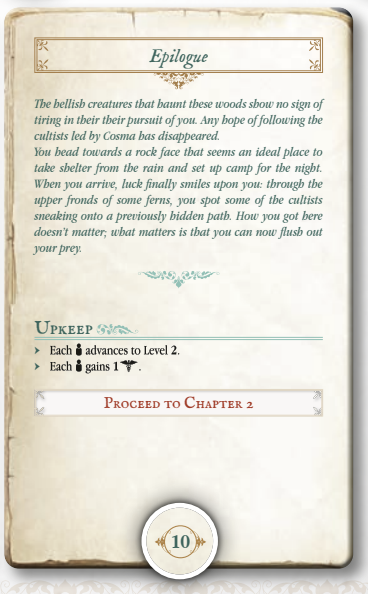
Chapter Books

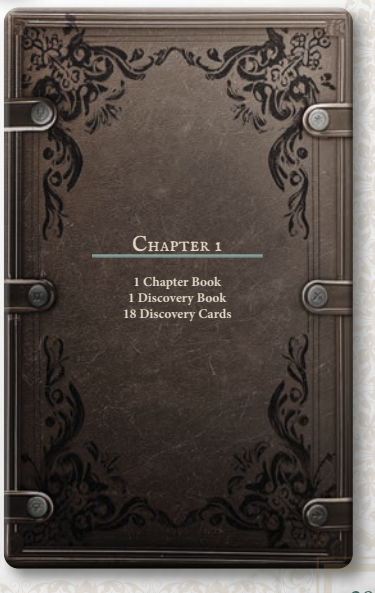
Each Chapter Book contains all the information you need to play a Chapter.

Cover	Chapter number, title, and illustration.
Page 2	Chapter Prologue.
Page 3	Heading telling you whether this Chapter is a **Story Chapter** or a **Challenge Chapter**, and the instructions for setting up the Map before you begin play.
Page 4	Information on the time you'll have in which to complete the game, which cards will make up the Enemy Deck, and the chart of Discovery Paragraphs you'll use when Exploring the Map.
Page 5	Any **Special Rules** for the current Chapter, a useful **Goal** to summarize the main objective to be achieved by the group, and the **End of Game** conditions.
Epilogues	Only after the game has ended will players be directed to read an **Epilogue** (page number specified in End of Game section), which may be positive or negative, depending on how your game unfolded. Each Epilogue has its own corresponding **Upkeep** to be performed.
Back	List of materials for this Chapter.









Discovery Books

Each **Story Chapter** comes with a Discovery Book that will take you through that Chapter's narrative developments, guided by the Actions you take during the game. Each Discovery Book is divided into numbered Paragraphs, and players read a 📖 Paragraph only when an Effect allows them to do so.

Reading a Paragraph from the Discovery Book typically represents the exploration of an area, the appearance of an Enemy, or the progress of a quest.

Make sure that all players can hear when you read from the Discovery Book. While you'll read Paragraphs as a group, they involve only the individual Character performing an action, and the Effects described only affect that Character, unless otherwise specified.

PARAGRAPH EFFECTS

Paragraphs in the Discovery Book usually end with an Effect relating to the events of the Paragraph.

In some cases, you will have a choice, with each choice allowing you to resolve a different Effect. The different options are grouped and organized in different columns of a chart.

Players may freely discuss the choice to be made, but the final decision always rests with the Character currently performing an action.

Once you've made a decision, resolve only the Effect corresponding to your choice.

Effects in the Discovery Book always have an ▶ Outcome and may also have a ❗ **Condition** and/or a ⛔ **Cost**.

- If an Effect features a ❗ **Condition**, this must be met in order to resolve this Effect; otherwise, you may not resolve it.
- If an Effect fetures a ⛔ **Cost**, the Character must pay this cost in order to choose this Effect; otherwise, they may not resolve it.

If you are unable to resolve any of the available Effects, simply move on with the game without doing so.

Example: Effect with a Cost

If the Character has at least **2** ✸ Focus, they can choose either of the options shown below. If they choose "You check the surrounding area," they must lose **2** ✸ Focus as indicated by the Cost. If, on the other hand, you have fewer than **2** Focus ✸, you must choose the option: "You approach the cave."

A	B
You check the surrounding area.	*You approach the cave.*
⛔ **2**✸. ▶ Read 📖**41**.	▶ Read 📖**34**.

Example: Effect with Condition

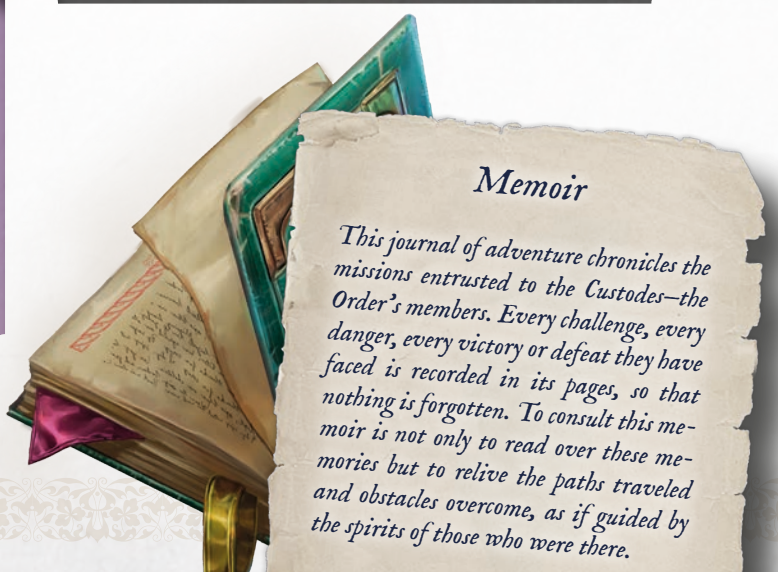
If the Character has the Companion ***Sara***, they can choose either option. If they don't, they can only choose the option "You welcome the soldier into your ranks."isoner."

Resolve one of the following Effects:

A	B
You welcome the soldier into your ranks.	*Sara reunites with her brother Ludwig and you welcome the soldier into your ranks.*
▶ Activate 🂠**15** ***The Prisoner***.	❗ A 🧍 has 🎭 ***Sara***. ▶ Read 📖**37**.

Insight: Reading the Discovery Book

When your Character is instructed to read a 📖 Paragraph from the Discovery Book, we recommend asking another player to read it aloud to you to enhance your immersion in the game. This way, you can simply listen and concentrate on making your choices.

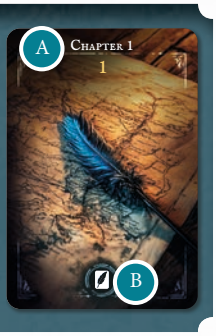


Discovery Cards

Discovery Cards represent different events that a Character may encounter during a game. Each Story Chapter or Challenge Chapter comes with its own deck of Discovery Cards, and each card is identified by a **number** on the back. A Discovery Card comes into play when an Effect instructs a Character to activate that card.
When a Character **is instructed to activate Discovery Card X,** the player searches the deck for the card numbered **X** and puts it it into play, face up.

When an Effect indicates that a Discovery Card is to be **discarded**, place that card in the Discovery Card discard pile. It is no longer considered in play.
In the unlikely event that an Effect instructs you to activate a Discovery Card that has been discarded or is already in play in the Play Area, ignore that Effect.

Anatomy: Discovery Card - Back



- (A) **Chapter:** the Chapter this card will be played in
- (B) **Number:** used to identify the card within the Chapter

Insight: Discovery Card Classification

As long as a Discovery Card is in the Discovery Card Deck, only its back is visible, and the game refers to that card solely as a **Discovery Card**.
In this Rulebook, we refer to Discovery Cards by their type. For example, a Task Discovery Card is simply called a Task Card.

DISCOVERY CARDS: TYPES AND USAGES

Each Discovery Card has a symbol associated with its Usage. The different Usages are:

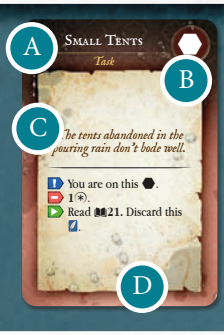
- **Character** - a Character who **activates** a Discovery Card with this Usage places it next to their Character Board. Only the Character who owns this card can resolve its Effect; however, they may give it to another Character via the **Exchange** Action.
- **Non-Transferable** - a Character who **activates** a card with this Usage places it next to their Character Board. Only the Character who owns this card can resolve its Effect and they cannot give it to any other Character.
- **Party** - a Character who **activates** a card with this Usage places it next to the Book Stand. This card is now considered to be in the party's possession and any Character may resolve its Effect.
- **Tile** - a Character who **activates** a card with this Usage places it on the Tile on which they are currently located. The card is not in the possession of any specific Character but affects that particular . The Effect shown on the card itself describes how it can be resolved.

Discovery Cards come in seven types:

TASK CARDS

Task Cards represent jobs to be done or tests to be taken, as described by the card itself. Task Cards play a very important role in advancing the game.
At the end of a Chapter or Act, discard all Task Cards.

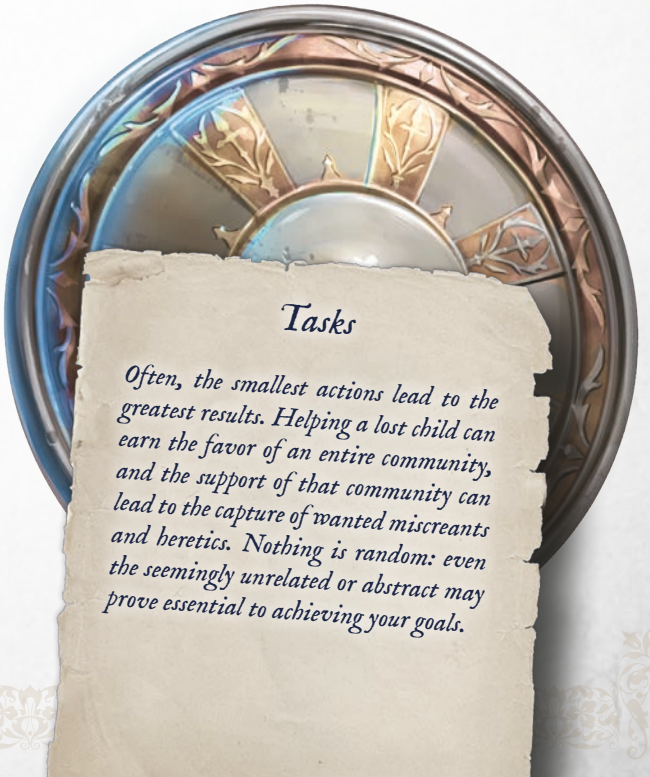
Anatomy: Task Card



- (A) **Name and type**
- (B) **Usage**
- (C) **Descriptive text**
- (D) **Effect**

MILESTONE CARDS

Milestone Cards serve to record the Characters' completion of particular objectives. Sometimes they will have an Effect, while in other cases they will simply have a descriptive text for you to read. During the Campaign, certain Special Rules may apply if the Characters possess a specific Milestone Card.



Please note: at the end of each Chapter or Act, keep any Milestone Cards you currently have, unless instructed otherwise.

Anatomy: Milestone Card

- A **Name and type**
- B **Usage**
- C **Descriptive text**

MARKET CARDS

Market Cards represent locations where you can spend **Thalers** to stock up on new items.

When a Character activates a Market Card, they place it next to the Tile on which they are currently located. They then draw a number of Equipment Cards from the Equipment Card Deck equal to the Equipment C value on the Market Card and place them face up within view of all players. Place the Market Token on the Tile. At the end of a Chapter or Act, discard all Market Cards.

Anatomy: Market Card

- A **Name and type**
- B **Usage**
- C **Equipment:** the number of Equipment items available in this Market
- D **Effect**

ENEMY CARDS

Enemy Cards can be found in the Enemy Deck or in the Discovery Deck of a Chapter.

An Enemy Card represents a miniature that will work to hinder the Characters.

For more information on Enemies, see the ***Enemies*** section on page 39.

At the end of a Chapter or Act, discard all Enemy Cards (both Enemy Discovery Cards and Enemy Cards from the Enemy Deck).

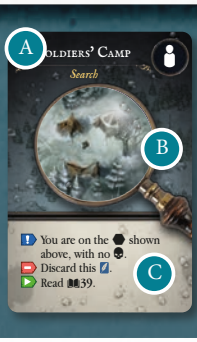
SEARCH CARDS

Search Cards represent clues about particular locations that you must find in order to continue the game.

Each Search Card shows part of the illustration on a particular Tile. In order to use the Search Card, a Character must be on the Tile with the illustration shown on the card.

At the end of a Chapter or Act, discard all Search Cards.

Anatomy: Search Card



- A **Name and type**
- B **Illustration:** shows part of the illustration from a particular Tile
- C **Effect**

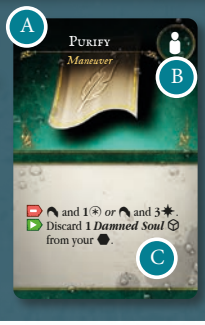
Insight: It's All in the Details!

Some locations are easier to find (generally those in the woods). Others are harder to spot, but looking closely at the Tiles to uncover their details is part of the game!

MANEUVER CARDS

Maneuver Cards represent new and special Effects available to a Character during a Chapter. At the end of a Chapter or Act, discard all Maneuver Cards.

Anatomy: Maneuver Card



- A **Name and type**
- B **Usage**
- C **Effect**

COMPANION CARDS

Companion Cards represent allies controlled by the Characters.

For more information on Companions, see the ***Companions*** section on page 37.

Please note: at the end of each Chapter or Act, keep any Companion Cards you currently have, unless instructed otherwise.

Characters

Each character is represented by their own specific miniature.

Proficiencies

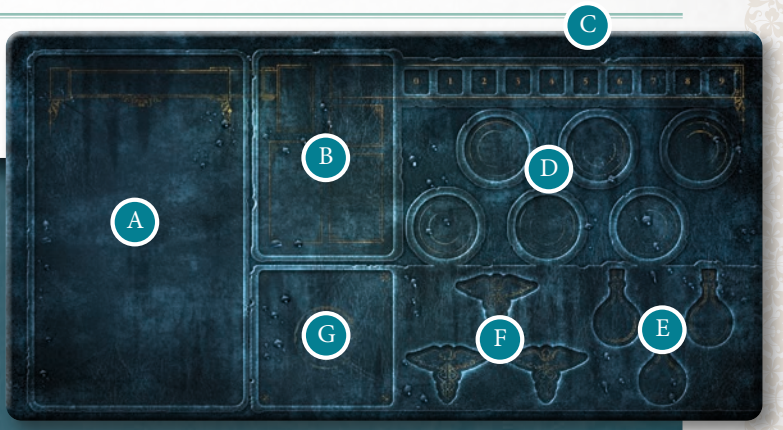
Each member of the Order operates in their own way. Some serve through force, letting their blades decide the course of their battles. Others lead through experience, gathering companions and followers under the banner of their unshakeable faith. Then there are those who use their ingenuity as a weapon, finding solutions where others see only obstacles. Finally, there are those who, through prayer and the dogmas of faith,uncover paths that remain hidden to the eyes of others.

Character Classes

Each Character Class is associated with a unique color and **banner**. The classes available in the core game are: **Soldier**, **Leader**, **Artificer**, and **Tactician**.

Character Boards

Each Character has a Character Board that they will use to keep track of their own progress and game information.



Anatomy: Character Board

- (A) **Character Card Slot**
- (B) **Level Card Slot**
- (C) **Focus Track**
- (D) **Character Action Token Slots**: each slot can hold **1** Character Action Token
- (E) **Potion Slots**: each slot can hold **1** Potion
- (F) **Medication Slots**: each slot can hold **1** Medication
- (G) **Thaler Slot**: space for all the **Thalers** in the Character's possession

Character Cards

Each Character Card displays the corresponding Character's game information on the front and a narrative text on the back.

Anatomy: Character Card

- (A) **Name**
- (B) **Class**: a unique color and banner for each Character Class
- (C) **Illustration**
- (D) **Character Actions**
- (E) **Starting Skills**
- (F) **Lore:** the character's backstory

Level Cards

A Character's current Level Card determines their various capabilities and limitations based on the Level they have reached.

LEVELING UP

When a Character **Levels Up**, they change (flip) the Level Card visible on their Character Board so that it corresponds to the Level they have reached. You will usually be instructed to Level Up during Upkeep at the end of a game. This may involve gaining new Character Action Tokens, or you may need to move the Block Cube (gold) on the Focus Track.

Stats that have changed at your new Level are highlighted in gold on the new Level Card.

Anatomy: Level Card

- (A) **Current Level**
- (B) **Class**: a unique color and banner for each Character Class
- (C) **Maximum Focus**: the maximum ✸ Focus value that your ♟ can have on their Focus Track
- (D) **Health**
- (E) **Character Action Tokens**: the type and number of Character Action Tokens available to the Character
- (F) **Skills**: the maximum number of Skills available to the Character during a game
- (G) **Equipment**: the maximum number of 🎒 Equipment Cards that the Character can have

Character Action Tokens

Character Action Tokens are one of the resources that a Character uses to interact with the game world. Each Character Action Token displays a symbol: ⚲, ⚔, or ⛨. The ✳ icon is used to mean any Action Token.

♟ Characters use Action Tokens to perform the **Character Actions** listed on their Character Cards.

The type and number of Character Action Tokens a Character has available to them at their current Level is indicated on their current Level Card (see (E) in the box above).

Skill Cards

A ◘ Skill Card makes one or more Effects available to the Character who Learns that Skill. Each Character has their own set of Skill Cards, which make up part of their unique characterization.

The back of a Skill Card indicates the Level that the Character must have reached in order to Learn it.
If the back of a Skill Card shows a Character's name and a Level equal to or lower than their current Level, that Character is considered to have Learned that Skill.
Each game, each Character is given the opportunity to select Skill Cards to use over the course of that session. The number of Cards they may select is indicated on their current Level Card. They may only select Cards that they have already Learned.
You will be prompted to select available Skill Cards at the end of Chapter Setup.

> Ogni ♟ seleziona le ◘.
> Iniziate la partita.

Place your chosen cards next to your Character Board. In Chapters with more than one Act, you will be given the opportunity to select Skills as normal at the end of Setup for Act I, and also the chance to select new Skills at the end of Setup for Act II.

Anatomy: Skill Card

- (A) **Character Name**: Character who may Learn this Skill
- (B) **Class**: unique Class color
- (C) **Level**: Level at which this Skill is **Learned**
- (D) **Name**: name of the Skill
- (E) **Banner**: in the shape and color associated with your ♟ Character's Class.
- (F) **Effect**.

Back *Front*

Exploration Tokens

Exploration Tokens allow you to keep track of which Character is Exploring which Tile and how many times in total that Tile has been Explored. Each Class has a set of 10 👁 **Exploration Tokens** in the shape of its Banner.

Schism

Blinded by their faith in Cosma, a group of Perceivers who had once sworn allegiance to Magister Bartholomäus have abandoned all ties to their former sect in order to devote themselves instead to this new master. Under his guidance, these heretics of the Totentanz have focused their practices on controlling aberrant part-raven, part-human creatures from the realms of deviation, madness... and death. In so doing, Cosma has broken definitively with the discipline of the Totentanz and the authority of Bartholomäus.

Focus

Focus ✸ represents a Character's concentration and inner energy. This resource will allow you to accomplish extraordinary feats and use your Skills.

The amount of Focus currently available to a Character is indicated by the value on which the ⬡ Cube (white) is placed on that Character's Focus Track.

The Block Cube (gold) is used to highlight a Character's maximum Focus value. Place it on the slot immediately following that maximum value. If a Character's **maximum Focus** value is 9, remove the **Block Cube**.

Each time a Character **gains** ✸ **Focus**, they move the ⬡ Cube on their Focus Track to the **right** by a number of slots equal to the Focus gained. They can never move the Cube into the slot with the **Block Cube**, nor can they pass that slot; any excess Focus is lost.

Whenever a Character **loses** ✸ **Focus**, move the ⬡ Cube on their Focus Track to the **left** by a number of slots equal to the Focus lost. A Character's Focus can never be less than **0**.

Defeat of a Character

During the game, a Character may accumulate 💔 **Wounds** equal to or greater than their Health value. If this happens, the Character is Defeated.
When a Character is **Defeated, lay their miniature on its side**. A Defeated Character remains Defeated until:

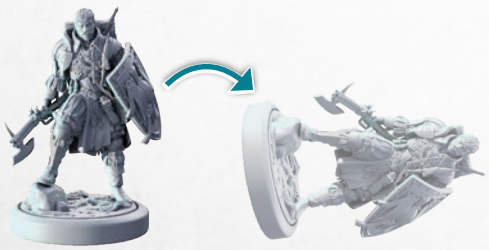
- They perform the **Recover** Action (see page 24), or
- A Chapter or Act ends.

While a Character is Defeated, they can't resolve any Effects or perform any Actions other than Recover
.
When resolving Effects, do not take Defeated Characters into account unless specifically instructed to do so.

If a Character is Defeated while in the process of resolving an Effect, they are considered Defeated as soon as that Effect has been completely resolved.
In the rare case that a Character is Defeated while reading a Paragraph in the Discovery Book, they are considered Defeated as soon as they finish reading that Paragraph, or as soon as they finish reading any Paragraphs that that Paragraph directs them toward.

Example: Ignoring a Defeated Character

When resolving an Effect that applies to a Character, a Defeated Character cannot be the chosen target.
For example, an Enemy has the following Effect: " ! At End of Turn. ▶ Places itself on the closest ⬢ with a 🧍 on it." This Enemy can't choose a Tile on which a Defeated Character is located, unless there are other Characters there too.



Undefeated Character *Defeated Character*

Companions

A **Companion** is an ally controlled by a Character. There are various Companions that you might meet over the course of your Campaign. When you do, you'll activate their Companion Discovery Card. These Companions may join your party, depending on the choices made by the players. In addition, the **Leader** Class has **Class Companions** linked to its Skills.

A Companion is represented on the Map by a Companion Token, rather than a miniature, but follows the rules described in the ***Basic Concepts*** section regarding movement, placement, and Wounds.

Companion Cards

When an Effect instructs a Character to **activate** a **Discovery Card** and that card is a **Companion**, the Character gains that Companion.
A Character may not have more than **1** Companion Discovery Card.
If a Character already has a Companion when they activate a Companion Discovery Card, they can choose to discard the Companion they already have to make room for the new one. Alternatively, they can give the new Companion to any other Character, who in turn can make the same choice. If no Character wants to obtain the new Companion, they are discarded.

After a Character has gained a Companion, they place the Companion Card next to their Character Board and place the **Companion Token** on their own Tile.

Anatomy: Companion Card

- A **Name**
- B **Illustration**
- C **Health**
- D **Walk Tokens**
- E **Fight Tokens**
- F **Effect**

Class Companion:

Companion Action Tokens

Characters may use Companion Action Tokens to Command their Companions (have them perform an Action).
When a Character gains a Companion, they receive the number of Companion Action Tokens indicated on that Companion's Companion Card. There are two types of Token:

- **Walk**
- **Fight**

Place the Tokens you receive face up next to the Companion Card. They are associated with that Companion as long as they remain with you.

Insight: Moving a Companion and Aggression

Keep in mind that every time a **Companion** moves, this could provoke an Enemy Aggression; see the ***"Aggression"*** section on page 41.

Playing a Companion

COMPANION ACTIONS

Companion Action Tokens allow you to perform Actions. As a **Free Action**, a Character can exhaust a **Companion Action Token** to perform the corresponding Action with that Companion.
The Actions that a Companion can perform are:

- **Walk:** the Companion moves **once**.
- **Fight:** resolve this Action in the same way as the Fight Action performed by a Character, but using **Companion Dice**.

COMPANION FIGHT DICE

When a Companion performs the Fight Action, they use their beige Companion Dice that as with a Character, comprise an Attack Die and a Defense Die.
Characters can't use Skills or game component Effects on a Companion unless otherwise specified.

DEFEAT OF A COMPANION

When a Companion is Defeated, discard their Companion Card and remove their Companion Token from the Map. The Character who owned that Companion discards all associated Companion Action Tokens. Once a Companion Discovery Card has been Defeated, they cannot Recover; they will no longer be available for the rest of the Campaign.

IF A COMPANION LEAVES THE PARTY

At certain points in the game, Companions who have managed to survive long enough may achieve their personal goal and leave the party. When this happens, discard their Companion Card and remove their Companion Token from the Map. The Character who owned that Companion discards all associated Companion Action Tokens. When the Companion leaves your group, the party will be instructed to gain a Discovery Card or one-time Effect as a reward.

IF A COMPANION RECEIVES A REWARD

When a Companion defeats an Enemy, the Character who owns that Companion gains the Reward indicated on the Enemy Card.

DISCARDING A COMPANION

When you discard a Companion, return their Companion Card to the Discovery Card Deck for its Chapter.

Class Companions

A Character belonging to the **Leader** Class has unique Companions that can enter the game thanks to that Character's **Skills**. Class Companions follow the same rules as normal Companions, with the following exceptions:

- They don't count toward the **limit of 1** Companion per Character; there is no limit to how many Class Companions a character may have.
- Class Companions are not placed on the Map at the beginning of a Chapter or Act. Instead, the Character belonging to the **Leader** Class must resolve their Skill in order to place them.
- Each Class Companion **Card** features the name of the Character to whom they belong. Unlike Companion Discovery Cards, which remain face down until activated, you may consult this card at any time. After the Character has placed the Companion on the Map for the first time, they also place their Companion Card next to their Character Board.
- When a Class Companion is **Defeated, remove their Token from the Map but keep their** Companion Card in play until the end of the game. The Character may place that Companion's Token back on the Map as indicated by their Skills.

Enemies

An **Enemy** is a miniature that represents a threat to the Characters and will hinder their progress in the Campaign. During a game, the Characters encounter various Enemies, each represented on the Map by their miniature and an Enemy Card detailing their game information.

Enemy Cards

The **Enemy Deck** includes most of the Enemies that Characters will encounter during a REQUIEM Campaign. Each Card in the Deck indicates that Enemy's game information and is identified by a number on the back.

The **Enemy Deck Token** goes on top of the top card in the deck to cover its number and avoid spoilers.
As described in the "Setting Up a Story Chapter" section on page 13, the Chapter Book will tell you which Enemy Cards to include in the Enemy Deck for each Chapter.

ACTIVATING AN ENEMY CARD

When an Effect instructs a Character to activate a card from the Enemy Deck, that Character draws a Card from the bottom of the Enemy Deck. They place the card face up next to the Tile on which they are currently located. They then place the corresponding Enemy miniature on that Tile.

If a Character is told to activate a Card from the Enemy Deck, but the Deck is empty, shuffle all Cards in the Enemy Deck discard pile to form a new Deck.

Some **Discovery Cards** feature an Enemy. When a Character activates a Discovery Card and it is an Enemy Card, proceed as when activating a card from the Enemy Deck. Remember to discard these into the Discovery Card Deck discard pile, not the Enemy Deck discard pile.

MOVING AN ENEMY

In some situations, an Enemy may move to or place itself on a Tile other than the one it is currently on. When this happens, move the corresponding Enemy Card so that it is next to the Enemy's new Tile. Moving an Enemy doesn't trigger any Character reaction.

Anatomy: Enemy Card

- (A) **Number**
- (B) **Miniature:** the miniature you'll place on the Map to represent this Enemy
- (C) **Name**
- (D) **Illustration**
- (E) **Usage**
- (F) **Health**
- (G) **Sneak Attack:** the number of Wounds you'll inflict on this Enemy when you hit them with a Sneak Attack
- (H) **Aggression:** the number of Wounds this Enemy inflicts when they successfully perform Aggression and the results of the Destiny Die they need to roll to do so
- (I) **Reward: gained when you defeat this Enemy**
- (J) **Traits**
- (K) **Effects**

Enemy Dice

When a Character or Companion performs **Fight** against an Enemy, the player controlling them rolls the Enemy Dice. Although these dice are rolled by a player, for the purposes of the game rules, the Enemy Dice are considered to have been rolled by that Enemy (see page 24).

Traits

A **Trait** is a special Effect possessed by an Enemy and indicated on their Enemy Card. The Traits featured in the game and their respective Effects are as follows:

Vigilant	This Enemy inflicts **1** Wound on the Character who activates their Enemy Card.
Lethal	This Enemy adds to the result of their **Attack Die**.
Reactive	If one or more Characters and/or Companions move onto their Tile, this Enemy performs an **Aggression** against one Character or Companion.
Blocking	Characters and Companions on the same Tile as this Enemy can't move.
Sturdy	If this Enemy rolls at least during a **Fight** Action, they inflict **1** on the Character or Companion they are Fighting.
Chosen	Only a Character (not a Companion) located on the same Tile as this Enemy can inflict the final **Wound** that will defeat this Enemy.

Defeat of an Enemy

During the game, Characters or their Companions can inflict Wounds on an Enemy. When an Enemy is **Defeated**, remove its miniature from the Map and discard its Enemy Card. The Character or Companion that defeated that Enemy, i.e., the one who inflicted the last Wound, gains the indicated on that Enemy's Card.
The Character who gains the Reward may, for example, get to draw a Random Reward Token, gain some Thalers, or read a Paragraph from the Discovery Book.
If an Enemy is Defeated during the resolution of an Action, they are only considered Defeated once that Action has been completely resolved.

Sneak Attack

Characters are trained to exploit every situation to their advantage.
A Sneak Attack is an excellent way to inflict damage without the possibility of being injured in return, but not all Enemies are vulnerable to this type of Attack.
In order to perform a Sneak Attack, you must have Equipment, a Skill, or another component that allows you to do so.

You don't need to roll dice when performing a Sneak Attack. When a Character performs a Sneak Attack, they choose an Enemy on the Tile they are on and inflict a number of Wounds on that Enemy equal to that Enemy's Sneak Attack value.

Example - Sneak Attack

Beatrice is on the same tile as an Enemy with Health value =**2** and Sneak Attack value =**2**. Beatrice decides to activate the Effect of her Brick (Equipment), which allows her to perform a against an Enemy on her Tile. Beatrice's Sneak Attack inflicts 2 Wounds on that Enemy, defeating it.

Aggression

The Enemies' goal is to hinder the Characters, so they take advantage of every possible opportunity they have to try to inflict Wounds on a Character or Companion.

An Enemy can perform an Aggression at various points during the game. The most common occasions are:

- **At End of Turn**, as indicated in the "Game Turn" section on page 22.
- Whenever a Character or Companion leaves a **Tile** on which that Enemy is located.
- When another Game Effect indicates to do so.

When an Enemy performs an Aggression, roll the **Destiny Die** to determine whether it is successful. For the purposes of the game rules, the die is considered to have been rolled by the Enemy. The Aggression is successful if the die result shows one of the symbols displayed next to the Enemy's Aggression value on their Card. If more than one Aggression must be resolved at the same time, the die must be rolled for each of these Aggressions, in the order of the players' choice.

If the Aggression is successful, the Enemy inflicts a number of **Wounds** equal to their Aggression value on their target Character or Companion.

AGGRESSION DURING MOVEMENT

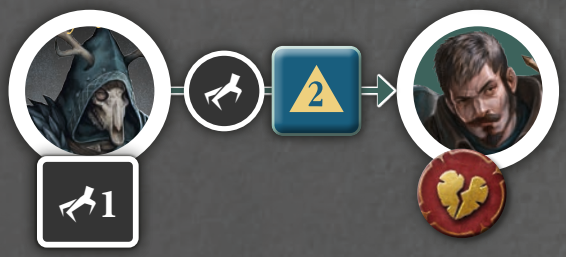
When an Enemy performs an Aggression, the Aggression is considered to occur on the Tile where the Enemy is located. If the target Character or Companion is **Defeated before completing their movement, they stay on their original Tile.**

Nemeses

In Challenge Chapters, Characters will face a Nemesis, a very powerful Enemy who plays an important role in the Campaign. The Nemesis follows all the rules that apply to Enemies as described in this section. For more information on Nemeses and how to play a Challenge Chapter, see the "Challenge Chapter Setup" section on page 14.

Example: Aggression

Valerio performs **Move** in an Area with an Enemy that has the ***Reactive*** Trait.



The Enemy performs an Aggression against **Valerio**, rolling the and getting . This is one of the symbols on the Enemy's Card, so the Aggression is successful and the Enemy inflicts **1** on **Valerio**. Valerio can no longer Explore that Tile because of the Enemy's presence there, so he decides to **perform Walk**to move to an adjacent Tile.

Before **Valerio** can exit, the Enemy performs a new Aggression against Valerio. They roll the **Destiny Die** and obtain . In this case, the Aggression is unsuccessful and the Enemy doesn't inflict Wounds on Valerio. He can now leave the Tile, unharmed

Playing a Challenge Chapter

In a **Challenge Chapter**, the Characters go head to head with a Nemesis, one of the main Enemies in this Campaign.

MAP AND EXPLORATION

Usually, Challenge Chapter Setup will tell you to place the Tiles for this Chapter face down (Covered).
Unless otherwise specified by the unfolding story, these Tiles will remain Covered, and Covered Tiles cannot be **Explored**. You will therefore not usually have the opportunity to **Explore** during a Challenge Chapter.

NEMESIS CARD

Relevant game information for each Chapter's Nemesis is shown on their Nemesis Card.

Anatomy: Nemesis Card

- (A) **Name**
- (B) **Illustration**
- (C) **Chapter:** the Chapter this card will be played in.
- (D) **Miniature:** the miniature you'll place on the Map to represent this Enemy
- (E) **Sneak Attack:** the number of Wounds you'll inflict on this Enemy when you hit them with a Sneak Attack
- (F) **Health**
- (G) **Aggression:** the number of Wounds this Enemy inflicts when they successfully perform Aggression and the results of the Destiny Die they need to roll to do so
- (H) **Effects**

TACTIC CARDS

Tactic Cards represent the Actions a Nemesis may perform over the course of a Challenge Chapter.

Each Nemesis behaves differently; it will be up to the Characters to identify and adopt the most effective strategy to deal with each of these Enemies.

Regardless of its unique behavior, each Nemesis must obtain a certain number of ⬡ **Reaction Cubes** before they can activate a Tactic Card.

Thematically, Reaction Cubes represent the time a Nemesis needs to prepare their next Action.

The Effects listed on each Nemesis Card define how they gain ⬡ **Reaction Cubes** and how many Cubes they must have **in order to activate a Tactic Card**.

Each time a Nemesis gains **1** ⬡ Reaction Cube, place **1** ⬡ Cube on their Nemesis Card.

When a Nemesis **activates a Tactic Card**, reveal the top Tactic Card from the deck you created during Setup and resolve its Effects, one at a time, from top to bottom.

After all the Effects of a Tactic Card have been resolved, discard that card. If the Tactic Card deck runs out, shuffle the discard pile to create a new deck.

You may not, under any circumstances, draw a new Tactic Card until you have resolved all the Effects of your current one.

Persistent Tactic Cards

A Persistent Tactic Card is a special type of Tactic Card that lists a Persistent Effect at the bottom.

When a Nemesis activates a Persistent Tactic Card, first resolve the Effects at the top, then slide the card under their Nemesis Card so that only the Persistent Effect remains visible.

From that moment on, that Persistent Effect will always be Active.

Anatomy: Tactic Card

- (J) **Tactic Name and Type (standard or persistent)**
- (K) **Lore Text**
- (L) **Effect(s)**

Anatomy: Persistent Tactic Card

- (M) **Persistent Effect**

Equipment and Treasures

Equipment refers to weapons, technical gear, and tools that Characters may obtain during a REQUIEM Campaign. Characters may obtain Equipment as a reward for defeating an Enemy, as a result of Exploring, or by purchasing it from a Market.

GAINING EQUIPMENT

When an Effect allows a Character to gain a piece of **Equipment**, that Character draws a Card from the top of the Equipment Card Deck and places it next to their Character Board. Alternatively, they can give that item of Equipment to another Character on the same Tile as themselves. Only **Characters** may own Equipment; Companions cannot do so.

After a Character has obtained a piece of Equipment, they must place a number of Cubes equal to its **Charge** value on that card. These Cubes represent the number of times this item of Equipment can be used. Some Effects may direct you to place a on a piece of **Equipment** or a **Treasure**; there is no limit to the number of Cubes on these cards.

EQUIPMENT LIMIT

Each Character's current Level Card indicates the maximum number of pieces of Equipment they may own at a given time.

When a Character gains an item of Equipment, if this would put them over this limit, they **must immediately** choose and discard one of their pieces of Equipment in order to remain within their limit.

DISCARDING EQUIPMENT

When you have exhausted all the Cubes (**Charges**) on an Equipment Card, discard it.

TREASURES

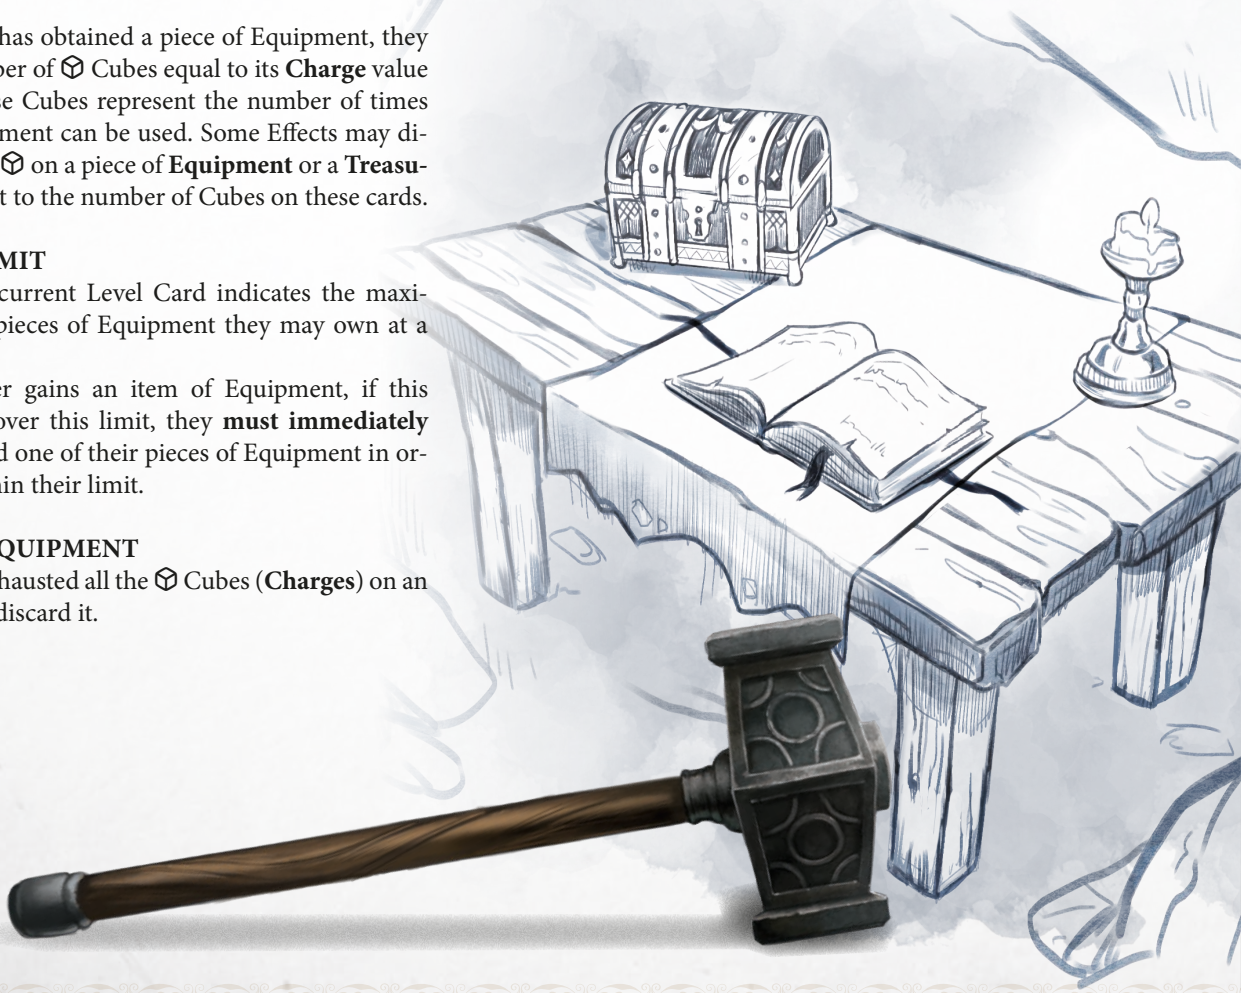
A **Treasure** is an extraordinarily powerful item; it can be recognized by the keyword under its name and the yellow background of its illustration.

Characters may gain Treasures in various ways during the Campaign, such as in the form of rewards for completing a task or Exploring a particularly dangerous location. Each Treasure is unique and can only be gained under specific circumstances.

Charges for Treasures work as they do for Equipment; however, Treasures are **not considered Equipment** and **do not count** toward a Character's Equipment limit.

DISCARDING A TREASURE

When you have exhausted all the Cubes (Charges) on a Treasure Card, discard it. When you do so, return it to the Discovery Card Deck for its Chapter.



Potions and Medications

Potions and **Medication** are represented by their respective tokens. Characters may use Component Actions to resolve their Effects.

Medication

A **Medication** Token represents a small emergency kit that allows you to treat a Character's Wounds. The number of these kits a Character can own is limited by the Medication Slots on their Character Board.

Medication
Discard this Medication.
Discard **1** **Wound** from your Character.

Potions

A **Potion** can give a Character a temporary benefit. The number of Potions a Character can own is limited by the Potion Slots on their Character Board. When a Character gains a **Potion** and the type is not specified, they can decide which one to gain.

Masterbrew Potion
You rolled your Attack Die.
Discard this Potion.
Add to your result.

Stoneskin Potion
You rolled your Defense Die.
Discard this Potion.
Add to your result. If you do this during a **Fight** Action and do not suffer any , gain **2** Focus.

Felingrace Potion
Discard this Potion.
Perform **Slink** *or* **Run**.

Vengetonic Potion
You performed a Sneak Attack against an Enemy.
Discard this Potion.
Inflict **1** Wound on that Enemy.

Valuable Resources

The Custodes of the Order always set out prepared for any eventuality. Alongside rosaries, crucifixes, flasks of holy water, and weapons forged during prayer vigils, they carry lanterns, spare boots, and food supplies. Guardians of the faith but travelers of the world, they combine sacred instruments with practical tools, for their missions require devotion and pragmatism in equal measure.

Quick Reference

Character Actions

WALK
A Character **moves** up to **once**.

RUN
A Character **moves** up to **twice**.

SLINK

A Character **moves** up to **once**. When a Character uses this Action to move, their movement does not trigger an Enemy **Aggression**.

EXPLORE
- Place **1** on your .
- Read the corresponding to the number and the number of on it.

FIGHT
- Roll your Character Fight Dice and the Enemy Dice
- Compare the results
- Gain Focus

Potions and Medication

Medication
Discard this Medication.
Discard **1** **Wound** from your Character.

Masterbrew Potion
You rolled your Attack Die.
Discard this Potion.
Add to your result.

Felingrace Potion
Discard this Potion.
Perform **Slink** *or* **Run**.

Stoneskin Potion
You rolled your Defense Die.
Discard this Potion.
Add to your result. If you do this during a **Fight** Action and do not suffer any , gain **2** Focus.

Vengetonic Potion
You performed a Sneak Attack against an Enemy.
Discard this Potion.
Inflict **1** Wound on that Enemy.

Free Actions

EXCHANGE
Exchange with another Character located on the same Tile as yourself (give and/or take items): Equipment, Treasures, Discovery Cards, Medications, Potions, and/or Thalers.

TRADE
Perform any number of Trade Actions:
- **Refine: discard** 2 to gain 1.
- **Synthesize: discard** 4 to gain 1.
- **Purchase: discard** equal to the cost of 1 Equipment available in the Market to gain it.

COMMAND
Exhaust **1** Companion Action Token.

Component Actions

When the Condition is met (if present),
you may pay the Cost (if present),
to resolve the Outcome.
